US Population & Housing Starts

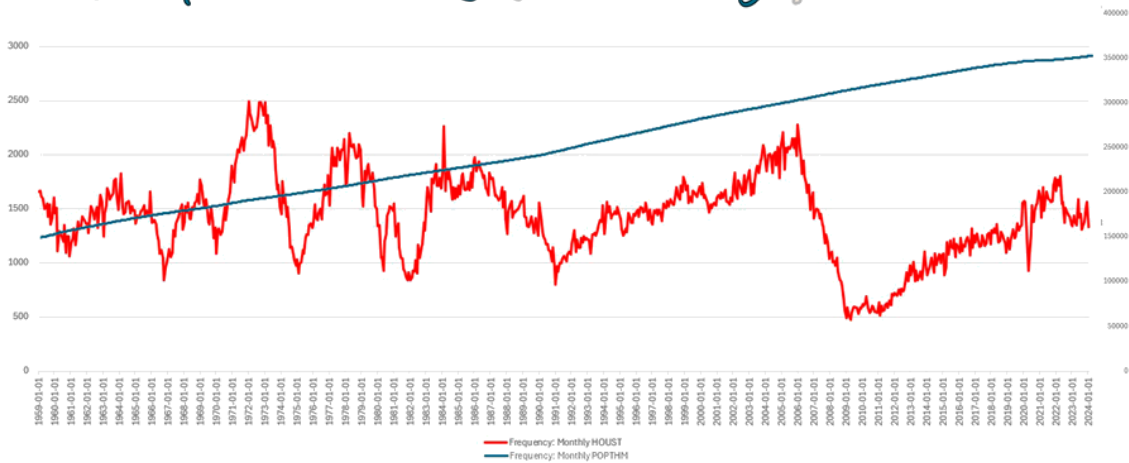

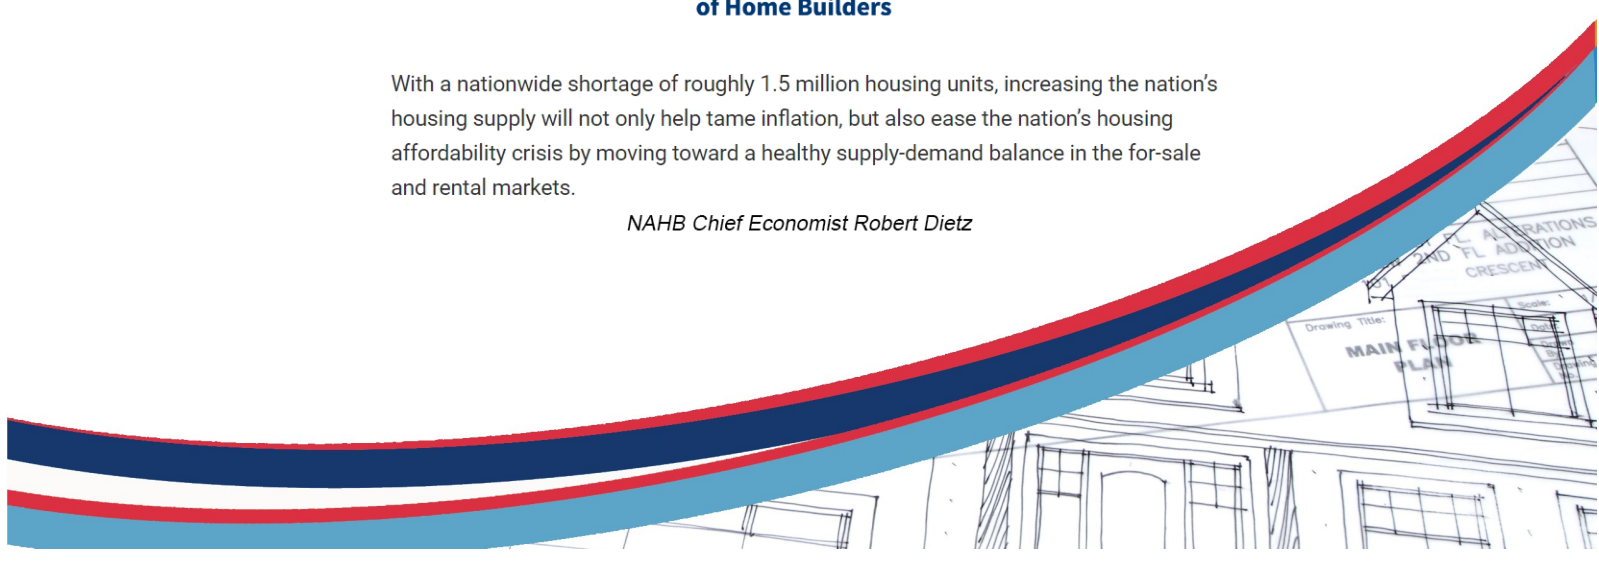

Chart and table of U.S. population from 1950 to 2024. United Nations projections are also included through the year 2100.

- The current population of U.S. in 2024 is **341,814,420**, a **0.53% increase** from 2023.
- The population of U.S. in 2023 was **339,996,563**, a **0.5% increase** from 2022.
- The population of U.S. in 2022 was **338,289,857**, a **0.38% increase** from 2021.
- The population of U.S. in 2021 was **336,997,624**, a **0.31% increase** from 2020.

With a nationwide shortage of roughly 1.5 million housing units, increasing the nation's housing supply will not only help tame inflation, but also ease the nation's housing affordability crisis by moving toward a healthy supply-demand balance in the for-sale and rental markets.

NAHB Chief Economist Robert Dietz

Harry's

SEAFOOD BAR & GRILLE
"A New Orleans Style Restaurant"

St. Augustine, Florida

This restaurant seems to be right on your way into historical St. Augustine district. The specific ingredients of some of the menu items are listed on the website. So you can, not only avoid items you want, you can make the dish at home. We started with the She Crab soup. It had beautiful flavors and NOT too filling.

I wanted the shrimp and grits but wanted to try their scallops so I ordered the Shrimp & Scallops with grits. The Chicken-n-Grits was the other dish and their fried boneless chicken breast served with collard greens atop sweet corn grits and covered with a Tasso ham cream sauce was the most tender.

Try to visit on a Sunday since many parking locations are free. Parking, on the other hand, may be your only challenge to getting to this restaurant because once you park, you have to navigate your way to the restaurant and then back to where you parked. But after dining at Harry's, you'll need to exercise your meal away.
