AUSTRALIAN-OWNED DEFENCE SUPPORT CAPABILITY

All At Once Consulting Pty Ltd (AAOC) is an Australian-owned SME based in Cairns, Queensland, providing practical Defence, maritime, logistics, sustainment and operational support to organisations operating in complex, regional, remote and high-tempo environments.

COMPANY PROFILE

AAOC provides commercially focused operational support to Defence organisations, prime contractors, government agencies and Defence industry partners. Our capability spans logistics and supply-chain coordination, maritime operations, maintenance and sustainment, asset and fleet management, procurement, contractor coordination, project support and regional/remote operations.

AAOC's capability is supported by more than 20 years of senior professional experience across Defence, government, maritime, logistics, infrastructure, maintenance, asset management and remote operations. Experience includes Defence-facing supply-chain activity, maritime and port operations, maintenance and sustainment, high-value asset management, government procurement, contractor management and operational readiness.

CORE DEFENCE CAPABILITIES

CAPABILITY	DELIVERY FOCUS
DEFENCE LOGISTICS & SUPPLY CHAIN	Logistics coordination; time-critical freight and cargo movements; transport coordination; procurement; supplier management; inventory and equipment support; remote logistics; deployment and contingency support.

OPERATIONAL CAPABILITY & DELIVERY

OPERATIONAL EXPERIENCE

AAOC's leadership capability is grounded in operational roles across Defence-facing logistics, maritime operations, government, maintenance, fleet and asset management, infrastructure and remote operations. Experience includes coordination of vessels, ports, suppliers, cargo and contractors in geographically dispersed and time-critical environments.

Current and recent professional experience includes marine services and theatre supply-chain coordination within a Government & Defence environment, government fuel and fleet management across remote communities, and senior maritime operations management across Queensland. This provides practical understanding of operational readiness, service continuity, safety, compliance, stakeholder management and commercial performance.

DELIVERY MODEL

- Direct contractor – project-based operational, logistics or specialist support.
- Subcontractor – integrated into prime-contractor or Tier-2 delivery teams.
- Specialist support provider – targeted capability in logistics, maritime, sustainment, assets, procurement or operations.
- Project delivery partner – coordination, administration, reporting, procurement and contractor management.
- Regional / remote support partner – local capability for Northern Australia and geographically dispersed operations.
- Surge capability – scalable support for increased operational demand, mobilisation or contingency.

DEFENCE & INDUSTRY APPLICATIONS

• Defence logistics, supply-chain and sustainment support	• Naval and maritime operations support
• Maintenance, fleet and asset sustainment	• Defence infrastructure and project support
• Regional and remote Defence operations	• Procurement and supplier coordination
• Contractor and subcontractor coordination	• Transport, freight and cargo coordination
• Operational readiness and contingency support	• Australia–Indo-Pacific logistics and operational coordination

AUSTRALIA–INDO-PACIFIC CAPABILITY

AAOC is positioned to support Australian and allied Defence-industry supply chains where Australian-side coordination, regional logistics or operational support is required. Capability can support Australia–Asia movements through procurement coordination, freight and transport support, supplier and contractor coordination, documentation, project administration and regional operational support.

AAOC has an established Australia–Philippines connection, including presence in Davao, providing a foundation for Australia–Philippines coordination where appropriate. AAOC is also interested in supporting Australia–Singapore and wider Indo-Pacific Defence and maritime supply-chain requirements.

OPERATING PRINCIPLE

AAOC integrates with existing client and prime-contractor systems rather than duplicating them. We provide accountable local delivery, coordination and operational support against agreed scope, safety, compliance and performance requirements.

CREDENTIALS | GOVERNANCE | ENGAGEMENT

SECURITY, PROFESSIONAL & OPERATIONAL CREDENTIALS

- AGSVA Defence Security Clearance
- Marine Security Identification Card (MSIC)
- Certified Associate in Asset Management – Asset Management Council of Australia
- Diploma of Financial Planning (FNS50615)
- Queensland MC & R Driver Licence
- Queensland Forklift Licence and Elevated Work Platform Licence
- Four-Wheel Drive Operations
- Hazard Analysis
- Work Permit Issuing & Monitoring
- Construction Induction – White Card
- First Aid, Resuscitation & Life Support
- Pacific Maritime Security Program – Cultural Awareness Training

GOVERNANCE, SAFETY & ASSURANCE

AAOC is committed to safe, compliant and accountable delivery. Our operational approach incorporates risk identification and control, WHS compliance, incident and issue management, contractor coordination, documentation, performance monitoring and continuous improvement.

AAOC maintains management documentation appropriate to its service scope, including safety, environmental, risk and operational controls. Client and site-specific requirements are incorporated into delivery arrangements before mobilisation.

INFORMATION & SECURITY

AAOC understands that Defence and Defence-industry engagements may involve controlled information, security requirements, site access conditions and client-specific information-management controls. AAOC will comply with applicable client, contract and legislative requirements and will only undertake work within the security and authorisation conditions applicable to the engagement.

WHY AAOC

AUSTRALIAN-OWNED Australian SME based in Cairns, Queensland.	DEFENCE EXPERIENCE More than 20 years of professional experience across Defence, government and Defence-facing operational environments.
MARITIME CAPABILITY Practical experience across vessels, ports, marine logistics and maritime operations.	NORTHERN AUSTRALIA Strong regional and remote operating capability across North Queensland and geographically dispersed environments.
OPERATIONAL FOCUS Focused on readiness, continuity of service, safety, accountability and measurable outcomes.	FLEXIBLE DELIVERY Available as contractor, subcontractor, specialist support provider, project partner or surge capability.

ENGAGEMENT

AAOC welcomes opportunities to support Defence organisations, prime contractors, Tier-2 and Tier-3 Defence suppliers, government agencies, maritime organisations and Defence industry partners.

We are particularly interested in subcontracting, project-based engagements, regional and remote support, Defence logistics and supply-chain services, maritime and naval support, maintenance and sustainment coordination, procurement and supplier management, contractor coordination and operational support.

CAPABILITY ENQUIRY

For Defence, maritime, logistics, sustainment or regional operational requirements, contact AAOC to discuss scope, delivery model, mobilisation requirements and applicable security, safety and compliance conditions.
