April 30th 2021 #NUREMBERG #TRIALS The Nuremberg Doctors Trial and Modern Medicine X's Panic Promotion of the FDA X's Experimental and Unapproved COVID-19 mRNA Vaccines. Should Medically-degreed physicians in the NIH, the CDC, the NIAID and the FDA (all of whom presumably pledged the hippocratic oath at the beginning of their medical careers) who then vigorously promoted the untested (long-term), experimental emergency use authorized (EEUA) Covid-19 Vaccines, be subject to the Nuremberg Code of Ethics?

April 7th 2021 The Significance of the Nuremberg Code: The Universal Right of Informed Consent to Medical Interventions by ALLIANCE FOR HUMAN RESEARCH PROTECTION **<https://ahrp.org/the-significance-of-the-nuremberg-code/>**

The Nuremberg Code provides legal justification to litigate violations of informed consent. The first and foremost principle is unequivocal: "The voluntary consent of the human subject is absolutely essential". The United States Military Tribunal established the Nuremberg Code as a standard against which applies to all citizens 7 soldiers as well as civilians." "the universally accepted norm in customary international law regarding nonconsensual medical experimentation." The 4thReich members and their aiders and abettors are responsible, whether they know it or not, violating the Nuremberg Code as a Crime Against Humanity.

- 1) "a surgeon who performs an operation without his patient's consent commits an assault for which he is liable in damages."**
- 2) "responsibility for violations of informed consent rests upon individual doctors, government officials 3 and their aiders and abettors 3 each of who can be prosecuted for crimes against humanity"**
- 3) "any compelled intrusion into the human body implicates significant, constitutionally protected privacy interests"**

"Of special interest to this Court, the Nuremberg Code, at least in significant part, was the result of legal thought and legal principles, as opposed to medical or scientific principles, and thus should be the preferred standard for assessing the legality of scientific research on human subjects. ? Under it, duties to research subjects arise.

The Nuremberg code [i]s a summary of the legal requirements for experimentation on humans The Code requires that the informed, voluntary, competent, and understanding consent of the research subject be obtained. Although this principle is placed first in the Code's ten points, the other nine points must be satisfied before it is even appropriate to ask the subject to consent. The Nuremberg Code is the 'most complete and authoritative statement of the law of informed consent to human experimentation.' ? It is also 'part of international common law and may be applied, in both civil and criminal cases, by state, federal and municipal courts in the United States."

Cases in Point: The case involved Pfizer which conducted an unapproved, trial of its experimental antibiotic, Trovan on children in Nigeria. The court found Pfizer guilty. -- Rabi Abdullahi, et al. v. Pfizer, Inc., 562 F.3d (2d Cir. 2009)

- 1) "Among the nonconsensual experiments that the tribunal cited as a basis for their convictions were the testing of drugs for immunization against malaria, epidemic jaundice, typhus, smallpox and cholera. Seven of the convicted doctors were sentenced to death and the remaining eight were sentenced to varying terms of

imprisonment. The American tribunal's conclusion that action that contravened the Nuremberg Code's first principle constituted a crime against humanity is a lucid indication of the international legal significance of the prohibition on nonconsensual medical experimentation."

Telford Taylor explained,"Nuernberg was based on enduring [legal] principles and not on temporary political expedients, and this fundamental point is apparent from the reaffirmation of the Nuernberg principles in Control Council Law No. 10, and their application and refinement in the 12 judgments rendered under that law during the 3-year period, 1947 to 1949."

"When the heads of the Ministry of Health as well as the prime minister presented the vaccine in Israel and began the vaccination of Israeli residents, the vaccinated were not advised, that, in practice, they are taking part in a medical experiment and that their consent is required for this under the Nuremberg Code".

On March 1st 2021, Isaac Legaretta, a New Mexico Detention Center Officer filed the first US Lawsuit Over Mandatory Covid Vaccines. DOCKET: No. 2:21-cv-00179

On March 7th 2021 an Israeli citizens group filed a a petition to the International Criminal Court charging the Israeli Government with violating the Nuremberg Code with its mandatory Vaccination policy. "When the heads of the Ministry of Health as well as the prime minister presented the vaccine in Israel and began the vaccination of Israeli residents, the vaccinated were not advised, that, in practice, they are taking part in a medical experiment and that their consent is required for this under the Nuremberg Code".

On March 19th 2021 On March 19th a group of researchers from Norway have filed a lawsuit charging the Norwegian government corona policy is a Crime Against Humanity. under the leadership of Dr. Reiner Fuellmich and his team of investigators and lawyers. Tesla Leaks was 1st in the World proclaim the "Coronavirus Hoax" on February 25th 2020 on the Tesla Leaks Facebook Group. The Coronavirus Hoax post was removed by Facebook on December 25th 2021; 10 days later, the Admin for Tesla Leaks and it's 10,000 posts were removed by Facebook, January 5th 2021; right as Tesla Leaks was predicting and posting on the False Flag and Stand Down at the Capitol. The Coronavirus Hoax post had over 165 updates in that time. Those updates are not available; but have been re-created on the website as much as possible. <https://facebook.com/groups/teslaleaks>

Three days later, February 28th 2020 is when Donald Trump agreed with the 10 original assertions of the Hoax; and he also called it a Hoax; now expanded to 66.6 factual assertions, with a total of over 500 official and 100% verifiable sources. PROJECT INDEPENDENCE: Just as Richard Nixon announced publically, Project Independence on November 7th 1973, the Oil companies launch his Impeachment on October 30th 1973. Nixon declared that American science, technology and industry could free America from its dependence on imported oil, and establish its energy independence. He called for the construction of 1,000 nuclear power plants by the year 2000. Despite these initiatives, Project Independence failed to prevent the increase in American oil consumption after the 1973-74 embargo; its dependence on foreign suppliers rose from 36% to almost 50% in 1979,[5]

June 3rd 2021 #DIE #MORONS And Bend-Over for that Anal-Swab!! As an infectious disease physician, I am often asked this question. The answer is yes. If you have symptoms of COVID-19, you should get tested for COVID-19 even if you are fully vaccinated. You won't be at high risk for hospitalization or severe disease, but if you are infected you may pass the virus to an unvaccinated person, who could then get very sick.

June 2nd 2021 #CONTAGION #HOAX The median infection fatality rate is .02%, .00% for children under 4,

estimated by Professor John P.A. Ioannidis, in a paper published by the WHO, is something like 0.23% and this is highly stratified by age and depends upon the presence of comorbidities such as obesity. Depending on which source you look at, it appears that the average age of death from COVID-19 is around 80-82, which is much at the same as the average age of death from all illnesses. In a report issued by Imperial College London, age specific infection fatality rates were estimated to be as follows:

June 2nd 2021 #KING #JAMES #AUTHOR #REWRITING #BIBLE The Book Of Love; Changed to the Book of Charity: This chapter covers the subject of "Love", but has been retranslated by King James into English as "Charity" in the King James version; but the word "love" is preferred by most other translations, both earlier and more recent. This chapter of 1 Corinthians is one of many definitional sources for the word "Agape" when used to refer to "divine love". Introducing his homage to love in 1 Corinthians 12:31, Paul describes agape as "A more excellent way". **https://en.wikipedia.org/wiki/1_Corinthians_13** -- According to rabbinic tradition, Ecclesiastes was written by Solomon. (an alternative tradition that "Hezekiah and his colleagues wrote Isaiah, Proverbs, the Song of Songs and Ecclesiastes" probably means simply that the book was edited under Hezekiah), but critical scholars have long rejected the idea of a pre-exilic origin.

<https://en.wikipedia.org/wiki/Ecclesiastes> -- "An unnamed author introduces "Kohelet" as the son of David (1:1) and does not use his own voice again until the final verses (12:9-14)" Kohelet proclaims that all human actions are hevel, "vapor" or "breath", meaning "insubstantial", "vain", or "futile", since the lives of both wise and foolish people all end in death. he is unable to ascribe eternal meaning to it. ...reminds the reader that wisdom has its limitations and is not man's main concern.

Why? California's lack of investment in (raising dams) water storage infrastructure over the last 40 years. And of course, the Taliban and Chevron and the Greenies sabotage the Dams... The outcome was expected, but it was the latest in a political battle that has been raging for decades. Even as the dam was approved in 1913 to assist earthquake-ravaged San Francisco, environmentalists and nature lovers, who said the valley's beauty surpassed even Yosemite Valley's, were fighting its construction.

<https://m.youtube.com/watch?v=RctiSru4AUo>

----- A GOOD START -----

EXPLAIN PLEASE: Explain how the flu disappeared but has been replaced with something which has the EXACT same symptoms.

Explain how the only proof that Covid exists is a computer modelled genome with zero physical proof.

Explain how you prove something into existence without going through an isolation or purification process.

Explain why no government agency has any quantifiable proof that "it" even exists.

Explain why they downgraded ¶ Covid 19 ¶ to a non consequential infectious disease days before they declared a pandemic.

Explain how they pulled the coronavirus Act 2020 legislation out of their arseholes in a matter of days, despite the act being several hundred pages long.

Explain why they have to use bullshit criteria like £ deaths for ANY reason within 28 days of a positive "test".

Explain why they banned autopsies.

Explain why they changed the law to allow any practitioner to diagnose covid through observation alone, even if it is done through video consultation.

Explain why undertakers have seen no difference in custom.

Explain how all cause mortality is at an all time low.

Explain how millions of protesters across the globe aren't getting sick with "Covid."

Explain how this is the only crisis that needs an advertising campaign paired with a constant barrage of repetitive brainwashing propaganda on the TV and in the streets.

Explain how tens of thousands of people stood on the streets of London last Saturday but it wasn't once shown on ANY TV channel.

Explain how thousands were yelling "shame on you" outside the BBC HQ in both London, Manchester and Cardiff but it wasn't shown on the TV?

Explain how the people who are wearing the masks and following the rules are the only ones who are catching "COVID".

Explain how the creator of the PCR amplification tool is on record for stating that the PCR was not designed as a test for infectious diseases.

Explain why they are using the PCR to diagnose an infectious disease.

Explain why it's been changed from Covid deaths, to covid infections to covid "cases" .

Explain how the "anti-vaxxers" are being blamed for the rise in "cases" when the only people who could possibly be contributing to the statistics are the people who are getting the "test" in the first place.

Explain why the hospitals were empty during the height of the "pandemic."

Explain why 1000s of nurses are getting fired for saying that their hospitals were empty.

Explain why the hospitals are now filling up with vaccine adverse reactions but the MSM aren't reporting it.

Explain why kids need to be vaccinated when, by your own definitions, covid isn't dangerous to children.

Explain, if all the vulnerable people have already been vaccinated, why do all the healthy people need to get vaccinated if you're already protected and the recovery rate was already 99.96% without the vaccine.

Explain why the average age of death with "Covid" is higher than the average age of death without.

Explain how you can get banned from Facebook and Twitter for sharing official government links.

Explain why there are several class actions in progress, taking governments across the globe to court for crimes

against humanity, but there is zero MSM coverage.

Explain why most government leaders are reading from the same script.

Explain how all the things that you were laughing at us for talking about last year are now becoming a reality this year.

<https://teslaleaks.com/nuremberg-trials-evidence.html> -- For the overwhelming majority of people, COVID-19 is a religion. On faith they believe that vaccines using an experimental mRNA technology never before used on humans, developed in less than a year instead of the normal 5-10 years to evaluate the long-term effects on people's health, are safe and effective. On faith they believe that draconian measures, like mask mandates and global lockdowns that have destroyed lives, economies, and trampled centuries of cherished civil liberties will protect them. the basis of all internal combustion engines. In combination with the wireless thermonuclear light bulb, you get the Mr Fusion Engine in BscK to the Future. And in combination with his Oxone generator, Tesla said he would do away with all fuels if any kind... The Air is the input fuel, to be perfectly fused or manufactured AND hydrocracked, from input gasses since 1891-3 & 1896-7. And the Wireless, all planned for Niagara Falls by 1896+. Then came the Spanish American War, kicked off by the Maine being hit by a tethered or wireless torpedo. By, 1899, Tesla tells Insurance Magazine that "everything would have to be insured" against the Automaton. @ teslaleaks.com

March 17th 2021 Digital Trails: How the FBI Is Identifying, Tracking and Rounding Up Dissidents Relying on selfies, social media posts, location data, geotagged photos, facial recognition, surveillance cameras and crowdsourcing, government agents are compiling a massive data trove on anyone and everyone who may have been anywhere in the vicinity of the Capitol on January 6, 2021. The amount of digital information is staggering: 15,000 hours of surveillance and body-worn camera footage; 1,600 electronic devices; 270,000 digital media tips; at least 140,000 photos and videos; and about 100,000 location pings for thousands of smartphones. FBI agents are matching photos with drivers' license pictures; tracking movements by way of license plate toll readers; and zooming in on physical identifying marks such as moles, scars and tattoos, as well as brands, logos and symbols on clothing and backpacks. They're poring over hours of security and body camera footage; scouring social media posts; triangulating data from cellphone towers and WiFi signals; layering facial recognition software on top of that; and then cross-referencing footage with public social media posts.

From the story, by Vaccinating 5,000 people, you allegedly save 1% of that group, or 50 people total or 1% effective at saving lives. Of the 63 cases, given a .2% fatality rate for under 65 years of age, is 1.26 deaths of 5000 people. With 10,000 visits back and forth to the "doctor"; or 500,000 miles, there will be at least 1 death from a car accident.

February 20th 2021 THE HAGUE, Netherlands (AP) - Dutch senators late Friday approved hastily drawn up legislation underpinning the country's coronavirus curfew, ensuring that it will remain in force at least until early March despite a court order on Tuesday that it be scrapped. February 17th 2021 AMSTERDAM (Reuters) - The Dutch government raced on Wednesday to prepare legislation to keep a nighttime curfew in place after a court ordered it to scrap the controversial COVID-19 measure which has become the focus of campaigning a month before a general election.

February 17th 2021 Source(s): AFP ,Reuters | Dutch nighttime COVID-19 curfew to continue pending government appeal. The Court of Justice in The Hague ordered the Dutch government to lift the curfew immediately on Tuesday, saying it lacks proper legal basis. According to the court, the curfew represents a violation of people's rights to freedom of movement and privacy and its enforcement was unjustified, as infection rates were already dropping in the country when the curfew came into force. The state filed a so-called urgent "turbo" appeal, asking to suspend the court order and maintain the curfew until the final appeal ruling next Friday. Shortly after the appeal hearing began at 4 p.m. local time, the session degenerated into an argument between the judge and the anti-lockdown protest group Viruswaarheid, or Virus Truth. "The curfew is based on a law for emergency situations, where there is no time for debate with parliament," the court said. "There was no such pressing need in this case. Far-reaching measures such as these need to be based on proper laws.". The judge

ruled that there was no special urgency to the measure as the COVID-19 situation wasn't a new emergency in the Netherlands and the possibility of a curfew had been previously discussed. People are expected to go outside tonight after 9 p.m., either to celebrate or to demonstrate against the fact that the curfew is maintained. In any case, it's a highly embarrassing situation for the Dutch caretaker government, and today's quarrel leaves the curfew in legal limbo. <https://newseu.cgtn.com/news/2021-02-17/Dutch-court-orders-government-to-end-COVID-19-curfew-XVXmvt9ARO/index.html>

Emergency Broadcast: The 4th Reich when the Gates of Hell are Now Open and Hell Freezes Over!

Bill Clinton, Hillary Clinton and cheerleader Biden and Wesley Clarke of NATO are responsible for dropping 1000 tons of Depleted Uranium on Serbia, Nikola Tesla's Hometown in 1999. This is a War Crime and they all should be held for a War Crime Tribunal. When asked about this War Crime, **Wesley Clark said he would put his critics or "disloyal" or "radicals" in internment camps**. Joe Biden: 'bomb Belgrade' and "blow up all the bridges on the Drina". August 16th 2016 Biden offers condolences for 1999 NATO bombing of Serbia.

The Clinton administration, which had been happy to overlook the Rwandan genocide, was eager to become involved when reports of genocide and ethnic cleansing cropped up. Hillary Clinton emphatically "urged" her husband to "bomb" Belgrade in hopes of resolving a conflict that goes back five centuries, involves credible allegations of mass murder on both sides, and had not even a trace of interest for U.S. foreign policy. In Biden, the Clintons found a champion to spearhead the Senate bill authorizing the bombing.

By the beginning of March these terror and counter-terror operations led to the inhabitants of numerous villages fleeing, or being dispersed to either other villages, cities or the hills to seek refuge... February 12th 2021 Alfie Oakes Calls on Business Owners to Take A Stand Against Covid Lockdowns March 1st

China did-it Hoax: Alex Jones and others continuously berate the public, daily, that "China" is to blame for all the facism in the West. However, the people who are setting up tyranny in the U.S., the peoply lying about everything, the people making all the orders and rules instead of laws, are named Trump, Pence, Biden, Sanders, Schwab, Gates, Zuckerberg, Fauci, Pelosi, Schumer, Cuomo, Newsom, Trudeau, Johnson, Morrison, Soros, Buffet, Bezos, Musk, etal. are all white people. No Chinamen there!! They are primarily Knights of Malta, NA-tional Socialist + ZI-onist (NAZI's) and/or Jewish. No Christians here!! This is why the above group of people want to kill, imprison or re-educate Trump supporters; because 80% are primarily Christian.

History of the U.S. National Guard and U.S. Police: It has been proven here previously, that the original fouding of the U.S. National Guard and U.S. Police Force, were invented to protect coal plants, to put down coal miner protests, and protect oil fields & gas stations. To -Protect- Saudi Arabia & -Serve- Chevron! The origination of the police in the U.S, began in Texas at The Alamo. The Alamo was the theft of oil and gas at the Eagle-Ford Shale field, the largest field in the U.S., located around San Antonio, from the country of Mexico. The potential amount of production of petroleum over the next 30+ years is incredible.

FEATURED HOAX: Spanish Flu #Hoax: The same scenario happened in 1918. If 50-100M died, that would be 1000-2000 NFL football stadiums packed with dead bodies. 1) Mask Mandates 2) Arrests for not covering your mouth 3) Empty hospitals 4) Empty tents 5) Not 1 dead body in Google Images for "spanish flu 1918". Zero! Not 1 dead body from Covid, neither. Zero! Patients murdered by hospital staff maybe, but not "dropping dead in the street" dead.

4) ----- For Immediate Release February 2nd 2021 - TESLALAKS.COM SPECIAL REPORT: Questions presented to the public for the Donald Trump Impeachment trial of February 8th 2021 pertaining to Election Fraud? Titled: The 37 Ways Ron Paul Was Cheated in 2012

Legal Case for a False Flag & Stand-Down at the Capitol:

1) Donald Trump & an Alex Jones's associate at the White House paid for and organized the event, and both clearly stated, that the event was to be a peaceful march

2) However, in Trump's farewell address 3 days later, Trump calls the march a -political- "assault"; both incriminating himself; and giving others a case for treating a peaceful march as "terrorists"; allowing Biden to declare a 2nd World War on Terror or WW5; WW3 being War on Drugs, WW4 being War on Covid, and WW5, War on Terror Part 2. [Trump's quote of "assault" at 1:33](#)

3) Furthermore, the news called it "a deadly attack"; when it was Capitol Police that murdered all 4 people; an unarmed woman carrying a US Flag, a 14 year airforce veteran, by shooting her in the neck at point-blank range. When, a warning shot would have been appropriate. 2 others died when Capitol Police shot tear gas into the crowd; to incite them; giving 2 people heart attacks.

4) Capitol Police murdering 4 unarmed citizens, for nothing more than trespassing; is not the worst thing since Pearl Harbor as the entire fake-news media suggests

5) The US Military has weaponry that is "50-100 years beyond, what you can even imagine" - Bill Cooper. Such as Depleted Uranium armor and bullets; that according to official sources; ended Tank Warfare by 1979. No weapons, bullets, bombs or even RPG's available to the public is any threat to their lethal and non-lethal machines, in any way, shape or form. #fact

6) If, by Law, the Telecommunications industry such as Steve Bannon's AT&T, the allies as part of the "Open Skies Treaty" and NSA is recording "every conversation in the world"; then clearly, if there was an "attack" planned, they would have picked up those communications and would have called in more police to the scene. Instead of, a stand-down order. Since they did not, or have not, then these agencies are also in-on the false flag attack.

7) The definition of "[State Terrorism](#)" in the dictionary, is a Government -sponsored- attack against the people, and not the other way around.

8) Evidence suggests that "Antifa" did not have an official presence at the Capitol. The "Boogaloo" did not have an official presence at the Capitol. The "Proud Boys" leader was allegedly an FBI Informant (Reuters). Three "Oathkeepers" were indicted in Federal court and charged with conspiracy. (DOJ)

9) [Terror-Storm](#), a History of Government Sponsored Terror by Alex Jones, 2006

Here's a hefty, albeit incomplete, list of political, economic, and information warfare against Trump and his supporters:

Lists of Trump administration officials, donors, and supporters, including personal information such as home addresses

- Planned boycotts of companies that hire former Trump administration officials
- Pressure against companies to not hire former Trump administration officials
- Boycotts of companies that make political donations to Republicans who opposed the election certification
 - Banning of dozens of high profile, Trump supporting social media accounts
- Initial claims by the Justice Department that Capitol protesters sought to "capture and assassinate elected officials," which was later withdrawn due to a lack of evidence
- FBI warnings of wide scale violence ahead of last weekend, repeated breathlessly by the media, but which never materialized
 - Calls for the IRS to investigate and disqualify tax exempt political groups present at the Capitol protest
 - Calls for a "USA PATRIOT Act 2.0" to combat domestic right wing extremism
- Legislation entitled "Insurrection Financing Transparency Act," which would force the disclosure of ownership information of private companies alleged to have given money to tax exempt political groups at the Capitol protest
- Calls for Facebook to expand de-platforming of "domestic terror networks," and the encouraged hiring a full-time executive to counter extremism on the social media platform
- Cancellation of data hosting services for Parler, and continued campaigns to prevent use of the social media site
- Leaking and/or hacking of data on Parler databases, and the exploitation to expose personal information such as geolocation data and potentially images of driver's licenses
 - Revoking the availability of Parler from the Apple and Google app stores
 - Calls for "de-programming" and "re-education" efforts against Trump supporters
 - Calls for a new domestic security agency to track right wing domestic terror groups
- Calls for the Federal Communications Commission to counter broadcast outlets like Fox News, Newsmax, and OAN
 - Pressure against cable and data companies to drop FoxNews, Newsmax, and OAN
- Pundit and "expert" comparisons of Trump supporters to Al-Qaeda and Islamic State terrorists, feeding further fear and needless agitation

66.6+ Reasons Why Corona Virus is a Full-Blown Hoax:

1) Moderna & Pfizer inoculations are not "Vaccines" and are also manufactured "gain of function" genetic material. Pfizer admits that COVID mRNA **Vaccine** is -Not A Vaccine- at all!! Its "Chemotherapy" and **Gene Therapy**. It is unlawful under the FTC Act, 15 U.S.C. 41 et seq., to advertise that a product or service can prevent, treat, or cure human disease unless you possess competent and reliable scientific evidence, including, when appropriate, well-controlled human clinical studies. <https://banned.video/watch?id=60076fda8c03b74ce0e2f6f5>

Ebola Virus and Species Patent owned by the U.S. Department of Health. November 12th 2015 Chapel Hill NC **gain of function research on bats** stirs debate over risky research. **Merck** and **Astrazenica** abandoned development and testing of coronavirus vaccines. March 14th 2016 SARS-like WIV1-CoV **poised for human emergence** | PNAS

mRNA that manufactures "Spike" Proteins that can result from the expression of recombinant DNA within living cells are termed recombinant proteins. When recombinant DNA encoding a protein is introduced into a host organism, the recombinant protein is not necessarily produced.[1] Expression of foreign proteins requires the use of specialized expression vectors and often necessitates significant restructuring by foreign coding sequences.[2] https://en.wikipedia.org/wiki/Recombinant_DNA

2) Two types of "Vaccines" described at the National Institute of Health 1) makes your own cells manufacture the viral genetic material 2) mRNA, **recombinant DNA**, by definition, physically changes your DNA DNA "expression" by manipulating the "codons" that contains the instructions for manufacturing <https://news.vanderbilt.edu/2021/02/17/sars-cov-2-protein-blocks-an-essential-step-in-host-gene-expression-new-discovery-finds/>. Safety and efficacy studies at the NIH or by the manufacturer are only looking for "Immunoresponses, NOT for Viruses; despite the vaccine companies writing their own studies and fast-tracked. **"They use a safe virus to deliver the genetic code (DNA) of the SARS-CoV-2 spike protein to human cells so that the cells can make the protein. JNJ-7843672 uses a human adenovirus to deliver the code for the SARS-CoV-2 spike protein."** <https://niaid.nih.gov/diseases-conditions/covid-19-vaccine-faq>.

In the same fashion, Koch Postulates to "Isolate" a "Virus" or duplicated "genetic material" for Covid has only been done with Monkeys, with anal swabs, and only found "virus particles". <https://ncbi.nlm.nih.gov/pmc/articles/PMC7095368/>

3) Covid-19 AI Scenario was predicted by Tesla Leaks as the most likely response to the domination of Tesla & Nikola Tesla; at The Rise of the Jedi Podcast on December 22nd-December 26th 2019 at 1AM **Rise of the Jedi Podcast**

4) The Great Reset and Plandemic was pre-planned; as their **New World Order** was at risk of collapse - Joe Biden, January 2016

5) Plandemic was pre-planned at the 2019 World Economic Forum; under the title **Event 201 Scenario** by Johns Hopkins Center for Health Security in collaboration with the World Economic Forum and the Bill & Melinda Gates

- 6) Just as their old order of oil, gas, propane, coal and tree buring failed; as their prices collapsed and renewable energy reached "negative prices"; they shut down **Tesla Factories** in the U.S and Shanghai
- 7) Hospitals don't provide or use the words "Cures" to anything, more or less anything for a cold virus, they use the word **"Treat"**
- 8) The **2002-2004 SARS outbreak** sourced "hospital staff" as the originators of SARS, 500,000 yearly cases of sepsis and other infectious diseases. March 2003 report where **200 hospital staff get SARS and spread it to patients.**
- 9) All real **medical cures** from Ozone, to UV, to Plasma, to filtering your blood with Electric Fields; are banned by hospitals; while also not covered by Insurance
- 10) WHO lies about UV-C light and Sunlight; claiming **UV-C does-not kill Coronavirus**. FDA: **UV-C destroys SARS-Coronavirus**. The destruction of the protein shell ultimately leads to inactivation of the virus.
UV-C is safe for human skin
- 11) **EPA banned peer review** of the first study by Trump team on UV-C lights with resperators on humans, citing alleged danger.
- 12) Governments and Hospitals **banned Primatene Mist in 2011** to breath, and instead they use **incubators to kill 90%** of you. Just 1 mask **reduces O2 intake** by 20% and causes **carbon dioxide poisoning**.
- 13) Mainstream Media ignores real cures of virus and disease. AMA bans electric healing in the early 1900's calling it "quackery" clack clack clack, and **Pseudo-Scientific. Electricity Greatest of All Doctors** - Nikola Tesla to the IEEE in 1899
- 14) No authentic pictures exist of **Coronavirus**; without a **Scanning Electron Microscope** (SEM) or TEM Microscope and Photoshop. **SARS-2 Photoshop Cartoon**
- 15) Covid from Bat guano in China is only #blamed and never has been proven in any way. **Chinese Officials Blame US Army for Coronavirus**; citing "this is the Black Swan event the Globalists have been waiting for"
- 16) No #causation ever proven between any particular virus and a particular disease; not even HIV & AIDS; citing "The **correlation between antibody to HIV and AIDS** does not prove causation" - NIH
- 17) Hospitals are empty; emergency tents are empty; have been already torn down. **U.S. Field Hospitals Stand Down, Most Without Treating Any Covid Patients** - PBS
- 18) **Flu disappeared in 2020** all counted as Covid cases and deaths
- 19) **Swab tests, Anal probes** and other test look for antibodies or reactions, not for a particular virus - NIH. Tanzania President shows how **Goats show false-positives to Covid tests** and "has technical errors". Austrian politician presents a **False-positive test using Coca-Cola**. Coca Cola and Pepsi join the hoax and promote using thier **plastic bottles for covid testing**.
- 20) **mRNA therapeutics**, by definition, changes your DNA. This mRNA "Vaccine" is from the lung tissue of an aborted child from 1966.
- 21) PCR test copies genetic material; 40X with errors each replication, looks for only "markers", to become

anything they want; and not for diagnosing any illness or disease. However, it must be noted that **detection of microbes in the CSF does not always indicate a CNS infection**, since impairment of the blood-brain barrier may permit transit of microbes. - NIH

22) Temperature readings of 98.8, is not an accurate gauge of a disease. Testing machines are also faulty. **The human body is not uniform in its temperature**; thus, measurements at different locations can yield varying results. The most accurate way to measure temperature is to take a rectal reading. See China Anal Probe test for Covid.

23) **Immunologic Adjuvant** "Vaccines" never have been and never will be a cure for anything; other than a poison to solicit a reaction, to reduce or increase T-Cells.

24) All Vaccines contain unregulated nano-particles of protein snippets of #whatchamacallit; **nano-organic mercury**; nano aluminum, and other so-called adjuvants. The #1 side effect of all mercury derivatives in all inoculations is "brain damage" - NIH

25) Vaccines, by definition, are designed create a cytokine storm of rogue antibodies in which the innate immune system causes an uncontrolled and excessive release of pro-inflammatory signaling molecules called cytokines. **Cytokine Storms May Be Fueling Some COVID Deaths** - WebMD

26) Trump, Jones, Fauci & NIH claim Hydro-chloro-quine (Hydrogenated Chlorine (Bleach) + Amphetamine (Ine)) + stinky Sulfur is a "cure" for cold virus's. The FDA & NIH and the larger scientific community have warned against the use of the **Hydroxychloroquine to treat COVID-19**, citing ineffectiveness, lack of benefits and risk of heart rhythm problems. **The New England Journal of Medicine and The Lancet could not verify the data on which the results depended**. It's not a Malaria (Hoax) cure either. It simply reduces your T-cells by 40%, reducing the "cases" by 40%, Malaria still ends up killing the patient. **Therapies to decrease CD8 immune activation**

27) The holes in a paper mask are 1000X bigger than genetic material at .02-.20 Microns. HEPA 2.5 is 10-100X bigger than a Virus. **Masks only prevent large particles**, not nano-particles. - NIH. To cover for their original lie that "just wear the mask" - Joe Biden; Experts are now claiming **you need to wear 2 or 3 masks**.

32) Dead Virus's are not Transmittable, despite what you've been told. No one you know died of Coronavirus, that didn't have 5+ pre-existing conditions. Death Counts are considered "Provisional" - CDC. **94% of U.S. COVID-19 deaths** had numerous contributing health problems - CDC. But, the fake news does claim **Lions at zoo's can get Coronavirus**; while the CDC admits that **Some coronaviruses, such as canine and feline coronaviruses, infect only animals** and do not infect people.

- 59) Mainstream news is now lying about every event that happens on the ground, making claims of fact we all

know are false; such as proven voter fraud and the phoney attack on the Capitol. The company **Scytl Secure Electronic Voting, S.A.** (also stylized SCYTL) is a Spanish provider of electronic voting systems and election technology; that counts the votes for the U.S., then returns the results, It has board members from the **Rockefellers, Rothchilds, JP Morgan Chase, Goldman Sachs, Russia & Others.**

60) Covid was a cover for the fascist communists to steal the election using dozens of fraudulent vote counting methods. **Dominion Voting Systems** are a complete fraud. The data is always accessible by the manufacturer.

61) All Presidential Directives, Orders & Mandates are Unconstitutional; the Constitution and Bill of Rights has been CANCELLED! **Despite this lack of constitutional authority...**

62) "Rules" are not "Laws"; in the dictionary. To make you think they are the same, they use the term **Rule of Law** to make it so. A Rule, of a Law, means that government bureaucrats can make-up 1000 rules, to supposedly abide by a particular law.

63) Governments are now making **Sex Rules** where you must not have sex, but masturbate in front of your partner, social distanced and be wearing 3 masks

64) Homeland Security is rolling out **Social Distancing Shock Collars** for the Slaves as a "cure" for Coronavirus. Social Distancing is a mis-nomer and worthless. Nano-particles float in the air like smoke for at least 45 minutes. **Nano-particles from just speech float for 8 minutes.**

FEATURE UPDATE NUKE HOAX: January 19th 2021 Predicted Here with a post in December 2020: They will use a so-called -dirty bomb- with allegedly "radioactive" material and phoney Geiger Counters to scare the public into running into their house. That way, they will be easier to round-up to be sent to a FEMA Camp. There is no Einsteinian "Nuclear Button", nor "Nuclear Trigger", nor "Nuclear Football". Just Hoaxes. [Nuke Hoax Part 1](#) by Tesla Leaks

There's no nukes. The computer that produced the AI scenairo in the movie "War Games" is named what? The "Whopper" WOPR. [Whopper Defined: A Fish Story or Tall Tale](#) Have you seen all the alleged "nuke" videos. Not one thing is damaged in any video. Except for the old Disneyland cartoon one from inside the cartoon house.

And it still doesn't do anything but dust the trees. In YT, you can find the actual pictures of post Nagasaki, Hiroshima of the day after. Everything is still standing, except for the wood homes, and there isn't any material in the Streets, like, nothing happened, except for maybe a firestorming of Operation Thunderclap. Have you seen the conventional 50Kt bombs? It blows up -maybe- 1 block if your lucky. Fat Boy was allegedly 50Kt. Now, how does that blow up all of Hiroshima? Its such a joke. If you watch part 1, there are "streamers" 100 feet from the "blast"; the smoke streamers don't even move! Real scary!! These are the "people" that will do anything to believe they can kill everyone with the push of a button. I can get 99.99999...% to hit the phoney button themselves. On the other hand, if you goto the above video, and read the comments, 100% that have actually -seen the video agree with my contention. 100%. Humanity has no chance. They are too stupid. They are done for. I'll be at the park feeding pigeons.

FEATURE UPDATE NIKOLA TESLA & DONALD TRUMP:

Donald Trump's uncle John G Trump is the guy in the Tesla FBI File, that went through all of Nikola Tesla's 40 Trunks and stole everything. John Trump was the last person with his hands on it. Also, A Trump family member ran the Dept of Alien Property that stole the other half. The DAP was responsible for stealing all the assets of US Japanese people during WW2. Trump made his fortune stealing from all of them. Trump also admitted on the Alex Jones show that his architect was the architect of the WTC (that vaporized). That architect allegedly died in the WTC. Trump did 9/11. Sorry my friend. The truth will set you free. <https://www.youtube.com/watch?v=vryqT3WPYkE>

Question: "they must all be lying"? - True! How could they disappear from History, the guy that invented everything?? In the Tesla Cars the A/C induction motor is Nikola Tesla's from 1888, and so is th DC dynamo in the Prius, the Internal Combustion Engine (Nikola Tesla's Reciprocating Engine, Starter & Spark Plug), the electrolytic battery, gaseous self cooling system for the battery, Jelly Roll (wound coil capacitor), Inverters, Transformer's, Wifi, 5G, Radar, Remote Control, Laser, High beams, Heat pump from the Motor, Regenerative Breaking, Solar Cells, Wireless charging and so on and so forth, are all Nikola Tesla's (at the Patent Office). Each of the Nikola Tesla patents have 100's to 1000's of patent citations from GE to RCA to MIT to Raytheon... The A/C motor and Inpulse DC motor is also used to 1) Smelt Steel at Niagara Falls since 1899 2) Sintering of all materials 3) Manufacturing Synthetic Diamonds 4) Heat Pump 5) Regenerative Breaking and even the 6) Timing used to regulate the motors speed... Edison and Einstein have nothing to do with any of this. Nikola Tesla's generator called the "Ozone Generator" of 1897 uses the Spark Gap from the motor with air or input gasses used to 1) Manufacturer Ozone, Nitrous, Nitrates aka Nitrogen Fixation for Fertilizer, Krypton gas (and other gasses) - NT, and is used by Chevron, EXXON (Energy, Frequency, Vibration, Oxygen, Nitrogen (EXXON)) and others to Manufacture pure Gasoline (and other fuels) called the "Cherry Method" using electricity from the Generator + Tesla Coil with a natural -feeder- gas 3) Also see "Manufacturing unlimited gasses from Steel

Plants" - From the Ozone Generator Patent "uses very little energy, unlimited quantity, little or no maintenance and very low cost".

February 16th 2021 Understanding the >98% efficient, 18,000 RPM, 60 Lb, 500+ HP, Nikola Tesla A/C induction motor of 1888 in the Tesla Model S that lasts Indefinitely. The DC-AC inverter between the battery and motor in the Tesla Model S is >98% efficient. The Nikola Tesla (wound coil capacitor) "jelly roll" battery is >99.9% efficient per full charge cycle. If the battery is charged or motor operated by Nikola Tesla's wireless inductive coil charging by the road itself, it's >98% efficient. The Nikola Tesla long distance A/C or D/C power transmission to the road's induction coils is >95%-98% efficient. That's a total of between 85-90% efficiency round-trip

BREAKING: February 20th 2021 THE HAGUE, Netherlands (AP) 5 Dutch senators late Friday approved hastily drawn up legislation underpinning the country's coronavirus curfew, ensuring that it will remain in force at least until early March despite a court order on Tuesday that it be scrapped. <https://www.statesman.com/story/news/politics/elections/2020/09/08/fact-check-who-really-invented-light-bulb/113860016/> -- See why Edison did not invent the light bulb either; his October 14th 1878 patent is titled "**Improvement in electric lights**", IS NOT "THE" LIGHT BULB. His light bulb took 1000 employees and 10000 experiments to produce a \$845,000 light bulb that only lasted 13 hours. The first million dollar light bulbs were installed at JP Morgan's home; running off of coal generators; that also failed every 6 months. On the other hand, Nikola Tesla invented many types of lights from Arc Lamps, Flash Lamps, LED, Xray lights, UV lights, Neon lights, Thermo-nuclear Incandescent lights, Laser lights, Wireless lights,... Aura camera, Blackbody radiation, Shadow graphs, Timing and Metering lights, so much-so, in his **Wardenclyffe Appeal court case in 1922**, Tesla says in court, under oath "I had a separate room where there was 1000 lights; each describing a scientific phenomena". Those 1000 lights are still missing. By 1892, Nikola Tesla had already patented his "Carbon Button, Incandescent, wireless light" that was 10X more efficient than Edison's. (Cntrl+F search below for previous posts on Thomas Edison and Nikola Tesla's contributions to lighting) at www.teslaleaks.com. Repost: In 1879, Thomas Edison crowns 14 months of testing with an incandescent electric light bulb that lasts 13 hours †.Inside a near-vacuum bulb, it stayed alight for more than half a day. Soon, the lab got a carbon-filament bulb to last 40 hours. It had cost \$40,000 (about \$850,000 in today's money) and taken 1,200 experiments, but was ready at last for a public debut.

Repost: Tesla Currents in Medicine. Tesla's greatest impact on medicine is his invention of a transformer (Tesla coil) for producing high frequency and high voltage currents (Tesla currents). Tesla currents are used in diathermy, as they, while passing through the body, transform electrical energy into a therapeutic heat. In 1891, Tesla passed currents through his own body and was the first to experience their beneficial effects. He kept correspondence on electrotherapy with J. Dugan and S. H. Monell. In 1896, he used high frequency currents and designed an ozone generator for producing ozone, with powerful antiseptic and antibacterial properties. Tesla is famous for his extensive experiments with mechanical vibrations and resonance, examining their effects on the organism and pioneering their use for medical purposes. Tesla also designed an oscillator to relieve fatigue of the leg muscles. It is less known that Tesla's inventions (Tesla coil and wireless remote control) are widely used in modern medical equipment. Apart from this, wireless technology is nowadays widely applied in numerous diagnostic and therapeutic procedures.

February 10th 2021 Agenda 21 vs Agenda 30 + Green Party Hoax vs Tesla Motors & Renewable Energy:

Agenda 21 was prepared in the early 1990's and **Agenda 2030** prepared prior to 2016. Agenda 21 is clearly written for reducing consumption, reducing production and reducing people. It was written in the 1990's at a time when the percentage of electric cars in the U.S. was less than .01%; even decades later, the percentage of wind turbine and solar panel capacity in the U.S. power grid in 2010 was still below .1%. The price of wind or solar in 2010 was 10-20X higher than it is now in 2021. In fact, the word "electric car" does not appear even once

in the Agenda 21 document, and the Agenda 2030 page on electric cars is a (broken-page). In the whole year of 2015, Tesla Motors sold only 50,000 cars; still less than .33% of the market. Barely a threat to electric bicycles; more or less Ford, GM and Saudi Arabia's \$100 Trillion in Oil.

In the same fashion, the Green Party/s do not support electric cars nor most forms of renewable energy; they want to tear all the hydroelectric dams down, ban safe nuclear energy; because of the nuclear bomb danger hoax; and also stop development altogether. When was the last time you've seen Greenpeace protesting a Gas Station? Even Al Gore in 2016 spoke at a conference for Hillary Clinton and said that "Back in 2000, I didn't know anything about the electric cars; renewable energy that we have available today", even as hydro and nuclear have always been cheap base-load power; but he says that today "Renewable energy is now the largest new industry in the history of the world". Even as of January 1st 2016, when Agenda 2030 was completed and presented to the public; they had just completed Cop21 in December 2015. Surely, the writers of Agenda 2030 did not have enough time to have binding commitments, nor did they commit to electric cars or near 100% renewable energy. In fact, if you go to the **United Nations website on electric cars, "It's a blank page"**! They all work for Chevron-Armaco and Exxon. -- Furthermore, none of these groups is promoting truly free, low cost, or wireless, or non-destructive renewable energy nor electric cars nor wireless power. In addition, back in 2012-2013; was no one that could have predicted, other than Tesla Leaks, the complete take over of Tesla electric cars and renewable energy. In fact, Exxon CEO and Trump Secretary of State, Rex Tillerson, Hillary Clinton, Barack Obama and even Al Gore, was promoting "Propane Cars" and "Propane" as a "Bridge Fuel"; because you need to build a million miles of government funded -bridges to get the fuel to your house. In a letter dated 4 days after Nikola Tesla's alleged death on January 11th 1943, the final paragraph in the **Nikola Tesla FBI File** from his assistant stated "Tesla's final works including formula, diagrams and descriptions regarding his experiments in the worldwide wireless transmission of power "Had Been "Completed and Perfected"; so that he could provide power to the world, absolutely for free".

Who told them that?, in advance of them collapsing?? No structural steel building had ever collapsed by fire before!!) Enron would broker this over-capacity, and diminish it elsewhere, to rob you of your free energy.

... Continuing The predicted over-capacity coming from renewable energy and elsewhere; where at least 20-30% of energy goes unused or Negative Prices, (where they pay you to take it) and even over-capacity in coal can be converted to Bitcoins. But unfortunately, it appears it is just a waste of that energy, **"It's very bad that all this energy is being literally wasted in a lottery.** at the same rate that the world is gaining over-capacity in energy. Fortunately, Tesla Leaks has already published a special report on what to do with the 50,000 jobs lost in oil and gas Titled "How to convert all the Gas Stations in the U.S. and turn them into Whore-Houses"! February 1st 2021 Forbes promotes China Anal Swabs; by promoting a Chinese study that allegedly shows that virus lasts longer in the anus; and could be better at testing for non-symptom patients. "There have been cases concerning the coronavirus testing positive in a patient's excrement, but NO EVIDENCE has suggested it had been transmitted through one's digestive system," Yang said.

February 1st 2021 Last week NASA #delayed its plans to award a pair of crewed lunar Lander contracts that were to be awarded under the Trump administration timeline to get to the moon in 2024. "Think back to the late 1990s with the space exploration initiative, to the moon and on to Mars ̄ it got #canceled because the legwork was never done to build the consensus,". Bridenstine's final public appearance as administrator was during a press conference to explain an anomalous test of the huge Boeing SLS rocket designed to return astronauts to the moon. The #aborted demonstration means additional delay, and perhaps will provide an excuse for policymakers to alter the program. As a member of Congress, he pushed for US property rights in space. "In other words, our children and grandchildren won't be able to explore space the way we would like to be able to explore space." BEWARE OF FAKE-NEWS: Beware of sources like CNN that are dis-information, frauds, scammers or pathological liars, or all of the above!! January 31st 2021 CNN does a false story titled, "Tesla's dirty little secret:

Its net profit doesn't come from selling cars"; but by EV credits. They don't protest the fact that coal operators get \$40 Billion per year in subsidy, nor the \$40B a year in subsidy to burn trees as "renewable energy" credits; nor the \$5 Trillion a year in subsidies for oil and gas. So, CNN uses the lowest ranking stock analyst "Gordon Johnson" who's in the bottom 10,000 analyst, to tell more lies about Tesla; and does not reference Ron Baron or Ark Invest; who are both in the top 10 analysts. Then they fail to tell you that the reason Tesla gets EV credits, is because other auto manufacturers refuse to make electric cars, AND in 20 red states, the states that pay EV credits, ban the purchase of Tesla cars in their state. Fake-News CNN continues their lies about Tesla and Nikola Tesla; since thier inception. <https://www.cnn.com/2021/01/31/investing/tesla-profitability/index.html>

BEWARE OF INFO-WHORES: While thats going on, Infowars just had a caller crying about losing coal mine jobs, even after getting \$40B a year in subsidies. Because of course, Alex Jones said "my Dad lobbies to keep the coal plants on". Then, since 2016, Trump added huge tariff's on solar and hydroelectric that melt steel, so they can smelt more steel with metallic coal, that's 100X more radioactive than any Nuclear plant. See how that works. Jones has complained 1000 times how electric cars are powered by coal (which is a lie, because 20 Midwest states the use coal Ban Tesla's), and then he lobbies to keep the coal plants on. Up to 24 Republican states have banned buying a Tesla in their state since 2003. Michigan just tried it again, for 17 years, and just now failed. The biggest buyer of Tesla's is California, which gets a whole .15% from coal power. In addition, Owen Schroyer said "electric cars are 10X more polluting than diesel trucks". Hmm... Tesla's need 1/2 the parts, 1/2 the labor, 1/2 the floor space, no maintenance, and last for 300K-500K miles, since the 2012 Tesla Model S ... = 10X the pollution?? Do you smell horseshit!! Their only goal is to stop Tesla. Yet, Ron Baron yesterday, one of the largest TSLA holders, said on CNBC in 2014 **We will all drive a Tesla in 25 years**; the interviewer asked why?? He said because when it comes to replace the battery, drivetrain and electronics after 300K-1M+ miles, "would only be \$10K" to get another 300K-1M miles. His predictions coincide with Tesla Leaks and gives valid reasons why TSLA will value at \$3T by 2023. To add insult to injury, Jones bitches about China running everyting and Hollywood, yet he wants you to invest into AMC, owned by Chinese Conglomerate. Next, he wants you to buy Silver, which the largest Silver broker is Blackrock; which jacks up the price of solar panels made of Silver... to "help the little guy". <https://www.youtube.com/watch?v=FM4XKnLvd3M>

Leland Anderson, 1992: PREFACE on Nikola Tesla's work with alternating currents and Their Application to Wireless Telegraphy, Telephony and Transmission of Power: An Extended Interview. Leland I. Anderson, Editor
The surfacing of the transcript for this pre-hearing interview with Nikola Tesla by his legal counsel in 1916 resulted from an intensive search in archives of legal firms, some now defunct and others later acquired by contemporary interests. The interview was precipitated by numerous pending court cases as the fledgling radio industry entered a period of fierce competition. Tesla's counsel believed the interview necessary not only in order to prepare for the pressing of his own claims against the Marconi Company, but also to protect his own patent interests when called to give expert-witness testimony in the upcoming litigation foray pitting as adversaries a plethora of new communication companies and their captive radio pioneers. A case prompting this interview, one of dozens to reach judicial review, was "Marconi Wireless Telegraph Company of America v. Atlantic Communication Company, et al." Atlantic owned and operated the large radio station at Sayville, Long Island. The proceedings opened in 1915 with the calling of expert witnesses including Ferdinand Braun and Nikola Tesla. The specter of war had cast its shadow over Europe, and Count George von Arco, who had also been called, was detained because of services to the German Army in the use of asphyxiating gases and other deadly inventions perfected by him. The text of this interview was, of course, never intended for publication. Counsel, concerned primarily with the protection of Tesla's patent interests, ask questions almost exclusively relating to the priority of his patents and their application. Tesla candidly discusses his contenders while presenting a thorough history of his work with alternating currents as applied to wireless transmission. In this document, he describes experimental methods, techniques, and apparatus used in his laboratories at New York City, Colorado Springs, and Long Island. Most of the photographs accompanying this interview are in good condition, but those of schematic and mechanical drawings have suffered some decay with time. These may be the only form of the drawings extant and are reproduced with as much fidelity as possible. For better clarity, five illustrations are reprinted from the February and May, 1913 issues of the Electrical Experimenter magazine, Copyright Gernsback Publications, where they subsequently appeared. These are Figures 66, 67, 79, 81 and 82. <https://teslaresearch.jimdo.com/books-1/nikola-tesla-on-his-work-with-alternating-currents-and-their-application-to-wireless-telegraphy-telephony-and-transmission-of-power-an-extended-interview-leland-i-anderson-editor/>

Repost: The "Splitting Atoms" hoax busted by Tesla Leaks, Nikola Tesla & by Definition: Nuclear "Transmutation" of Elements is not splitting atoms. In 1932, Lithium 7, using only 700,000 Volts, was transmuted to Helium and was afterwards called splitting atoms. "No atoms were ever split" – Nikola Tesla — Smashing Atoms? Tesla also differed with Einstein and the quantum physicists in his view of the structure of the elementary particles and the possible consequences caused by the smashing of atoms. I have disintegrated atoms in my experiments with a high potential vacuum tube operat[ing] it with pressures ranging from 4,000,000 to 18,000,000 million volts . But as to atomic energy, my experimental observations have shown that the process of disintegration is not accompanied by a liberation of such energy as might be expected from present theories. 14 https://facebook.com/story.php?story_fb_id=1918636558449165&id=750861428384951/

March 2019 The capacity of nanosilver (Ag nanoparticles) to destroy infectious micro-organisms makes it one of the MOST POWERFUL antimicrobial agents, an attractive feature against super-bugs resistant to antibiotics. First, Nano silver is manufactured and Ionized with a Tesla Coil. Second, do some Google searches, but the general idea is the nano Silver is small enough to enter the pathogens; Preferably in the presence of electricity; the silver becomes Oxidized, killing the pathogens. The type of silver to use depends on the pathogens. Size, Ppm and structure of the particles determine what pathogens it will kill.

Nikola Tesla on Wireless Power 1) Standing Waves 2} 1/4 Wavelength Resonance 3) Nodes 4) Chemical Reactions 5) Plasma Reactions 6) Fusion –<https://facebook.com/photo.php?fbid=196371705360552&id=100049631701504&st=14> — Spiral coils generate very powerful electromagnetic fields by operating with two different but simultaneous resonant behaviors. Quarter-wave resonance is established by adjusting the frequency (and wavelength) of a radiofrequency (RF) voltage source until the length of the spiral conductor is equal to of the wavelength of the alternating voltage. This generates an electromagnetic standing wave with at least one peak node and at least one null node. Inductive-capacitive (L/C) resonance is established by optimizing the thickness and width of the wire ribbon used to make the spiral coil. When inductance and capacitance are balanced, the current response will synchronize with the voltage input, creating in-phase behavior, minimal total impedance, and maximal power output. If two such coils are placed near each other, they will create an extremely powerful electromagnetic field between them, which can promote chemical and plasma reactions involving charged particles such as ions or plasma particles, possibly including nuclear fusion reactions. Japan was "Fire Stormed" just like German cities using "Operation Thunderclap"; proposed by Nikola Tesla in 1915 in "Ingenious Plans for National Defense". 3) There is no radiation in Hiroshima nor Nagasaki, nor near Las Vegas 4) E DOES NOT EQUAL M (E not equal to M). Energy is not Matter nor Mass; it's an Invalid-Relationship- Nikola Tesla 4a) Nikola Tesla's physics are in direct opposition to Einsteinian "Theories"; by Tesla describing the Energy and Matter situation by saying "There is no Energy in Matter, that doesn't come from it's Environment" Plutonium nor Uranium have any energy in-of-themselves. They need energy input from the Sun or some secondary rays. 5) Bikini Atoll was not a Nuke, it was Underwater TNT designed to create a Nikola Tesla "Tidal Wave for Defense" 6) What about the Movies and Video's? Answer: They are all conventional munitions, buried TNT, fuel oil, magnesium flashes, composite imagery and cartoons. No damage is done in any of the vidoe's, not even to streamers or clouds. You've never "Seen" a Nuke since on TV in 1945, and you never will>>> Even Einstein believed Nuke's that blow up cities with radiation would be Impossible <https://www.youtube.com/watch?v=g8w2nRPMInU> — Nikola Tesla's proposed Operation Thunderclap 1915 <https://www.youtube.com/watch?v=prQCAOZzsYg> — Nikola Tesla's Tidal Wave for Defense used at Bikini Atoll <https://teslauniverse.com/nikola-tesla/articles/teslas-tidal-wave-make-war-impossible> — More on Debunking Einstein and the Nuke Hoax by Tesla Leaks in 2015 and 2017: <https://www.facebook.com/nikolateslainvestigation/posts/tesla-leaks-original-post-in-debunking-einstein-including-faster-than-light-inst/2296284360696588/> — Tesla vs Einstein by Tesla Leaks on January 1st 2020: <https://facebook.com/notes/understanding-teslas-stationary-waves-and-scalar-energy/tesla-vs-einstein/914566628941148/>

Nikola Tesla U.S Patent 493,776 is MISSING for an Incandescent Electric Light referred to in U.S Patent #5162094 for a Fusion Power Genrating System of May 3rd 1991. <https://patents.google.com/patent/US493776> — Patent office mis-names and replaces the Nikola Tesla Patent #595,927 as a “Francis W”. Fusion power generating system <https://patents.google.com/patent/US5162094A/en> — Achieving sustained fusion conditions allowing essentially 100% utilization of fuel with either the D-T or D-He3 reaction at the magnetic convergent point in the drift region of the present invention will require a high density of ions in addition to high relative energy between particles. As the geometry of the magnetic focus, fusion region of the present invention is a mirror image of the ion source geometry, it is, of course, important that the ion source geometry have as small dimensions as possible to produce the highest concentration of input nuclei at the magnetic convergent point. One method of achieving this goal is to use a modification of an invention by the American inventor, Nicola Tesla (U.S. Pat. No. 493,776, Incandescent Electric Light, 1892). In this invention Tesla showed how a small button of refractory material such as diamond could be heated to incandescent temperatures by allowing the material to be bombarded by ions as caused by the application of a high voltage, high frequency excitation to the refractory material. One embodiment of the present invention makes use of Tesla’s Incandescent Electric Light by adding a few thousands of an inch diameter hole through the refractory material button. The added hole allows the passage of the input gases as required for the fusion reaction. As the gases are passing though the hole in the center of the button, they are heated to a high temperature that can be in the range of 5,000? F. as they make contact with the inner walls of the refractory material (diamond, for example). Upon leaving the hole exit, the already thermally excited molecules of gas are then totally ionized by the high intensity, RF field in combination with the concentrated ion bombardment created by the RF field. The net result is a highly concentrated ion source insuring that the ion concentration at the magnetic focused point of the present invention will be sufficient for a high probability of fusion reactions occurring.

— RECREATING THE POWER OF THE SUN WITH FUSION The New York Times, January 1982 – In the fission

process, very substantial amounts of radioactive material are also produced. Fusion plants, on the other hand, which will probably be fired in large part by hydrogen obtained from the plentiful water of the sea. The real problem has been to keep the extremely hot electrically charged gases confined long enough so that their atomic nuclei can collide. The main high-temperature fusion device now operating at Princeton – the Poloidal Divertor Experiment, or P.D.X. toroidal plasma furnace. They are occurring, Furth says, as a cold mixture of deuterium and hydrogen is injected, and the heating process begins. Tokamak Fusion Test Reactor, or T.F.T.R. by Sakharov and Tamm had set forth the basic concept of the tokamak. Sakharov, in a part of the 1950 paper, proposed that researchers make use of the fact that a heated plasma is an excellent conductor of electricity. At a temperature of 100 million degrees centigrade, it has a conductivity, in fact, about 30 times greater than copper. Princeton astrophysicist, Lyman Spitzer Jr., was grappling with the same problems and came up with a device known as the Model-A Stellarator, built at Princeton in 1952. He produced the poloidal magnetic field externally by wrapping wires outside the doughnut, and passing an electric current through the wires. In the tokamak, the plasma itself functions as the "wire." Once the cold mixture of hydrogen and deuterium has been injected into the Princeton P.D.X., a bolt of lightning is shot through it – a current with a power level roughly equivalent to the electricity being used at that moment by the entire town of Princeton. As lightning rapidly heats the atmosphere in a storm, the pulse quickly heats the gas in the tokamak, propelling its electrons around this incredibly fast nuclear racetrack. The gas hits 10 million degrees in less than one-tenth of a second. Dr. Kees Bol and the P.D.X. group he heads spent much of last winter playing the tokamak almost the way one plays a church organ. "How you control the heat and density of the plasma is an art," Bol says. "We added two large injectors of deuterium atoms and induced more current in the plasma. Programming the current the right way turns out to make a big difference. It seems impossible at first, but that doesn't mean it can't be done." First, a working fusion reactor will produce material very much less radioactive than, say, a fission breeder reactor. Second, one can choose the type of material it produces. When nuclear fusions can be made to occur in a sufficiently dense plasma for long enough periods of time at high enough temperatures, they will supply enough energy to maintain those temperatures without requiring additional heating from any outside source. At that point, what is called "ignition" occurs. (The plasma ignites the way a log, for example, burns of its own accord once it is sufficiently heated; the ignited log produces much more energy than was required to heat it to ignition.) And while the plasma stays hot, fusions will keep occurring as long as small amounts of deuterium or a tritiumdeuterium mixture are added. Fusion reactions in a mixture of deuterium and tritium occur 10 times faster than with pure deuterium and at a much lower temperature – about 60 million degrees is good enough for ignition. But there are several drawbacks to deuterium-tritium. Tritium is radioactive; it decays in about 12 years. Because natural tritium has all decayed since it was first created millions of years ago, virtually none now exists. Thus, tritium must be manufactured. According to a plan developed by the Department of Energy, there would have been a national center by 1984 using the Tokamak design. The total cost of all of this was estimated by the Energy Department at about \$12 billion. Neutron shielding is not a difficult engineering problem, since many common substances, such as boron, absorb neutrons like a sponge. Tritium, while radioactive, has a low activity. The electron emitted when tritium decays is a low-energy electron that cannot even penetrate the skin. And only small amounts will be used – perhaps 20 pounds yearly per billion watts of electricity produced. The blanket, however, will become radioactive, and it is estimated that, in a billion-watt fusion reactor, something like 150 cubic yards of radioactive material will have to be disposed of or recycled each year. The volume is comparable to the high-level radioactive wastes from a fission plant. But the advantage is that the shielding material can be selected to make the radioactivity weaker and more short-lived. In a fission reactor one has no choice. Nature has chosen the fission products, such as krypton or strontium, and some of these must be safely buried for thousands of years. But Uranium can be stretched in the future only by using breeder reactors to make new fuel. The blanket will contain lithium. When a neutron hits a lithium nucleus, it can react to become helium and tritium. Hence tritium fuel can be manufactured in the blanket as the reactor works. The machine produces its own fuel as it goes along. The blanket must be kept "cool" – perhaps at a temperature of 400 to 500 degrees – so a coolant will be circulated through it. In the process, the coolant itself will be heated and it is this heat that will be used to make steam – which in turn will run the generators that will produce electricity. Essentially all of the expense of fusion reactors will be in the construction of the machine. Less than 10 percent is expected to go into fuel and operations. Work on controlled fusion in China goes back as far as 1955, when Chairman Mao himself identified it as potentially profitable research. Experimentation began on magnetic-mirror

machines and, eventually, tokamaks with the endorsement of Zhou Enlai. Wind power sounds nice, too – until one looks at the numbers. Assuming an average wind speed of 20 miles an hour – a hefty wind – it would take some 50,000 large windmills (Today, just 200 10MW Turbines) to equal the output of a one-billion-watt power station – one prospective fusion plant. Hydroelectric power might be expanded somewhat by damming every stream in sight. But is this something environmentally sensitive people really want to do? But the notion that solar electricity is “low technology” or a relatively simple “cottage industry” is really nonsense. Most responsible people believe that in the year 2000 solar electricity will account for only about 2 percent (1%) of the total consumed. Still, as Harold Furth points out, there is a parallel between the transition from traditional solar power to fusion and the transition from food gathering to agriculture. At first, mankind was satisfied to collect roots and berries; then we gradually learned to grow them at will. If, despite the obstacles, fusion power can be made practical, we will no longer be out trying to collect power when and where we can find it. We will have learned, in effect, to grow it at will. We will be capable of making limitless amounts of electricity from the waters of the earth’s oceans. And it is surely possible that this will be every bit as significant to the cultures of the world as farming and industrialization has been. <https://nytimes.com/1982/01/03/magazine/recreating-the-power-of-the-sun.html> — Materials for nuclear fusion: how do you confine a sun to a box? <https://youtube.com/watch?v=d0uLFG3hQYw> — The first glimmer of a nuclear Sun: radium and solar energy (1903) The phenomenon of radioactivity was first discovered** serendipitously in 1896 by Henri Becquerel, who noted that photographic plates were darkened in the presence of uranium. Nikola Tesla Popular Science Monthly: November 1928 “A famous prophet of science looks into the future” — (WIRELESS POWER) By 1931 he told me, his “World-system” for transmission of wireless power through the earth should be in commercial operation. Today he is ready to build a new and larger plant. (TELEVISION) This plant was also to broadcast speech, and pictures by a system of daylight television without moving devices outlined by him in 1893. “Contrary to popular opinion, which has identified my “Magnifying Transmitter” with thunder and lightning,” Dr. Tesla said, “it operates in silence. There is no halo of escaping electric flames, or other visible evidence of activity” except that a person within a hundred feet of the tower will notice small sparks, prickling of the skin, and bristling of the hair.” (RADIO) But thirty-five years ago people decried as impossible Tesla’s prophecy before scientific societies that ships in distress at sea would call for help by wireless apparatus. It was characterized as “inventive lunacy.” Many of these unbelievers lived to see wireless summon rescuers to lost explorers stranded on an Arctic ice cake. <https://teslauniverse.com/nikola-tesla/articles/famous-prophet-science-looks-future> — Nikola Tesla gave the first public demonstration of (continuous wave) radio in St. Louis on March 1, 1893, although he had presented his work prior to this behind closed doors. Tesla first demonstrated wireless transmissions during a lecture in 1891. <https://edn.com/electronics-blogs/edn-moments/4408090/Tesla-gives-1st-public-demonstration-of-radio-March-1-1893> — (DRONES) Thirty years ago people thought Tesla was indulging in a wild fancy when he built a model for a crewless vessel. Yet today the British Navy is experimenting with H.M.S. Centurion, a full-size warship without a crew, controlled entirely by wireless. Germany is doing the same with the former battleship Zechingen. The Robot Battleship (1930) <https://youtube.com/watch?v=C3ujaOWdD9A> — (ROCKET ENGINE) (FLUID DYNAMICS) (OZONE/HYDROGEN/JET FUEL GENERATOR) Twenty years ago, in 1909, when Tesla designed an automobile to be propelled on water, land, or through the air by explosive jets from rockets, men who otherwise respected his genius thought he had gone crazy. Today, in Germany, rocket cars have sped 156 miles an hour in trials; and the principle is to be applied to air machines. (TESLA TURBINE) [New York Herald, February 25, 1917 ELECTRIC DRIVE FOR BATTLE SHIPS by Nikola Tesla <http://tfcbooks.com/tesla/1917-02-25.htm%5D> Houses will be lighted and powered by wireless, as will be airplanes and other vehicles on land and sea. You will be able to go anywhere, desert or mountain-top, valley or farm, and set up a compact equipment, small enough to be carried in a suitcase, that will give you heat to cook with and light to read by. Flivver airplanes will buzz directly upward and dart across country at many miles a minute. Jet-driven airships will cross oceans, but Tesla draws the line at MOON (hoax) rockets. He invented the “Tesla coil” or “Tesla oscillation transformer.” Today every wireless transmitter and receiver embodies this great principle, which has also been put to innumerable other uses in science and industry. With it, he turned ordinary electricity into crackling lightning of millions of volts. Noises of

thunderous discharges smote the ears of visitors to his Colorado Springs, Colo., wireless plant erected early in 1899; they could even be heard in Cripple Creek, Colo., thirteen miles away! It was there that Dr. Tesla carried out his scheme of sending power by wireless through the earth. No "wireless" such as we know today as radio, was this. He transmitted, not radio waves through the air, mostly wasted, but electric currents through the ground. By this method, he told me, he transmitted enough power around the earth to light several hundred incandescent lamps, and proved that power in industrial amounts could be transmitted to any distance with an efficiency as high as ninety-nine and a half percent. (VTOL) Besides his world power scheme, Dr. Tesla says he is devoting his time chiefly to his vertically rising flying machine. This aerial flivver is to weigh less than 200 pounds, and to occupy no more space than a seven-foot cube. It is to rise to a great height at a rate of from one to two miles a minute, and may attain a horizontal speed as high as 400 miles an hour, power being supplied by an exceedingly light oil-burning motor, a modification of a steam turbine Tesla invented. An all-metal framework and the absence of gasoline guard against fire hazard. Additional safety is to be attained by a parachute of new construction. (WIRELESS LIGHTS) Equally spectacular was his demonstration of a wireless lamp, at his Grand Street laboratory in New York City. At three o'clock one morning, when he and his workmen were ready to quit for the night, Tesla decided that a certain high-frequency generator he had been constructing was ready for the test of a new lamp that would light without wires. He sent his workmen outside while he made ready the apparatus. All that remained was to close a switch. (ORDER OF THE FLAMING SWORD) (LIGHT SABER) When the workmen returned, Tesla strode to the middle of the laboratory. In each hand he held a long glass tube, exhausted of air. "If my theory is correct," he told his assistants, "when the switch is thrown in, these tubes will become swords of fire. Darken the room and close the switch." (SPEEDOMETER) Tesla's inventions cover many fields, including even an automobile speedometer based on a unique principle, in use today on high-priced cars, and a new pocket-size revolution counter soon to be seen. (PSCYOTRONICS) (ULTRASOUND) He even delved into the super-speed "sound" vibrations, recently produced in the laboratory of Alfred L. Loomis, at Tuxedo Park, N. Y., which kill small animals. (WATER PURIFICATION) He once built an apparatus, intended to sterilize water, which produced vibrations powerful enough to paralyze the hand, plunged in a tank of liquid. This discussion of tremendous power suggested the possibility of harnessing atomic energy. (ATOMIC ENERGY) "The scheme is worse than that of a perpetual motion machine" for the latter will almost work!" he exclaimed. "A motor driven by atomic power is unrational because it would take far more energy to break up an atom's structure than can be recovered in more useful work." On the whole subject of matter, in fact, Dr. Tesla holds views that are startlingly original. He disagrees with the accepted atomic theory of matter, and does not believe in the existence of an "electron" as pictured by science" or, he maintains, if it can exist at all, it does so only in perfect vacuum. "To account for its apparently small mass, science conceives the electron as a hollow sphere, a sort of bubble," Tesla says. "Now, a bubble can exist in such a medium as a gas or liquid because its internal pressure is not altered by deformation. But if, as supposed, the internal pressure of an electron is due to the repulsion of electric masses, the slightest conceivable deformation must result in the destruction of the bubble!" (ELECTRON DEBUNKED) "Just to mention another improbability, the force tending to tear an electron apart is, in pounds per square inch, represented by the staggering figure of 256,899 followed by twenty-one zeros" and this is 513,798,000,000,000,000,000 times greater than the tension that tungsten wire can withstand! And yet it does not burst! Not even when it is hurled against an obstacle with a speed hundreds of thousands times greater than that of a bullet! And "more widely interesting in this day of radio" this strange, many-sided man clings to the opinion he expressed in his scientific investigations published from 1896-1898, that the source of all rays we know is always a stream of tangible particles or "corpuscles," (LIGHT PARTICLES) rather than waves or vibrations. Even before the discovery of radium, Tesla expressed his belief that radioactive rays were of this sort, a view ridiculed at that time. When radium was discovered it was found actually to emit particles of matter" flying nuclei of helium atoms, called "alpha" rays. (RADIUM) Tesla has maintained ever since that radium is not a generator but a transformer of energy, the emanations being caused by cosmic rays of immense power (TESLA PULSE VACUUM TUBE LIGHT) capable of penetrating all obstacles however thick. The existence of this radiation" which, he says, should not be confounded with the comparatively very feeble "cosmic rays" (IONOSPHERE) observed more recently" he has proved by mathematical theory agreeing closely with experiment. These conclusions Tesla has drawn from experiments with a remarkable vacuum tube of his own invention, with a single electrode, operated at millions of volts. I asked Tesla what part of his life work lay closest to his heart. It was not the induction motor, today the basis of industries in which billions of dollars are invested

all over the world. Instead, it was the discovery of the principle that preceded the induction motor ? the ? rotating magnetic field.? It was not only a valuable discovery, capable of extensive practical applications. It was a revelation of new forces and new phenomena unknown to science before. ?No,? Dr. Tesla said with some feeling, ?I would not give my rotating field discovery for a thousand inventions, however valuable, designed merely as mechanical contraptions to deceive the eye and the ear. A thousand years hence, the telephone and the motion picture camera may be obsolete, but the principle of the rotating magnetic field will remain a vital, living thing for all time to come.?

To his credit, Tesla invented Photoshop in 1899 with his composite picture of him sitting there inside his Colorado Springs Lab. Either way, the Tyrannasaur bone, rock, fossil fuel tooth looking thing you have might catch \$10M on eBay. The 800,000 documents, newspapers, articles, Library of Congress and 900 patents and Inventions at the Tesla Museum; much available online to find in 5 seconds is "made up"? You must have also worked for the 13 companies Doctor Tesla owned, have his 600 missing patents and Inventions (900 FBI File) and read the 400,000 documents locked up at the Tesla Museum. You also must have worked at the Tesla society in 1915 during WW1, worked at his Museum that was bombed in WW2 and worked at the one that Bill Clinton bombed in 1999. It must have been a miracle that you survived the 10,000 tons of depleted Uranium NATO dropped on Serbia. Was it you that compiled the Colorado Springs Experiments Notes in 1955, published in 1978, from events that took place in 1899, or is it 1889 according Tesla at his Wardenclyffe appeal case. You must be sure "he had it all in his head". Of course it also helps to have the other 400,000 documents, 40 trunk's, 30 bundles, a safe and a multi-decade resistance box you were able to impossibly crack. Instead it was people who called themselves "government officials" and John G Trump who admitted reviewing the information in Tesla's NY storage unit. While you were there, you must have seen the two pictures of everything the FBI said they took. Sava Kosanovich told the FBI under oath that the 200 page notebook Tesla was writing before his death (hoax), was also missing. You must have snatched that too! Even beyond that, you must have gotten access to Einstein's brain held in (according to Tesla, non destructive) cryogenic freezing at CERN. And of course you are aware that Tesla has the earliest patent for superconductivity "Means for increasing electrical intensity using cold temperature" in 1900. As you know, CERN gets it's superconductive gasses like Krypton using a Westinghouse Nuclear Power Plant or Tesla's Electrical method using his 1897 Patent and Apparatus for producing Ozone and other gasses. The point being, with Einstein's brain you can figure out Nuclear Power and the Nuclear Bomb Hoax, since, according to UN and US law, Nuclear is considered "classified on birth". It's a benefit if you can speak and write 13 languages, because his Serbian handwriting is terrible. They should have brought you in to analyze the Tesla papers, instead of the FBI bringing in Deforest. If you we're right there like his Assistants Marconi, Hammond, Kolman Tzito Father and Son, Lowenstein, Scherff, Hettinger or agents Spanel & Fitzgerald, you might have seen it all. Were you the get away driver in the movie "Fragments from Olympus" that tells the story of real-life FBI agents P. E Foxworth and Dennis Haberfeld, who died on January 15, 1943 during the posthumus investigation of Nikola Tesla's property? The mission described by FBI documents as being part of "a secret mission of critical importance"; the two were killed on their way to General Eisenhower when their military transport mysteriously crashed. The cause of the crash was never ascertained. It must have been the faulty Autonomous driving technology that crashed the 2 truck loads of Tesla's effects. Like other great minds study

scientists before them, it's also great that you have the 1000 points of lights and tubes that Tesla said he had in a separate room on the Wardenclyffe property up until 1907, under oath in his 1922 Supreme Court foreclosure appeals case. Each light he said "described a unique scientific discovery". We're all glad you have that, because, it's been missing since mentioned in the Wardenclyffe appeal. Since Fitzgerald told the FBI director in 1945 that because the Russians had access to the "Entire Tesla Collection" behind the Iron Curtain, and because of experiments going on at Hill AFB, that he was soliciting Army Intelligence and "Wealthy Backers" like the Ford Foundation, to accumulate all they can on Tesla's effects and turn them into "Idea Factories". You being a double-agent for the Army and the Air Force, and a Russian agent would be the coup de gras; you might even get to work for Alex Jones at Infowars. If you could return those audio recordings of Tesla's real voice and videos of the real person, since they are also ALL missing, that would be great. If you could just fallaciously go back in time like Einstein said, then you could have asked Tesla's financier in Radio, Peck, his financiers John Astor & JP Morgan, his last co-designer in Wardenclyffe, the famous Stanford White, friend witness and politician Mark Twain, or even President William McKinley who was shot immediately after touring the Westinghouse, Tesla Hydro-electric plant at Niagara Falls; what they knew about Wireless Power and the Death Ray, because they were all assassinated. Within the same year, Nikola Tesla told JP Morgan that the Niagara electric company already approved Tesla using 10,000 horsepower from the Niagara Falls generators for wireless power. Tesla even offered the electric company stock in his company. Tesla told Morgan that he, Tesla, had secured all worldwide rights to his and the only practical method to generate, "Trillions" of simultaneous, secure, pulse-width and pulse-position modulated (Terrestrial GPS) radio signals. By March 8th 1907, prior to the 1907 stock market crash that bankrupt Westinghouse & Tesla, Tesla secured "all" patents on what he calls "Tuned Lightening", the processes, appliances, generation, transmission, transformation, distribution, direction, storage, regulation, control and economic utilization. Two months later after the stock market crash in 1907, the patent office accepted his refiling of his patent for the Wardenclyffe Tower Structure, but did not approve the patent until 1914. This delay gave time for the Federal Reserve Act to be passed to create a Fiat money system, and when WW1 started. Then, in WW1, the supposed entire world attacked Tesla's hometown, Serbia. But, you knew all that! Granted, a few years earlier, Tesla did tell JP Morgan that if he did not provide the next \$250,000 or more to finish Wardenclyffe that you, JP Morgan would "Never see that machinery" (the final pieces that included the high tension UV generator to be placed in the Wardenclyffe Tower Cupola and Spark-Gap controls within the Tower structure). Since Tesla mentioned to Morgan that he, Tesla, was responsible for more than \$6 Trillion in sales to industry based on his inventions, that this venture would work as sure as "my name is Tesla". But later in Tesla's 1919 Autobiography in Electrical Experimenter, he wanted to dispell a rumor in the press about the destruction of his tower, Wardenclyffe, he said "They were building more of them". In the same Autobiography he states "every one of my Inventions prior to 1919 worked 100% as he prescribed". Fortunately, in Tesla's last publication in the 1920 Electrical Experimenter, Tesla gives credit to John Hays Hammond for his June 22nd 1917 patent which he says "makes wireleses power possible". Days after Tesla dies, in a letter to the FBI director, Tesla tells Fitzgerald that his experiments in conjunction to the transmission of electrical power had been "completed and perfected" wireless power transmission and that the main goal of Tesla's latest works was to provide electricity to the world absolutely for free. Is Tesla lying? If you think so, prove it up! (Now you're looking for the secret, but you won't find it, because of course, you're not really looking, you don't want to work it out, ... You want to be Fooled! — Ending sequence in The Prestige) <https://youtu.be/GZc3EsElqeA>

Fractional distillation of Krypton: Why the new Superman movie is named "Krypton" and not the fictitious element "Kryptonite": Scientific American Feb. 2nd, 1901 Tesla's Wireless Light by Nikola Tesla <https://teslauniverse.com/.../articles/teslas-wireless-light> – Nikola Tesla states that new illuminants, specifically Krypton gas extracted in 1898, has the best economy, hygenic properties and is the closest to pure white daylight, like Krypton, that has ever been reached. Krypton is the best, self illuminating, superconductive gas. His wireless light accomplishes the most efficient method to separate the de-electric currents from his high frequency, high tension generators, creating high tension radiant streams using Uranium glass, today they produce Tritiated glass as a cheap alternative to contain the negative charges along a virtual path. The Krypton, or Radon are most conductive to "electro-statically induced rays" (1) or positive charges. The natural inductance between these two elements allows for a Krypton bulb to light up with just 1 Volt. The bulb in his hand would have a Krypton, Hydrogen spark-gap transformer, to transform the 1 Volt coming from the atmosphere or ground, in a one wire return system, to 10 Volts and light up the Krypton gas, wirelessly. <https://facebook.com/groups/750861428384951/permalink/1057545607716530/> This technology also includes phosphorescent paint and metallic wallpaper for wireless power transmission. The Shanghai Museum and Belgrade Museum have cataloged "1000 Inventions" of Nikola Tesla's, not including inventions that appeared later based on his observed laws like the "Ionosphere" or Arts Of "Telegeodynamics" nor "patents I did not file" on new physics like "Teleforce". Patents he did not file after his 1896 lab fire. Patent citations to the existing Tesla patents. Patents involved with "Tuned Lightning".

"Perhaps it is better in this present world of ours that a revolutionary idea or invention instead of being helped and patted, be hampered and ill-treated in its adolescence - by want of means, by selfish interest, pedantry, stupidity and ignorance; that it be attacked and stifled; that it pass through bitter trials and tribulations, through the heartless strife of commercial existence. So do we get our light. So all that was great in the past was ridiculed, condemned, combated, suppressed - only to emerge all the more powerfully, all the more triumphantly from the struggle."
