VirtualU's downloadable documents allow you to search and review all the personal data and public records that is available about you online, captured by governments, companies, Apps and even by Doxing. The downloadable documents and tutorials show you how to remove your personal information from the White-pages, people search databases, such as Pipl, public records databases, such as Beenverified, court records and even arrest records from Mugshots websites. You can make the requests on your own or we can help you send the legaleze take down letters and the removal or opt out requests to request to remove your data from their database or their website. After the requests are sent, you get email responses from each site to confirm if the records have been removed. If you need assistance with the removal requests, we will provide the service to you. For help or questions email us at virtualunet@gmail.com or call 424-249-0271.

Who is getting your data:

Data brokers collect and resell records with your information; your "Virtual You". Brokers and websites store data about nearly every consumer and every website visit. Corporations and websites are getting your data such as purchase behavior, financial habits, personal interests and consumer information such as biometrics and medical records are a valuable commodity. Hackers and data leaks of personal information can lead to Doxing, Stalkers and Reputation Risk.

Who's selling your data:

Data brokers, Apps, Shops, Hospitals, Insurance Companies and Government are selling your data to any and all bidders. Data aggregators like Cambridge Analytica & Palantir sell your social media preferences.

Add the [VirtualU Personal DIY Kit](#) to have a VirtualU Guru send letters and requests on your behalf.

Add the [VirtualU Live, 24/7 Monitoring App](#) to monitor for the re-appearance of your public records or changes to your social media or business profiles.
