MIDWEST SALE INFORMATION

Welcome,

On behalf of all the consignors we invite you to the 32nd Annual Midwest Regional Spring Braunvieh Sale at the Springfield Livestock Marketing Center. The consignors have brought a great group of Braunvieh cattle to the sale with a variety of open heifers, bred heifers, spring and fall bred cows and pairs. Some of the spring bred should be pairs by sale time. We also have 4 semen lots.

The cattle will be on display Friday June 2nd in the afternoon and on Saturday June 3rd in the morning before the sale. Please feel free to call the consignors about their cattle and ask questions.

The café will be open on Saturday for lunch. When you register to bid you will receive a coupon for lunch.

We want to say thank you to all the consignors for bringing some of their great cattle to this sale and to all the people that help make this sale happen each year. Let us know if we can do anything to help make your trip a success. A supplement sheet with sale order and any updated information not shown in the catalog will be available Saturday morning at the sale and online at missouribraunvieh.com

We look forward to seeing all of you at the sale.

Braunvieh Performance Info & EPDs

CED EPD - Predicts the ease the progeny of the individual will be born. Higher positive number indicates easier calving.

BW, WW & YW EPD - A higher number indicates heavier weights in each category.

MILK EPD - The part of weaning weight that is due to the dam's milking ability. Higher number indicates a heavier milking dam.

TM EPD - Reflects growth to weaning age plus milk to weaning time. Calculated by adding 1/2 of WW + MM = M&G.

CEM EPD - Indicates the ability of a sire's or dam's daughters to have a calf at two years of age. Higher positive numbers indicate easier calving for the daughter of the individual.

API INDEX - The All Purpose Index evaluates sires for use on the entire cow herd with a portion of heifers retained for replacements and the remaining heifers and steers put on feed. The API uses traits such as Stayability, Calf Survival, Cowherd Intake, Heifer Pregnancy %, Marbling, Carcass Weight, Feedlot Intake, Weaning Weight, Yield Grade, Salvage Value, and Milk to provide a balanced Index \$ Value. Higher numbers desirable.

Birth WT. - Actual birth weights are given.

WEANING WT. - 205-day adjusted weaning weights and ratios are given if available.
