PARTNERSHIP MEANS DOING MORE TOGETHER

About Us

More than just a support system – we are your partners in success. Our client-focused diabetic practice solutions and turnkey management services are designed to ensure compliance and the best care for your diabetic patients, while driving your bottom line to new heights - *without having to add more patients to your panel.*

Diagnostics

Close care gaps with patented & AI-driven screening tests essential for early diagnosis and appropriate treatment.

Treatments

Comprehensive point-of-care diabetic therapies create a healthier future for patients while your practice thrives.

Pain Management

Reduce discomfort and improve quality of life with our comprehensive pain management modality for diabetic patients.

Complimentary Ancillaries

Our no-cost ancillary services recover lost revenue and drive profits by further leveraging non-skilled staff to improve diabetes patient management.

CULTIVATING THRIVING PRACTICES TOGETHER

Bridge care gaps using patented, AI-powered screening tests for timely diagnoses and effective treatment. Maximize efficiency with user-friendly tools that empower your staff -- saving time, enhancing results, and averting severe diabetic complications. Covered by Medicare, with minimal upfront start-up cost.

Diagnostic Modalities

Sudomotor Function and Autonomic Functional Diagnosis

Simplify and optimize clinical decision-making with our unique and patented medical device data system that performs a non-invasive assessment of the vascular and autonomic nervous system. Regular monitoring enables precise adjustments to diabetes management strategies, optimizing outcomes:

- Easily distinguish between vascular and neuropathic symptoms
- Gain crucial insights for early diagnosis and appropriate treatment
- Testing time is 15 minutes
- Administered by trained office staff

Rapid Ophthalmological Diagnostics

Experience our patient-centered A.I. retinal imaging breakthrough designed for primary care. Detect diabetic retinopathy and close care gaps, improve HEDIS®, STAR, and HCC risk factors:

- Quick 6-8 minute diabetic retinal screenings during routine visits
- Actionable results in just 60 seconds
- Elevate patient outcomes and enhance practice quality scores
- Administered by trained office staff

TIMELY CARE CHANGES LIVES

We believe making a difference means offering the right care at the right time. By providing turnkey comprehensive diabetic therapies at the point of care, we streamline personalized interventions -- reducing delays and enhancing health outcomes, while also bolstering the success of your practice.

Treatment Modalities

Advanced Wound Care Platform

Medical practices now have a turnkey solution that simplifies in-office and mobile wound care program, offering the industry's most advanced wound healing portfolio at the point of care. Our user-friendly and AI-driven wound analysis platform takes the guesswork out of delivering advanced wound care therapies.

- Reduce infections, hospital readmissions, amputations - save lives.
- Speed healing times with CTPs
- Comprehensive clinical and billing platform ensures compliant wound care documentation and reimbursement (exceeds CMS/LCD requirements)
- Substantial revenue increase with product replacement guarantee

Integrated Diabetic Vein Solutions

Enhance patient services and your bottom line with integrated diabetic vein therapies for venous varicosities & telangiectasias. Address underlying venous medical issues while meeting patient aesthetic goals.

- On-site tech ensures efficient use of provider's time
- Comprehensive diabetic vein therapy experience
- Affordable state-of-the-art technology

MAKING A DIFFERENCE TOGETHER

Our patient-centric solution harnesses transcutaneous electrical nerve stimulation therapy for managing chronic diabetic pain *without medications*. Our at-home rental program is covered by Medicare and empowers patients to alleviate pain, enhance comfort, and elevate their quality of life.

Pain Management

PainEase TENS Pro: Diabetic Pain Management

Medication-Free Pain Relief: PainEase TENS Pro offers drug-free pain management -- minimizing reliance on medications. Patients experience reduced discomfort through targeted nerve stimulation -- fostering a greater sense of well-being.

- **Comprehensive Pain Care:** PainEase TENS Pro underscores a commitment to holistic pain management for diabetic patients.
- **Improved Quality of Life:** By enabling individuals to actively control their pain, this TENS unit contributes to an overall improved quality of life.
- **Practice Income:** The provision of PainEase TENS Pro not only benefits patients but also generates modest rental income for the practice, supporting sustainable healthcare solutions.

EMPOWER PROVIDERS THROUGH ADDED VALUE

No-Cost Complimentary Ancillaries

SEAMLESS REVENUE-GENERATING CCM PLATFORM

The key distinction of our CCM solution lies in its multifaceted approach which positions it as a one-of-a-kind solution that combines revenue generation, advanced patient care, streamlined oversight, and comprehensive EMR integration. While other CCM apps may focus solely on remote patient monitoring or basic communication, our app offers a unique combination of features:

- **One Provider:** Net **\$100-120 per month per patient** on average.
- **User-Friendly Platform:** Real-time insights for informed decisions.
- **Holistic Patient Support:** Private messaging, virtual visits, swift referrals.
- **Automated Oversight:** Billing, urgent flags for streamlined management.
- **Seamless EMR Integration:** Manage prescriptions, referrals, patient status.
- **Patient-Centric Approach:** Calls, communication, medication submission.
- **Cost-Effective Compliance:** No upfront costs, HIPAA compliant.

FORENSIC REVENUE RECOVERY SERVICES

Harness the power of advanced AI-driven solutions and a US-based team of former major payer contract negotiators to identify and recoup lost revenue and underpayments. What sets us apart is not just our cutting-edge technology, but the synergy of AI and human expertise, a guaranteed recovery rate, and an all-inclusive approach to revenue optimization and contract management:

- **AI-Powered Recovery:** Our service utilizes cutting-edge AI technology to identify revenue loss and streamline the recovery process.
- **Experienced Team:** Our US-based recovery team comprises former contract negotiators -- ensuring a deep understanding of payer agreements.
- **Guaranteed Recovery:** Typical recover exceeds **10% of your annual collected revenue** and target settlement offers within a span of 120-180 days.
