

How to use Elevator –the tool for the Veterinary Anatomy Digital Media Library (VADML)

After clicking on the link you will open a URL in your browser that looks like this:

You will need to sign in. You can click on the button that says Guest User or if it is not there, click on the yellow SIGN IN tab in the upper right hand corner and click on Guest User.

Username and password are case sensitive. The username is Anatomy (note the capital A) and the password is VADML2019

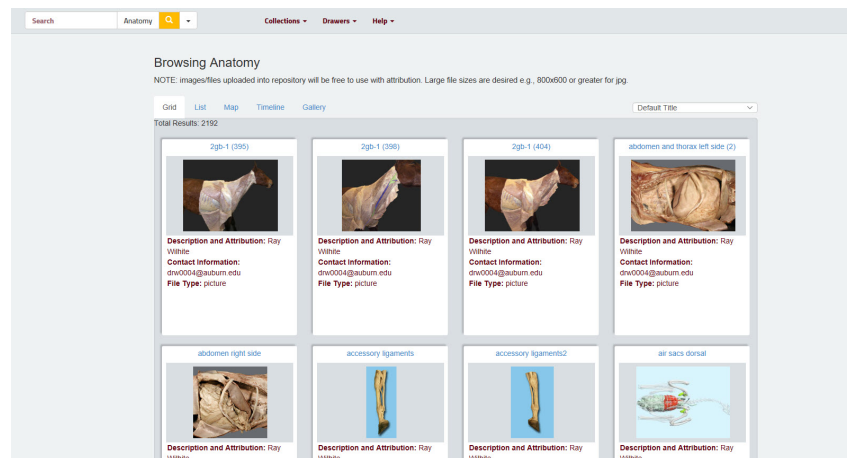

Enter your Guest username and password below.

Password:

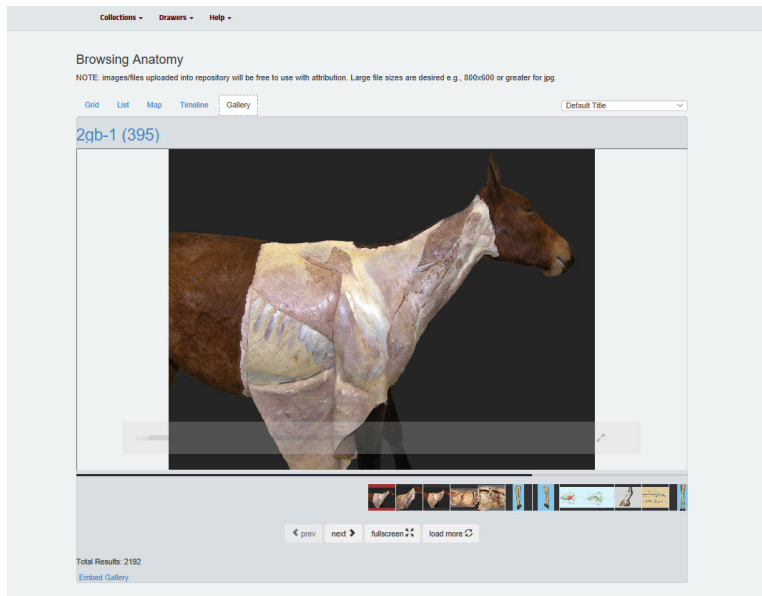

[Sign In](#)

The library collection will then appear. If it does not, click on Collections and choose Anatomy. The default view of assets is Grid. You can also choose to see assets in a list view or a Gallery View

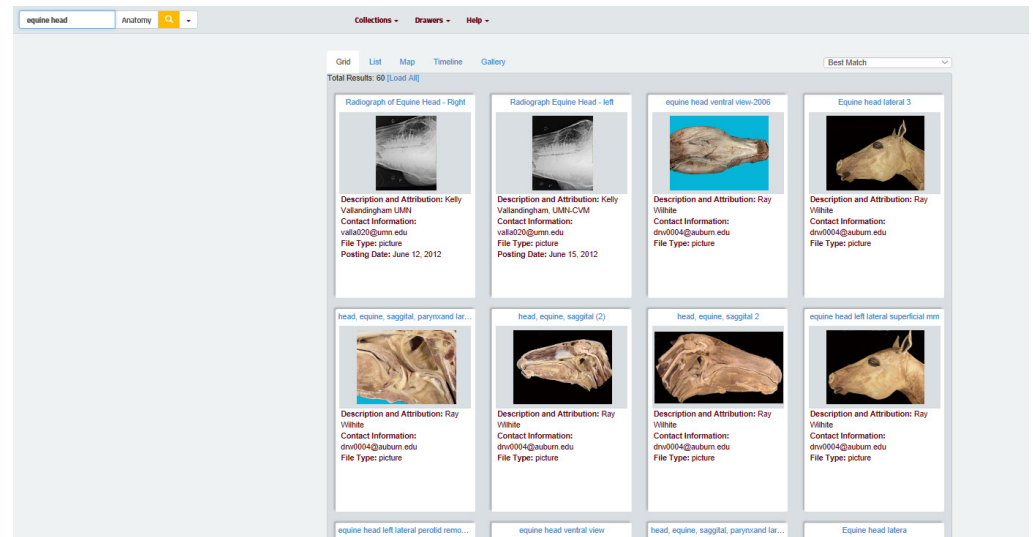

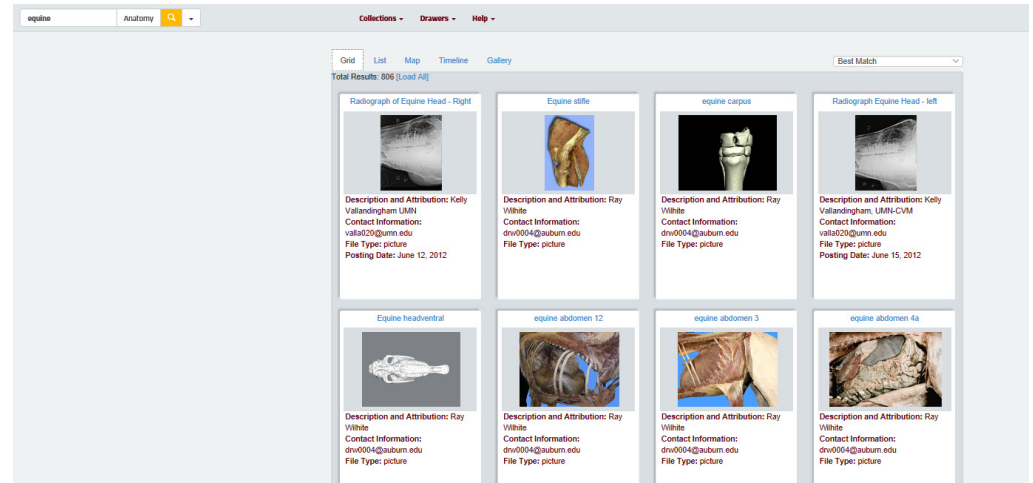

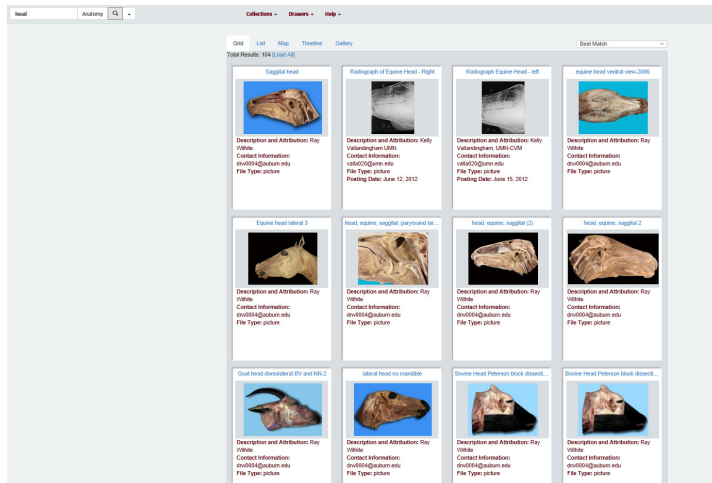

LIST VIEW

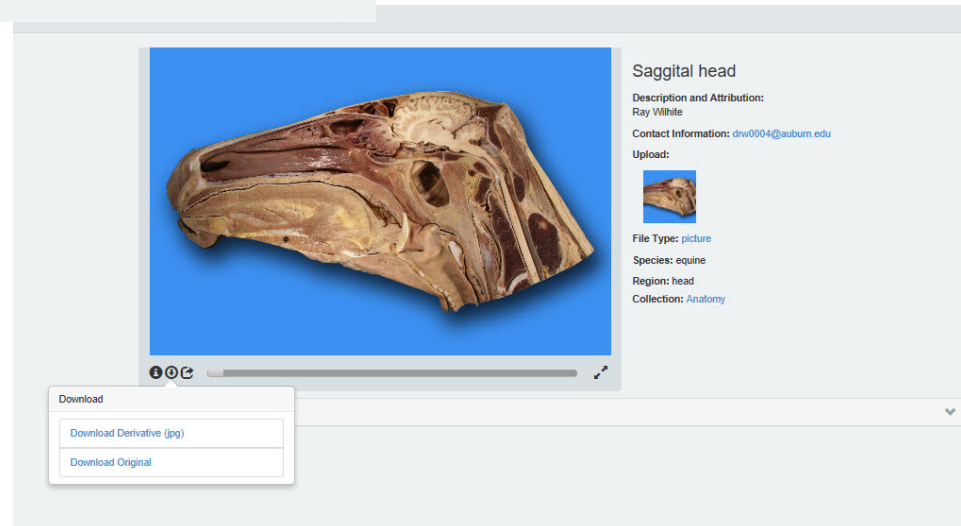

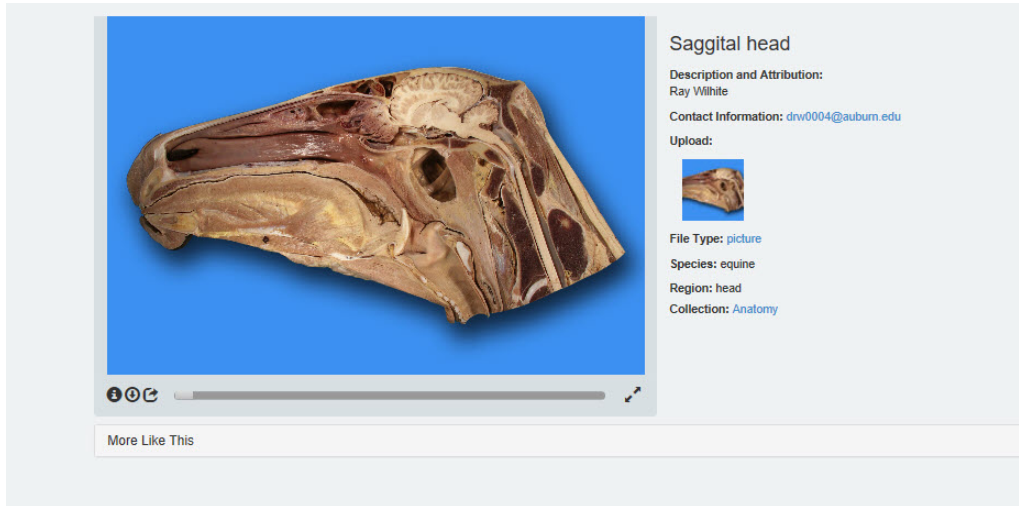

GALLERY VIEW

You can search for assets with one term or multiple terms separated by a space.

Once you have an asset opened, you can download it as the original file or as a derivative. For picture files the derivative is a .jpeg. For movie files the derivative is .mp4. And for presentation files the derivative is .pdf

There is also a share option that gives you a link and embed code. NOTE: Only those with a username and password will be able to see these. If you attempt to share a link or embed code, the person attempting to view from these will receive a message that they will need to login to see the asset.

There are many other fields that can be populated to increase the ability to search specific terms to find an asset. Searching also looks at the title and the description of the asset. We are in the process of retitling and adding additional descriptions and information to our assets.

If you would like to help in this endeavor or contribute assets to the library, please contact Tina Clarkson at Clarkson@umn.edu

If you experience technical issues, please contact Kelly Vallandingham at valla020@umn.edu or by phone at 612 309 5797 for support.
