

AEROSIM TRAINING CENTERS

Leveraging Resources to Your Advantage

Aerosim offers a broad network of advanced equipment and expert services to fulfill your training needs. We leverage existing technology, the industry's top flight training personnel, and business partnerships to provide the edge needed to produce superior results.

With a dedicated staff ready to help build the foundation of a highly efficient, results driven training center – Aerosim works with you to address the following steps:

- 1** *Identify business goals, objectives, and training center requirements*
- 2** *Establish the training center, location, curriculum, equipment, and personnel*
- 3** *Operationalize the center so you can focus on one thing – your business*

From jet-transition and MCC courses to type rating services and equipment leasing, the Aerosim Training Solutions team is dedicated to providing the following flexible and tailored options for your organization:

- Training center design, setup, and support
- Excess simulator capacity (sales & distribution)
- Jet Transition /MCC courses
- Type Rating services (initial & recurrent)
- Equipment lease & mobile learning content
- Simulator placement / financing
- Academy ab-initio flight training

The benefits of working with Aerosim Training Solutions include:

- Global network of resources
- Flexible locations
- Mobile training technologies and simulation
- Customized training programs
- Expert instructors
- Recruitment strategies and pilot pathways
