This summer's hot weather will only intensify the state's drought, so it's important to find water-saving appliances.

FOR IMMEDIATE RELEASE:

EcoQUATTRO Flushing in the News

Consumer Reports cites St. Thomas as the best performing water-efficient toilet making news in drought-stricken California.

(Costa Mesa, CA – June 22, 2015) Water-saving products are big news in California as the drought coupled with this summer's hot weather is causing water shortages statewide. ABC's Eyewitness News Channel Seven aired a report featuring Consumer Reports' top-rated water efficient appliances, including St. Thomas Creations' Richmond ECO toilet. Consumer Reports tested hundreds of appliances to find out which ones used the least amount of water while still working efficiently.

Updating your toilet is one of the most efficient ways to conserve water. In the report Dan DiClerico, Senior Editor at Consumer Reports, mentions updating your toilet as one of the most efficient ways to conserve water. New efficiency standards were implemented in 1995 and toilets older than that should be replaced because they use 5 or more gallons per flush. The Richmond ECO toilet from St. Thomas Creations is the top rated one-flush toilet by Consumer Reports based on solid waste removal, noise and bowl cleaning. Featuring EcoQUATTRO flushing technology, the high-efficiency Richmond ECO is EPA WaterSense-compliant, using only 1.28 gallons per flush and capable of clearing over 1,000 grams of solid waste in independent MaP testing. With an oversize 2-1/8" trapway, clogging is virtually eliminated, while precision rim jets and a MicroGlaze, anti-microbial finish make for an easy-to-maintain bowl.

Retail prices start at \$350 with "silent close" toilet seat and Limited Lifetime warranty included. The Richmond ECO is available at premium bath showrooms nationwide.

ABOUT ST. THOMAS CREATIONS

Since its inception in 1987, St. Thomas Creations has flourished into a full-scale boutique factory whose traditional-inspired bathroom furnishings are celebrated for their impeccable craftsmanship and elegant style. In addition to producing lavatories, water closets, bidets and other accessories that perform as exquisitely as they look, the company was also the first to introduce a complete line of 1.28-gpf high-efficiency toilets, demonstrating its commitment to technological innovation and water conservation. Classic in look yet modern in function, St. Thomas Creations will add enduring beauty, convenience and grace to any bathroom setting.

THE FIRST COMPLETE LINE OF HIGH PERFORMANCE FLUSHING TECHNOLOGY

EcoQUATTRO is the most advanced flushing system on the market today. Designed for extraordinary flushing performance, it addresses the environmental efficiency and poor performance issues long associated with the use of 1.28-gallon water closets in the home. Best of all, EcoQUATTRO uses 20% less water than traditional 1.6-gallon models.

EXTRA LARGE 3" FLUSH VALVE
50% larger than conventional valves

PRECISION RIM JETS
Computer-designed positioning to optimize bowl cleaning

LARGE GLAZED TRAPWAY
Fully glazed and designed to virtually eliminate clogging

DIRECT-FED WATER JET
Maximum water force provides exceptional waste removal

TOP-RATED FLUSH

For three years in a row, Icera toilets have been recognized by Consumer Reports® as #1 in waste removal, noise level and bowl cleaning when compared to similar competitor models.
