## A REPUTATION FOR QUALITY

Since 1995, Icera and St. Thomas Creations have established a reputation among professionals for excellence in one-piece, chair-height toilets with performance flushing and premium design.

In step with our focus on innovation, our product selection emphasizes contemporary and transitional style elements for a balance of modern form and function.

A premium toilet is the most technically-complex item in the bathroom, and we take pride in being at the forefront of product innovation. In addition to high-efficiency toilets, we also offer matching lavatories and product suites for a complete, unified bathroom experience.

## OUR FOCUS

Icera is committed to making products that demonstrate excellent performance and conservation. All Icera and St. Thomas Creations toilets are high-efficiency, water-conserving models using a maximum of 1.28 gallons of water per flush, with certain 1.0 gpf ultra high-efficiency models. They are all independently certified as EPA WaterSense and cUPC compliant, meeting all local codes, and factory flush-tested to ensure only the highest level of flush performance.
