The Solution:

Screen Patients in Primary Care, Pharmacy, and Retail Locations

- The only fully autonomous eye health solution
- No staff time or training needed
- Deploy device to any location
- Detection and interpretation of diabetic retinopathy (HEDIS/STAR)
- Screening for Macular Degeneration and Glaucoma
- Network of eye care professionals when referrals needed – Patient Engagement

Capabilities & User Experience

Display Screen

Draws in customers and provides educational material
Visual, Text, Auditory Instructions

AI Camera

Detects Height of Patient
Detects Patient Distance from Device

Autorefractor

Can indicate

- Myopia
- Hyperopia
- Astigmatism
- K Readings

Visual Acuity

Tumbling E at 2m
Patient responds on Touch Screen

Retinal Camera

Can Indicate

- Diabetic Retinopathy
- Hypertensive Retinopathy
- Glaucoma
- Macular Degeneration
- Coronary Artery Disease

Touch Screen

Symptom Checker

- Dry Eyes
- Ocular Allergy

Patient Experience & Engagement

physical kiosk interface

Patient Experience

- Multilanguage
- Care Coordination
- Patient Education
- Disease Monitoring
- Additional Eye Test for home monitoring and testing

mobile interface
