

Protect Your Home Against Fire... Planning Saves Lives

Protect Your Home Against Fire... Planning Saves Lives

- Never leave small children alone in the home, even for a minute.
- Install smoke alarms in furnace and sleeping areas. Check batteries once a month.
- Plan several escape routes from the house. Plan a place to meet right after leaving the house.
- Conduct home fire drills.
- Do not smoke in bed.
- Dispose of cigarette butts, matches, and ashes with care.
- Keep matches and lighters away from children.
- Be sure your gas water heater is off the ground. Spilled flammable liquids will be ignited by the pilot light.
- Do not clean clothes with flammable liquids.
- Place a barrier around open flames.
- Do not wear loose-fitting clothing near a stove, fireplace, or open space heater.
- Have your heating system checked and cleaned yearly.
- Check electric appliances and cords regularly for wear or loose connections.
- Use only 15-ampere fuses for lighting circuits. Never use a substitute for a fuse.
- Place fire extinguishers around the home where the risk of fire is greatest — in the kitchen and furnace room, and near the fireplace.

IN CASE OF FIRE

- Get everyone outside right away. Go to your planned meeting place.
- Do not stop to dress or put out the fire. (Most deaths occur from suffocation due to hot fumes and smoke, not from direct burning.)
- Call the fire department from a neighbor's house.

From Your Doctor
