

COCKROACH PREPARTATION.

Residents must leave the house for **4 hours** while the material is applied

1. Empty ALL items from the kitchen cabinets. Remove items from kitchen and cover with plastic.

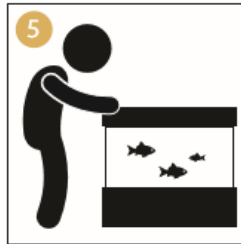

2. Remove ALL items inside of drawers, and on secondary shelving. Move items out of the kitchen and cover with plastic.

3. Empty kitchen countertops and cabinet tops of ALL items. Wash off cabinets and countertops before treatment.

4. Remove ALL items from bathroom cabinets and counters.

5. Cover fish tanks, and turn off air pump before the treatment. Turn the air pump back on after the treatment. Fish tanks may stay in unit during treatment.

6. Leave for 2 hours. Residents and pets cannot be in the unit while materials are being applied.

7. Please clean up ALL of the dead bugs after treatment.

Prevent future Occurrence:

Use good sanitation practices.

Clean up any spills or food scraps.

Store food in bug proof containers.

Do not use over the counter products.

Report any pest problems in your residence to your building manager.

Additional Preparation

- 1.) Move **Refrigerators and stoves** at least **6 inches or 15.0 cm** away from the wall.
- 2.) **Make sure** all items including **bedding or furniture** are moved **6 inches or 15.0 cm** away from the baseboard and the **heating radiators** so the technician may spray the area.
- 3.) **Keep the closet floor clear of any storage or items.**
