

General Security Assessment

We understand that each client's security goals are different. Therefore, an engagement with GeoFortress begins with a discussion and analysis of your organization's business objectives and requirements. Our General Security Assessment helps the client clearly define the role of information security in reaching their business goals, and then scale the client's security to achieve compliance, effectiveness, and efficiency.

This process can include:

- Policy Documentation
- Security Project Management
- Social Engineering Mitigation and Prevention
- Ransomware Protection Strategy
- Security Systems Penetration Testing
- Customized Training
- Threat Assessment, Intelligence Gathering and Analysis
- Privacy and Confidentiality
- Regulatory and Compliance Risk Analysis
- Darknet Risk and Mitigation
- Pre-Audit Screening and Post-Audit Remediation
- Technology Assessment
