Complete the Fitness Triad

We now know that recovery—particularly massage—is just as important to health and stress management as cardio and resistance training.

The Brio Sport is the first and only massage chair designed specifically for recovery, giving you the benefits of a sports massage clinic in your own home.

Perform better, reduce stress, and spend more time doing what you love.

DESIGNED FOR RECOVERY AND STRESS RELIEF

- **Adjustable Deep Tissue Massage Mechanism:** Customize the depth of your massage, from a light relaxing massage to an intense session that accelerates the rehydration of muscle tissue and releases trigger points.
- **Recovery Session:** Moves lymphatic fluid to flush out waste by-products created during an intense workout.
- **Compression Therapy:** Zero gravity recline and full-body compression help with lymphatic drainage, circulation, and intramuscular swelling that causes pain in the calves, feet, arms, shoulders, and hips.
- **Heated Rollers:** For targeted muscle therapy.
- **Specialized Pre- and Post-Workout Sessions:** Including Warm Up, Cool Down, Stretch, and Compression
- **Focused Sessions:** Focus attention where you need it: neck & shoulders, low back, glutes, or IT bands.
- **Easy Clean Up:** The Brio Sport's upholstery is easy to wipe down and keep clean.

BENEFITS OF REGULAR BRIO SPORT MASSAGE CHAIR USE

Reduce And Shorten
