Mohamed A. Bahamdein Trading Co.

# Our Vision

To reach a sustainable growth and maximize our profits, we envision to becoming the supplier of choice for our customers, distributor of choice for our suppliers and a dream place to work for our employees.

Bahamdain Group established in 1930 in Makkah. we were the first company to provide Electricity in the cities of Makkah and Taif. With a Electric motors supply and farming motors at the beginning and was striving to reach a leading position in the electrical and farming equipments market with a turn of more than SAR 120 Million (EURO 27Millions). With the effort of the founders soon it became a market leader in the industrial equipments and many best European, American, Indian, Japanese & East Asian manufacturing companies became partner with us.

Now, Bahamdain Group has expanded the range of products to cover Power generators, Ready Mix Construction equipment, Crushers, Heavy Industrial Equipment, Coffee Grinding Equipments, Tiers, Real Estate and with recent addition of Travel and Tourism. As a result of this expansion Bahamdain Group established its Motor Manufacturing unit in Stuttgart - Germany.

Our strength lies in our ability to source from across the globe efficiently and effectively. Our sales team consists of qualified and dedicated engineers with practical hands on experience in all applications and sectors. We are an excellent mix of youth and experience, with expertise in offering customized services for the utmost satisfaction of our customers. The diversified range of products and equipments offered, meets all required specifications and International Standards to suit the market and our customer's requirements.

With our head office in Jeddah and our showrooms are in Jeddah, Riyadh, Dammam, Jizan, Abha, Makkah and are expanding to more cities in the Kingdom.

# PRODUCTS AND SERVICES

## -REAL ESTATE::

Apartment Hotels in Aziziyah and Awali districts of Makkah. Accommodating the Hajjis for the annual pilgrimage on Hajj.

Bahamdain Mall in Aiwai district one of the first Mall in Makkah region.

## -FARMING:

A farm with a area of 1 x 1 Kms in Taraba close to Taif producing top end fruits and vegetable with supply to nearby cities of Makkah, Jeddah etc.

# HEAVY INDUSTRIAL EQUIPMENTS:

## PERKINS POWERED DIESEL GENERATORS G.E.M.S

Power Generation with full family of Perkins powerPak diesel series range from 9Kva to 2500Kva is assembled with synchronous alternator and control system which make our diesel gensets the ideal solution for prime and standby power supply of any facility.

Perkins engines are compact, efficient power, quality by design, and cost effective power with low noise and low fuel consumption. Our generators whether powered by naturally aspirated or turbocharged engines provide economic and durable operation offering the ideal characteristics for electrical power generation.

The mechanical design of Perkins Engines ensure that a Perkins engine is the most compact, space-efficient engine in its class whilst offering the high levels of customization the customers have come to expect.

Perkins powered by diesel gensets have earned reputation for ease of service along with low costs of maintenance and repair. The rugged and simple design makes local repair easy.

# JAPANESE GENERATORS

The YDG deluxe series of generators sets is manufactured by Yanmar and utilizes the same proven air cooled diesel engines selected by Diesel America for its diesel powered equipment. The "YDG" units provide many extra features including: large fuel tank for a longer runtime, automatic shut down for low oil pressure, electric start with recoil back-up is standard on all models. These deluxe units are the ultimate in lightweight portable diesel generator power and can be operated from dawn to dusk without a fill-up.

# COFFEE ROASTER

This works with an understanding of professional service from production to servicing with its latest technology, advanced technique and material of good quality used in production. Occupying an important place in the Turkish and world markets for this reason, the products of our company are on sale in thirty-three countries other than Turkey. With each and every product you buy at Toper, you will have ease of mind which superior quality and robustness will bring, reasonable price and free consultancy and friendship which will last for many years.

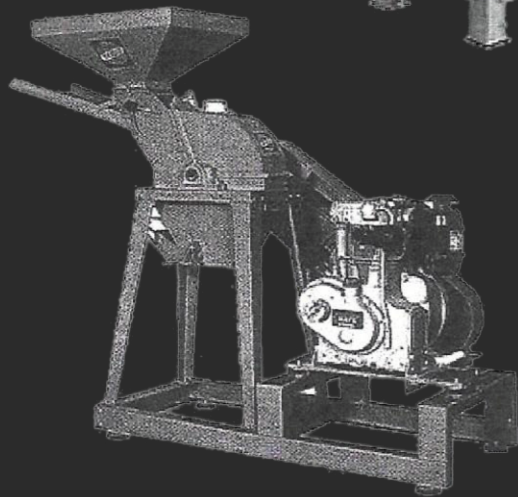

# GRINDING MILLS MOULINS

The Diamant vertical grinding mill is a result of more than 100 years of production experience and continuous product improvement. Today the mill is a modern, Danish, high-quality product without standing performance.

The mill is available with artificial millstones in the sizes 300, 400, 500 and 600 mm diameter. With the famous ENGSKO millstones the Diamant vertical grinding mills are suitable for grinding various kinds of grain, peas, coffee, sugar and spices to any degree of fineness.

Other dry products, like chemicals and certain varieties of stones may also be ground provided they have a suitable grain size.

Bahamadain Group has been instrumental in importing the equipments in the Kingdom from last 60 years..

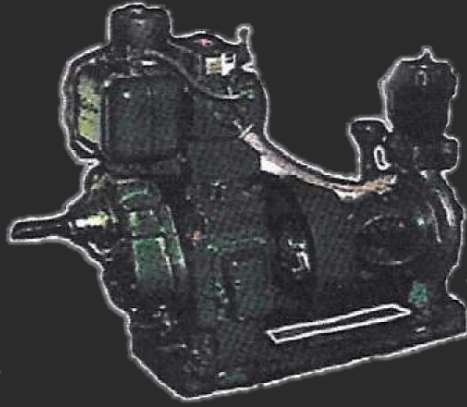

Toper is roasting every kind of coffee beans with its premium quality standards of industrial roasting in outstanding plants all over the World.

GARANTI® Roaster & Grinder Ltd. Co. Since 1951, is the well-known brand in Turkey and Global markets with Coffee& Cacao Processing Equipment(Coffee Roasting Machines, Coffee Grinders, Coffee Silos , Cacao Roasting Machines), Malt, Wheat Black Rice Roasting Machines, Nut Roasting Machines, Coffee /Spice/Sugar /Mineral & Chemical Grinding Machines, Loading & Mixing Equipment are produced by utilizing the highest technology and throughout skilled and experienced craftsmen.

GARANTI® reflects many years of experienced and the gained knowledge of international roasting and grinding system technologies to its products.GARANTI values customers with the understanding of providing professional service through three generations of family ownership and management.

The quality and production of GARANTI® Products is approved by European Standards(CE) and South Korea Standards (KGS). AIL products are exported to Australia, New

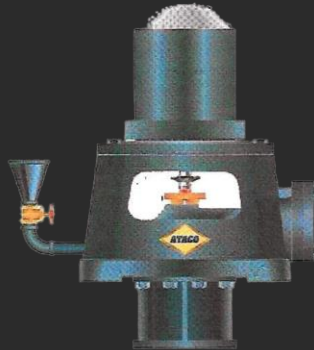

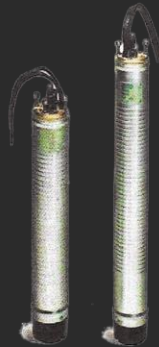

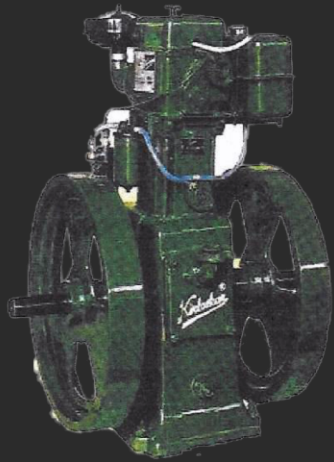

# AGRICULTURAL DIESEL ENGINES:

Bahamdain Group. has provided powerful diesel solutions since 1950. Our diesel specialists have earned their expertise through first-hand experience—from repairing diesel engines on agricultural and heavy equipment applications.

Our diesel specialists are authorized for warranty repair work on most of the major fuel system.

We are the importers of Diesel Engines from the world leaders in this segment.

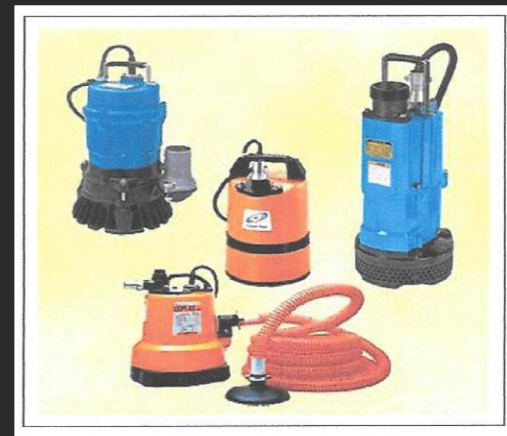

# SUBMERSIBLE PUMPS

Tsurumi introduced its overseas strategy in the 1960s. Our technical capabilities gained recognition first Asia in the 1970s and then in the United States and European the 1980s.

we sought to accelerate the overseas strategy through our International Sales Division. Remarkable successes in fields including construction, civil engineering, mining, industrial wastewater, domestic wastewater, sewage treatment, flood control, facilities designed to bring people into closer contact with water, and scenery creation have proven Tsurumi's creativity and capability to the world.

Today Tsurumi has expanded its bases of operations and is active in 45 countries and regions. In addition to supporting variety of worksites, our high-performance pump products are widely used in large-scale national projects, where they fulfill their roles reliably.

# VEM MOTORS – GERMANY

From a classic producer of electrical motors involved in the development of the electrical motor since 1886, the combined company VEM has advanced to become a provider of systems and complete solutions. In its consolidated form the company supplies electrical drive equipment worldwide, comprising transformers, frequency converters and power converters together with motors with performance ranging from 0.06 kW to 42 MW for low and medium voltage. In keeping with the established expertise of the company and the extensive experience of its employees, complex modernization projects are increasingly being undertaken, for example in rolling mills and tube rolling mills. In addition to automation and drive technology, these also encompass the feeding in and distribution of energy.

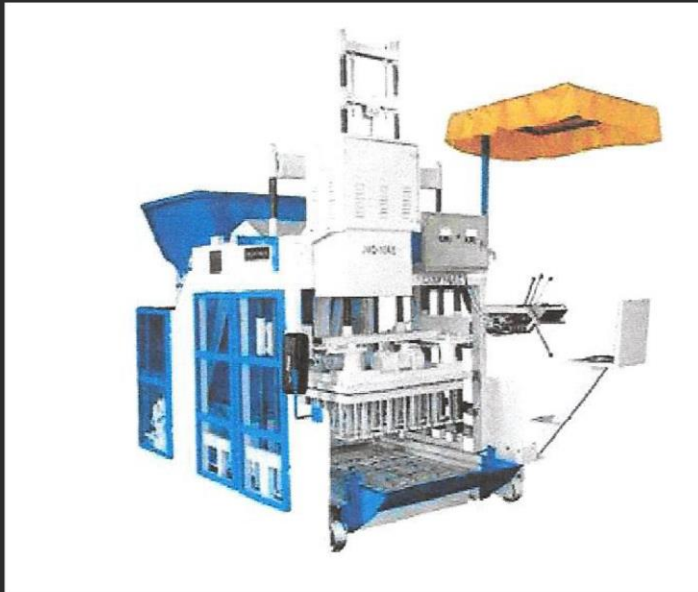

VEM Sachsenwerk GmbH was founded in Dresden and over the course of time has come to specialize in the field of large and special machines. For over one hundred and twenty years the Dresden VEM company has produced medium and high-voltage machines for individual industrial applications of up to 42 megawatts.

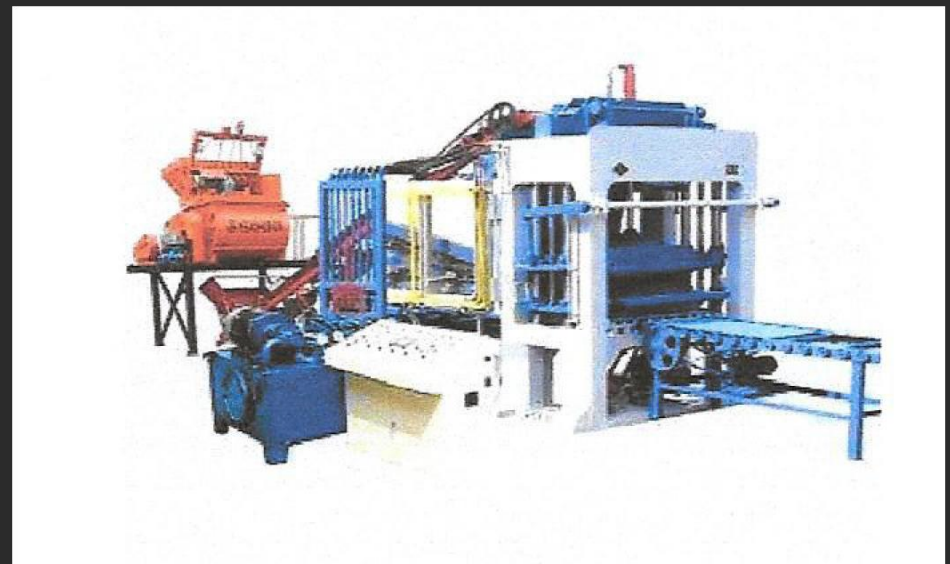

VEM Sachsenwerk manufactures specifically to complex customer specifications. The Dresden firm's large and special machines are characterized by high utilization via electro-magnetic optimization with low mounting volumes. This applies for motors and generators as well as for traction and special models.

Flexibility and quality are guaranteed by an extremely high depth of manufacturing. Technical know-how and product developments in co-operation with partners from colleges and universities are trend setting for the market. Modern testing equipment with 4 test bays of up to 6 MW test capacity guarantee the production and supply of technically-sophisticated product expertise for the highest demands of large machines.

# BLOCK MAKING MACHINES

A brick is a block or a single unit of kneaded clay-bearing soil, sand and lime, or concrete material, fire-hardened or air-dried, used in masonry construction. Lightweight bricks (also called "lightweight blocks") are made from expanded clay aggregate. Fired bricks are the most numerous type and are laid in courses and numerous patterns known as bonds, collectively known as brickwork, and may be laid in various kinds of mortar to hold the bricks together to make a durable structure. Bricks are produced in numerous classes, types, materials, and sizes which vary with region and time period, and are produced in bulk quantities. Two basic categories of bricks are fired and non-fired bricks.

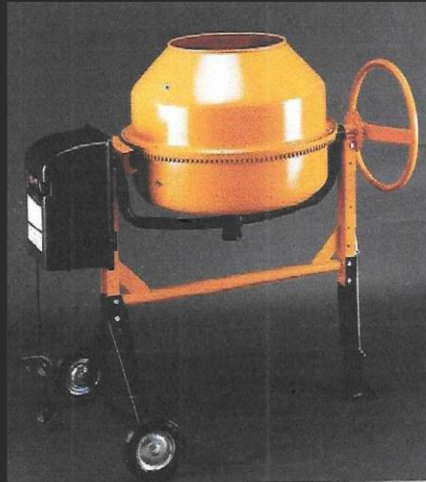

# CONCRETE MIXERS

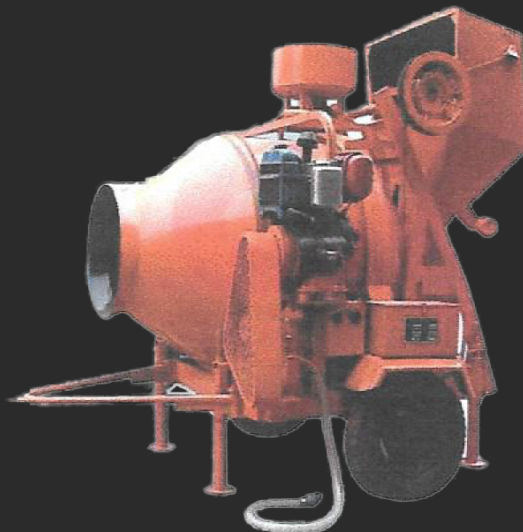

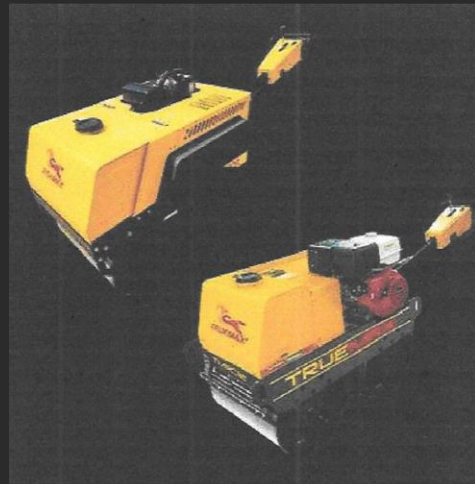

Cement mixer vary in shape and size and can be either electric or petrol. Both electric and petrol types are readily available for purchase or can usually be hired; electric cement mixers are usually easier to use providing that you can get mains electric(with a RCD) to it, you will also need to have space near to the cement mixer for heaps of ballast (or sand and gravel) and space to work, you don't want to be moving barrow loads of ballast around more than you have to.

The cement mixer should be set up on as slab of existing concrete (which can be cleaned down afterwards), on a large mixing board or other area which can be cleaned down; no matter how much care you take, odd pieces of ballast, sand, gravel and mixed concrete will end up below the mixer.

To achieve the correct ratio of each ingredient for the concrete, they have to be measured by volume; some people do this by shovel load but, unless you have experience, it is better to measure the cement and ballast (or sharp sand/gravel) by bucket loads, with a shovel you tend to get more ballast on it than cement so just counting the shovel loads can be misleading. Do not use too large a buckets you could end up with more ingredients than the mixer can take.

# GARDENING POWER TOOLS

ATIKA is one of the leading suppliers for building and garden products. Established in 1949, the company has developed over the years from a regional manufacturer into an international operating company. Today ATIKA-products are used worldwide: under the Portuguese sun as well as in the cold weather of Russia. ATIKA-products inspire craftsmen, do it yourself enthusiasts and the normal consumers from Scandinavia to Greece.

# AIR COMPRESSOR

Founded in 1982, NEWCO has always turned its attention to the requirements of constantly evolving market by offering a wide range of products whose good quality is recognized all over the world. NEWCO products are also well-known for their interesting balance price-quality and are delivered with an efficient and fast service. The constant improvement of the products and service standards as well as the capacity to know-how to join the market requirements with its structural efficiency are the factor that determine the NEWCO success being also the engagement for the future.

# TIRES DIVISION

The very first tires were bands of iron placed on the wooden wheels of carts and wagons. Luckily, with the discovery of rubber things changed. It was in the mid 1800's that the first tires made using rubber appeared. They were simple tires; the rubber carried the load entirely.

It was in 1845 that the pneumatic or air-filled tire - which works by air within the reabsorbing the shocks of the road — was invented and patented by RW Thomson. His design used a number of thin inflated tubes inside a leather cover (see illustrated). This meant that it would take more than one puncture before the tire deflated. However, despite this new breakthrough in tires, the old solid rubber variety was still favored by the public, leaving the pneumatic tire out in the wilderness.

# TRAVEL AND TOURIMS DIVSION

**Ba Hamdein Group For Tourism & Travel** envisions being the market leader in opening up global avenues and sustaining business ties in the Arabian peninsula, culturing ethos resonating with local sensitivities

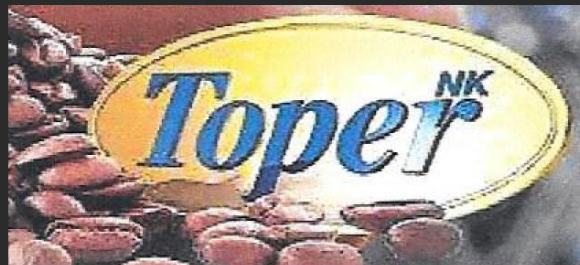

**Hamden Group For Tourism & Travel** can deliver these solutions because of the quality of its personnel, the key to its business success. It is committed to recruiting and training only the highest caliber staff for each travel specialty, including worldwide reservation services, and destination management services.

## **Worldwide Services.**

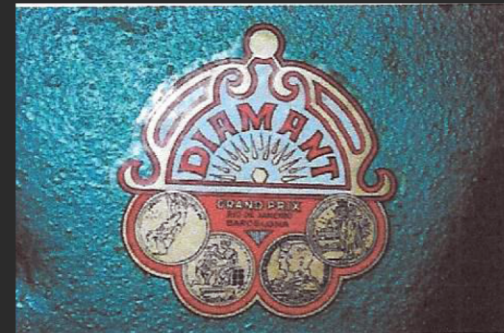

- Corporate Travel Management.
- MICE.
- Incentive Travel.
- Wedding Planning.
- Social Gathering Events.
