

### STEP 1

Open case and connect legs. Legs snap into place.

### STEP 2

Attach reflector, connect using a wing-nut.

### STEP 3

Hang tank and attach hose to propane tank. Attach skirt. Turn on gas on propane tank.

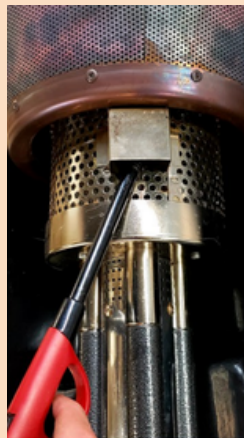

### STEP 4

Push and turn knob to ignite setting.

**IMPORTANT!** Press and hold knob in for at least 30 seconds.

### STEP 5

While holding knob in, light under the burner head and continue to hold knob in for 30 seconds after lighting. Then adjust flame setting.

### HELPFUL TIP

Store units indoors before lighting and keep out of high winds.
