

BPC 157

HEALING BODY AND MIND

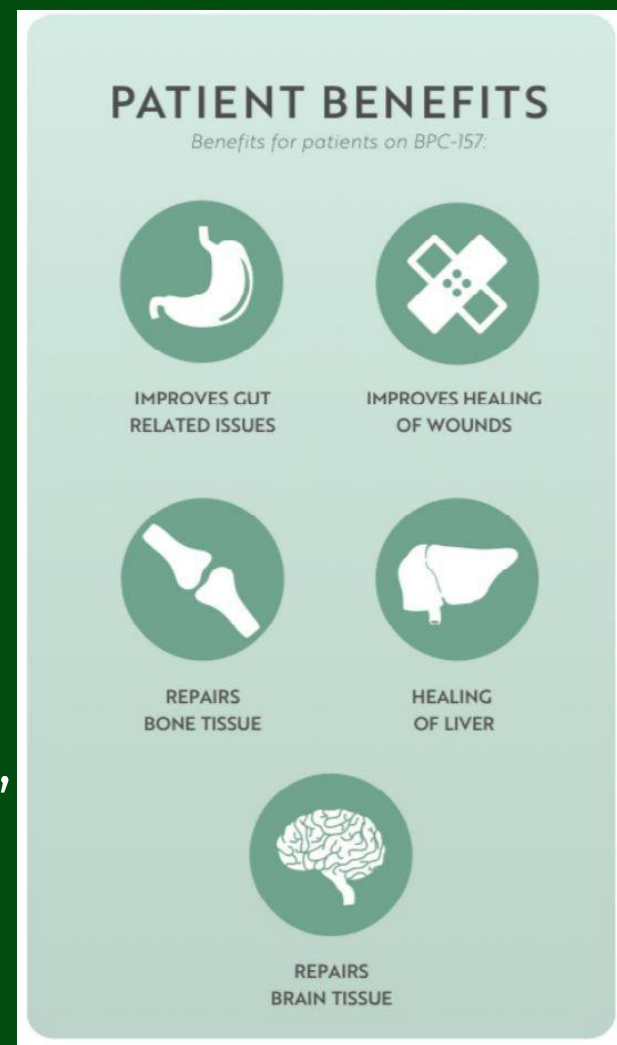

BPC-157, or Body Protection Compound 157, is a synthetic peptide derived from a portion of the body's own protein known as Body Protection Compound. It consists of 15 amino acids and is known for its potential healing properties and tissue repair effects.

BPC-157 promotes healing in various tissues, including muscles, tendons, ligaments, and the gastrointestinal tract.

How does it work?

BPC 157 accelerates healing by increasing collagen in tissues, reducing inflammation, increasing blood flow to damaged tissue, and modulating serotonin and dopamine. BPC 157 has shown to improve:

- Wounds
- Prevent stomach ulcers and protects intestinal organs
- Repairs tissue of tendons, ligaments, brain and bone
- Reduces toxic stress in the liver
- Anti-inflammatory
- Modulates serotonin and dopamine
