AIR TAXI & AIR CHARTERS

AIR TAXI & AIR CHARTERS

Defy the Time Barriers...

An Air Taxi is the most reasonable and convenient mode of travel for short-haul flights. Small, cost-effective, high performing aircraft, like turbo-propellers, helicopters and jets, serve as air taxis for short frequent flights.

Owing to its size and capabilities, an Air Taxi can fly you to the remotest of the rigs, mines and otherwise difficult-to-reach sites.

Hire your private Air Taxi from DRIYV Air and have a comfortable, relaxed flight to your destination.

Pressing issues and pressurising situations come unprecedented. So when there's an abundance of resource but lack of time, you will have to fly in no time over destinations.

Wait no more and reach us to book your hassle free and industry's most affordable short commute air taxi ride.

PILOT TRAINING

PILOT TRAINING

Only Sky's the Limit

The sky has just got wider with the opening up of national and international sky routes.

At DRIYV AIR the aspiring pilots can expect to receive the best guidance for the pilot's License Conversion Examination conducted by DGCA, Govt. of India, at the lowest possible cost with the advantage of being taught by the professionals and training academies holding the licenses from DGCA who readily share their experiences with the students that enriches them and come handy in their overall performance.

Students who want to fly for recreation/hobby can do PPL (Private Pilot License) for which they need to be 10th Pass with at least 50 % marks.

The demand for the pilot license holders is again growing stronger and the aspirants can now actually see their dreams flying to reality. DRIYV AIR, with its specialisation in aviation consulting and extensive, seasoned institutional & training academy tie-ups in national and international pilot training is among a selected few in India and is proving to be a perfect launch pad for pilots with its International associations for the best possible Pilot training.

PILOT TRAINING

DURATION:

1 Year (Approx.)

ELIGIBILITY

10+2 or its equivalent with a minimum of 50% marks in Mathematics and Physics. (If you don't have Physics & Maths in 10+2 you have an option of doing these two subjects from National Institute of Open Schooling's On-Demand Examinations and can still start your Pilot training course. Visit www.nios.ac.in for details)

A Class II Medical (Indian) with fitness certificate from designated medical practitioner. Please note for issue of CPL License Class I Medical would be necessary.

At least 16 years of age to start pilot training. Vision in one eye must be perfect. (6/6 eyesight) In the other eye, you could have an imperfection of 6/9, which must be correctable to 6/6. You must be free of any disease that can hamper normal function.

COURSE DETAILS

Pilot Training comprises of two parts. Ground Training and Flying Training!

Ground Training covers the theory subjects of Air Regulations, Aviation Meteorology, Air Navigation, Aircraft Technical Subjects and RTR(A). (The detailed syllabus will be mailed to you upon your interest) These subjects are to be studied and the exams of the same conducted by DGCA are to be passed by the CPL candidates.

The Flying Training

The Candidate has to complete 200 Hours (Two hundred hours) of flight time for obtaining the Commercial Pilot's License. This flight time includes:

- One hundred hours of flight time as Pilot-in-Command.
- Twenty hours of cross-country flight time as Pilot-in-Command.
- Ten hours of instrument time.
- Five hours of flight time by night.

We offer flying training at the best equipped and the best flying facilities in India where you can complete your Pilot Training in most professional way within due time. To request information please an email to – driyv@quantivier.world

We have also forged international associations with some of the best and highly reputed flying clubs across the world to arrange the Pilot Training abroad in the shortest possible time and at a reasonable cost. Our associations have been formed after a due diligence with the sole aim to help you chart out a plan specific to your situation and requirements.

Contact us to find the world's best pilot training details in North America, Europe and Australasia.
