32 m² Backyard Deck.
No Concrete Footings. Removable & Reusable.

First-generation GRIDBASE panels, North Yunderup WA.

32 m²
Connected platform area

8
2 m × 2 m panels

~4 hrs
Approximate install time

The Problem

The backyard stepped down about 250 mm from the concrete slab at the rear of the home, and the ground sloped away from the house.

The Solution

8 first-generation panels were levelled on adjustable supports, with concrete pavers under the supports on the lower side.

The Result

A continuous, level deck from the slab towards the clothesline, installed in about 4 hours.

> *"They were extremely reliable, organised and proficient. My block has a slope to it and it was no problem for the team to make my outdoor space usable."*
>
> Homeowner, North Yunderup

Got a sloping backyard?

Send us your space and a photo. We'll come back with a panel count, layout and quote.
