

## OnPoint Auto Customs – Labor Rate Policy

### **Standard Labor Rate:**

Our labor rate is **\$150 per hour** for all general, custom, performance, and specialty automotive work.

### **Project-Based Pricing:**

Custom work may also be quoted as a fixed project total rather than at an hourly rate. This option is used when project scope, materials, and timelines can be clearly defined in advance.

### **Rate Adjustments:**

All rates are subject to change based on industry conditions, material costs, project complexity, or other operational factors. Any rate changes will be communicated prior to the start of new work orders or contracts.

### **Billing Transparency:**

Customers will receive clear documentation of labor, materials, and project totals. Additional work outside the agreed scope may incur additional charges at the standard hourly rate unless otherwise stated.

### **Effective Date:**

This policy is effective immediately and remains active until revised by OnPoint Auto Customs management.
