

# padprintpros.com

My name is John Kaverman. I am a consultant specializing in plastics decorating technologies. I've been in the industry for over 35+ years and have worked in capacities including screen and pad printing production, process and applications engineering, technical writing, training, and sales.

I founded Pad Print Pros in 2011. Since its inception, my independent consulting and sales firm has branched out to include screen printing and curing technologies.

I currently represent a collaborative network of Italian companies, all of which are well established in the industry. The easiest way to contact me for any decorating application is through Innovative Marking Systems.

## Pad Printing Solutions

Founded in 1982, TOSH was the first to utilize stepper motor technology in the pad printing industry. Today, TOSH is the only manufacturer with 100% electric pad printing machines. I work with their exclusive U.S. Distributor - Innovative Marking Systems.
