CAPABILITY STATEMENT

**Certainty in Concreting**

## Specialist FRP Subcontractor

Civil & Infrastructure · New South Wales

**HOARAUCRETE**

PTY LTD

**CAPABILITY STATEMENT**

*Certainty in Concreting*

Hoaraucrete is a specialist FRP (Formwork, Reinforcement, Concrete Pour) subcontractor delivering civil infrastructure concrete works across New South Wales. We bring deep trade expertise to every project — from footings, pits and drainage structures to retained earth systems, headwalls, and decorative concrete finishes.

Based in Gregory Hills, we operate across the Sydney metropolitan area and mobilise regionally where project requirements demand it. Our team has delivered work in **Tier 1 and Tier 2 environments** — including John Holland, M&A Civil, Laing O'Rourke, Georgiou, Regal Innovations, TRN Group and Ford Civil — and we understand the programme discipline, documentation standards, and communication cadence that major projects demand.

We're structured to handle packages from **\$50,000 to \$2,000,000**, running 2–5 concurrent projects depending on staging. Our strength lies in civil drainage works delivered quickly and accurately, backed by a crew that consistently earns repeat work from the head contractors we partner with.

## OUR KEY PRINCIPLES

- **Reliable Delivery** — we meet tight programme windows or call it early
- **Seamless Site Integration** — we work as an extension of the head contractor's team
- **Flexible, Scalable Crews** — we adapt to changing site conditions and pour schedules
- **Quality & Finish** — documented, inspected, and signed off on every element

## COMPANY DETAILS

### LICENCE

NSW Contractor 450495C

*"Certainty in Concreting — delivered on programme, every time."*

## STRUCTURAL FORMWORK

Hoaraucrete delivers formwork solutions across civil infrastructure — footings, slabs, pits, drainage structures, headwalls, and retained earth systems. We work with conventional timber, PERI and modular panel systems, and custom fabricated solutions depending on pour geometry and access constraints.

Our strength is in heavy-duty formwork for civil drainage works, where speed and accuracy are critical and cycle times matter.

### KEY CAPABILITIES:

- Footings, pits, slabs and civil structures
- Drainage structures, headwalls, retained earth systems
- Conventional timber and modular panel systems (PERI)
- Cycle sequencing to optimise programme

## REINFORCEMENT (REO)

Reinforcement is delivered as part of our integrated FRP scope and is primarily self-performed. Our crews are experienced across all standard bar sizes and configurations for residential, commercial and civil projects, including prefabricated cages and off-site assembly.

We work directly from engineering drawings and bar schedules, and raise RFIs early where clashes or ambiguities arise — reducing costly delays downstream.

### KEY CAPABILITIES:

- Foundations, footings, columns, walls and slabs
- Prefabricated cages and off-site assembly
- Construction joint and continuity bar installation
- Coordination with formwork, services and concrete supply

## CONCRETE POUR

Hoaraucrete is experienced across a wide range of concrete placement methods including pump pours and crane and bucket, and a full range of finishes — trowel, exposed aggregate, stencil, stamped, and decorative concrete. Concrete supply is typically coordinated by the head contractor, though we can manage supply where required.

We have experience with specialist mixes including high-strength, SCC, fibre-reinforced and early-strength concrete. Our largest single pour area to date is approximately 1,000m<sup>2</sup>.

### KEY CAPABILITIES:

- Pump pours and crane-and-bucket placement
- Specialist mixes: high-strength, SCC, fibre-reinforced, early-strength
- Decorative finishes: exposed aggregate, stencil, stamped, trowel
- Civil drainage pours and in-situ structures

The **M7–M12 Integration Project** is one of South-West Sydney's most significant transport infrastructure programmes — and a defining project for Hoaraucrete. Engaged by M&A Civil on John Holland's M7–M12 Integration delivery, our team has delivered an integrated FRP package spanning civil drainage structures, culvert headwalls, in-situ drainage pours, and retained earth works across the interchange.

## PRINCIPAL CONTRACTOR

**John Holland**

via M&A Civil

## CONTRACT VALUE

**~\$2,000,000**

2025–2026 (current)

## HEAD CONTRACTOR

**M&A Civil**

Specialist FRP Subcontractor

## SCOPE OF WORKS

Integrated Formwork, Reinforcement and Concrete Pour (FRP) package covering culvert headwall construction, in-situ drainage slab pours, retained earth formwork, and civil structure reinforcement. Work executed to Tier 1 programme, safety, and quality standards — with documented ITPs, NATA-certified concrete testing, and full compliance with the John Holland and M&A Civil safety management plans.

Hoaraucrete specialises in the delivery of integrated Formwork, Reinforcement, and Concrete Pour (FRP) packages across civil and infrastructure projects. Our team brings deep trade expertise with a disciplined approach to programme, quality, and safety — giving Tier 1 and Tier 2 contractors a reliable, self-performing specialist from first fix through to finished pour.

### Transport Infrastructure

Roads, highways, interchanges, bridge approaches, rest area civil works

### Water & Stormwater

Culverts, headwalls, in-situ drainage structures, retained earth systems

### Residential Civil

Estate infrastructure, subdivisional drainage, civil foundations

### Commercial & Retail

Hardstand, carpark structures, shopping centre civil works

### Defence & Institutional

Secure site structural and civil concrete works

### Decorative & Architectural

Exposed aggregate, stencil, stamped and decorative concrete finishes

## OUR PROJECTS

The first four project cards reflect Hoaraucrete's current company engagements — as specialist FRP subcontractor on the M7–M12 Integration and Mundoonan Rest Area projects, and as head concreting contractor on Catherine Park Estate and ongoing subdivision works. The final two cards reflect Guy Hoarau's pre-Hoaraucrete trade experience as a concreter with Paramount, subcontracting under Ford Civil on major Tier 1 projects.

### M7–M12 INTEGRATION PROJECT

Head Contractor: M&A Civil  
 Scope: FRP — Civil infrastructure  
 Value: ~\$2,000,000  
 Status: 2025–2026 (current)

### CATHERINE PARK ESTATE

Principal: Regal Innovations  
 Scope: Civil & residential concreting  
 Value: ~\$2,000,000  
 Status: 2021–ongoing

### MULTIPLE SUBDIVISIONS

Principal: TRN Group  
 Scope: Civil concreting & drainage  
 Value: ~\$400,000  
 Status: 2021–ongoing

### MUNDOONAN REST AREA

Principal: Georgiou (via M&A Civil)  
 Scope: FRP — Civil infrastructure  
 Value: ~\$12,000  
 Status: Completed 2025

### HOLSWORTHY ARMY BARRACKS

Principal: Laing O'Rourke  
 Head Contractor: Ford Civil (via Paramount)  
 Scope: Structural & civil concrete  
 Period: 2012–13

### MIRANDA WESTFIELD

Principal: Lendlease  
 Head Contractor: Ford Civil (via Paramount)  
 Scope: Civil & commercial concrete  
 Period: 2015

Hoaraucrete operates under a structured WHS framework that meets the obligations of the Work Health and Safety Act 2011 (NSW) and the safety management plan requirements of Tier 1 principal contractors. All workers complete site-specific inductions prior to commencing work, and Safe Work Method Statements, ITPs, and supporting documentation are prepared and reviewed for every high-risk construction activity. We maintain a strong safety record with no recent notifiable incidents or regulator notices.

### AHEAD OF THE CURVE: CREW-WIDE SILICA TRAINING

Our full crew has recently completed the **10830NAT Course in Crystalline Silica Exposure Prevention** — a nationally accredited course, completed well ahead of anticipated regulatory requirements. This reflects how we operate: a crew that actively upskills and stays ahead of industry standards, rather than waiting for compliance obligations to catch up.

### DOCUMENT CONTROL & RECORD-KEEPING

*On site we work within the principal contractor's safety system. Our back-office records are centralised and easy to produce on request.*

- SWMS library with AI-assisted drafting and digital worker acknowledgement
- ITPs and pour records (including NATA-certified test results)
- GPS-stamped timesheets (proof of attendance on Tier 1/2 sites)
- Site diaries & progress photos with GPS time-stamps
- Incident & injury registers
- Near-miss & dangerous occurrence logs
- Toolbox talk attendance records
- Plant pre-start inspections & maintenance histories
- Training & licence registers

### CERTIFICATION PATHWAY

Hoaraucrete is implementing the management systems required for **ISO 9001** (Quality), **ISO 45001** (WHS), and **ISO 14001** (Environment) certification. Our systems already operate to these standards across every active project, with documentation available for review on request by principal contractors.

## Guy Hoarau

### CONSTRUCTION DIRECTOR

Guy is the founder and managing construction director, bringing over 15 years of hands-on construction experience across Tier 1 and Tier 2 environments including John Holland, Laing O'Rourke, Georgiou, TRN Group, Regal Innovations and Ford Civil.

He began his career on the tools as a qualified concreter, holding a Certificate III in Concreting, and developed a deep trade foundation across structural formwork, reinforcement fixing, and concrete placement before progressing into site supervision and construction management. His experience spans civil infrastructure, commercial and residential sectors, with a strong focus on structural concrete, drainage, and multi-trade site environments.

Guy leads from the front on every job — ensuring that the standards Hoaraucrete commits to in tender are the standards clients experience on site.

## Ben Hoarau

### SITE SUPERVISOR

Ben brings over 10 years of Tier 1 civil construction experience to the Hoaraucrete team, including six years with M&A Civil (2014–2020) as machine operator and site supervisor. His background spans machine operation, concreting, and site supervision — giving him a well-rounded, practical understanding of project delivery on major infrastructure works.

Ben's project experience covers some of South-West Sydney's most significant road and motorway upgrades, including the M7–M12 Interchange (John Holland), the M12 Motorway (Georgiou/CPB), the Northern Road Upgrade, and the Camden Valley Way, Narellan Road, and Bringelly Road upgrades delivered under BMD and Lendlease. He has also worked on the Great Western Highway Reconstruction at Forty Bends (Seymour Whyte) and the Eaglevale Drive Upgrade (Cleary Bros).

On site, Ben plays a key role supervising crews, coordinating daily activities, and maintaining productivity while upholding the safety and quality standards Tier 1 contractors expect. His hands-on experience means he reads site conditions quickly and keeps work moving efficiently in line with project specifications.

## Karine Hoarau

### OPERATIONS MANAGER

Karine manages the operational and administrative functions of Hoaraucrete, providing the business backbone that supports seamless on-site delivery. Her role spans subcontractor coordination, compliance documentation, WHS record management, and commercial administration.

Karine ensures that the systems, records, and communications that underpin every project are in place before work begins — giving both the site team and principal contractors confidence that the business behind the work is as well-run as the work itself.

Karine is currently undertaking formal Work Health & Safety training through TAFE, deepening the in-house safety capability that supports Hoaraucrete's site operations.
