

First bridge

Left of large log

**~100 yards past 1st bridge
suggest portage immediate to right gets rocky
and debris quickly**

Portage here (will have sinage)
Distance will be about 100 yards
over flat grassy area

A photograph of a stream flowing through a dense forest. The water is clear and greenish-brown. Several large, fallen tree trunks are scattered across the stream, creating a natural barrier. The surrounding forest is lush with green foliage. The foreground shows a grassy bank with fallen leaves and a large, light-colored log. The text "Can re-enter past these downed trees" is overlaid on the left side of the image.

Can re-enter past these
downed trees

2nd bridge
