CHAWTON GLOBAL INVESTORS

Investment Objective

The Fund aims to provide a growing income stream and to grow capital over the long term (5 years or more). Each part of this objective will have equal weighting.

Investment Manager

The Fund Investment Manager, Michael Crawford, successfully managed a global equity fund at a large U.S. multi-family office, doubling its value over 7 years to over $6 billion. He has 30 years' experience and was previously a member of the very successful Deutsche Asset Management team.

Investment Philosophy

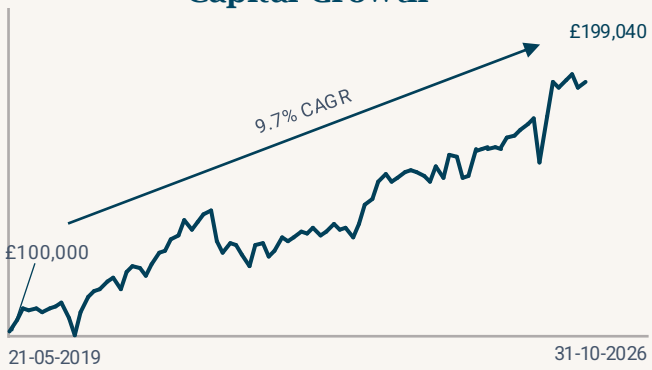

The fund will be at least 80% invested in global equities. The Investment Manager will invest in a select (typically 20-50 holdings) portfolio of companies that exhibit high and sustainable returns on capital allowing the companies to both reinvest in the business for growth and provide a meaningful and growing dividend stream to be paid over time. In order to maximise the opportunity of identifying such companies, the Fund will invest in listed equities globally. The Manager believes that to sustain high returns over the long term, companies must adhere to responsible and sustainable investment principles.

The value of an investment and the income from it can fall as well as rise as a result of market and currency movements and you may not get back the amount originally invested. You should therefore regard your investment as long term. Details of the risk factors are included in the fund's prospectus available here.
