To Whom It May Concern,

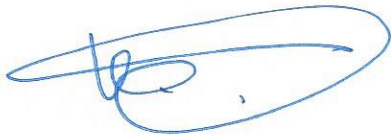

**Subject: Confirmation of Validity and Functionality of Ophtascan AI Software**

We have validated and tested the operational functionality of the AI software Ophtascan, developed by Oncotech Nordic AB in our medical facility.

We evaluated the performance, reliability, sensitivity, specificity and the operational functionality of Ophtascan and compliance with CE class one standard.

The Ophtascan is an AI-driven digital health software designed to analyze and screen for various cancer and diabetes type 2 conditions.

Thank you  
Yours Sincerely

Simon Henry Opio-Emuna  
Executive Director
