Floor Check™

Dual Action Cleaner and Degreaser

100% Eco-Friendly Cleaner

EnviroClean Solutions Floor Check™ dual action product is a specially formulated product that provides excellent cleaning and degreasing results as well as imparting a unique no slip technology to hard surfaces that helps prevent slip and fall accidents. The non-toxic, 100% biodegradable formula can be used for a wide variety of surfaces including concrete floors, concrete pads, tile floors, marble and stone.

The Science of Clean

At EnviroClean Solutions we take the environment seriously. Our chemists have designed and developed products for professionals that clean without toxic chemicals and solvents. Our non-toxic, 100% biodegradable products contain no butyl compounds, no VOCs and no harsh caustics or acids.

Applications

- | | |
|---------------------------------------|----------|
| Concrete Floors (sealed and unsealed) | Plastics |
| Concrete Pads | Metals |
| Tile Floors | Rubber |
| Marble and Stone | |

1 Simple Step

1. Apply to surface with brush, mop, or auto-scrubber

Dilution Guidelines

- Will vary – see ECS technical rep for details

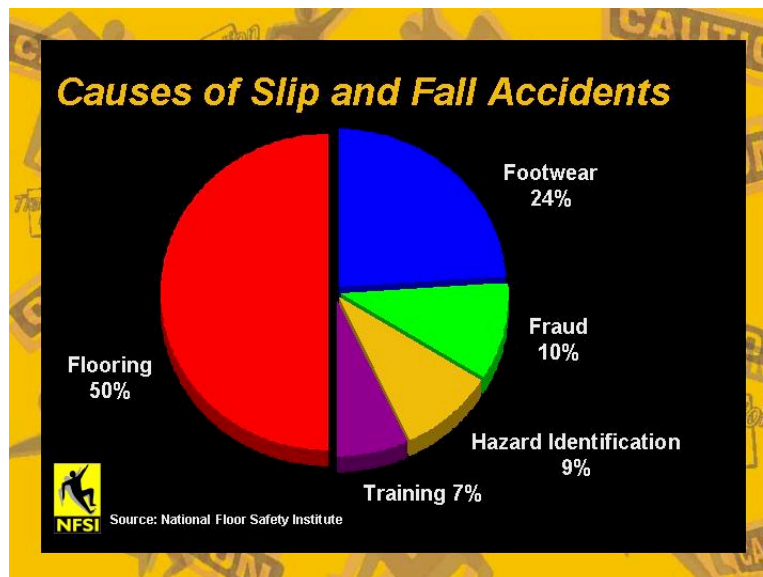

Physical Attributes

- Neutral pH – no acids or alkalis
- No Butyl Compounds
- Solvent Free
- 100% Biodegradable
- VOC Free

The Slip and Fall Problem?

Research, based in part on insurance industry claims data, has revealed five major causes responsible for almost all slips, trips and falls. Although the actual percentages may vary from one industry to another, the following five causes have been well documented across different industry groups, environmental conditions, and geographies.

Although the walking surface is most likely to be identified as the primary cause of a slip, trip-and-fall accident, comprising 55% of all falls, the remaining 45% are attributable to four other factors, including footwear, fraud, hazard identification, and training. Therefore, a property owner's slip and fall prevention strategy should focus on a comprehensive approach that addresses all causes especially their floors.
