

Powder-free nitrile examination gloves

Cardinal Health™

Esteem™ Comfort

Esteem™ protection with improved elongation

Cardinal Health Esteem™ Comfort is our newest generation of Esteem™ stretchy nitrile exam gloves. This glove is the perfect combination of improved elongation with outstanding protection from chemotherapy drugs and an FDA approved low dermatitis potential claim.

Features and benefits:

- 30% higher min. elongation¹ than the minimum ASTM standard² for a nitrile exam glove which can help to **reduce cuff tears during donning**.
- Reduces the risk of developing a Type IV Hypersensitivity to Chemical Accelerants.
- Tested against chemotherapy drugs³
(with a minimum breakthrough detection time for Thiotepea >30mins)
(Note: Test results are printed directly on the packaging.)
- Tested against 18 chemicals⁴
- Textured fingertips for enhanced grip
- Premium box with dispensing film

High Use: A portfolio of non-sterile exam gloves designed to serve a broad range of everyday clinical needs.

Minimum elongation¹ of
650%

1 Elongation (Def.): The amount of extension (=Stretch) of an object under stress, usually expressed as a percentage of the original length.

2 Ultimate Elongation Before Aging (%) per ASTM D6319

3 This glove has been tested for resistance to permeation of various chemotherapy drugs per ASTM D6978, "Standard Practice for Assessment of Resistance of Medical Gloves to Permeation by Chemotherapy Drugs." Caution: Gloves used for protection against chemotherapy drug and laboratory chemical exposure should be selected specifically for the type of chemicals being used. Note: Review Safety Data Sheets (SDS) for the chemicals/drugs being used to determine required level of protection.

4 ASTM F739 - Standard Test Method for Permeation of Liquids and Gases through Protective Clothing Materials under Conditions of Continuous Contact

5 1000 gloves of ESTEEM™ Comfort use 25 percent less packaging material when compared to 1000 gloves of ESTEEM™ Stretch
