

An American Vanguard Company

**AMVAC Chemical Corporation**, a wholly owned subsidiary of agriculture products company American Vanguard Corporation, operates a manufacturing, formulating and packaging facility on a 510-acre complex in Axis, Alabama, sharing common services with FMC (formerly DuPont) since 2001.

Approximately 197 employees work at the plant, which manufactures and packages major agriculture and farming chemicals. AMVAC serves a healthy, demand-driven global agricultural market in a world that requires ever-increasing

quantities of agricultural products for human food, animal feed, natural fibers and alternative fuels, the key to success is enhanced productivity. From planting to harvest, AMVAC's products help meet that critical need by providing effective and diverse crop enhancement products. Amvac is committed to be a part of the global solution to reduce the overall impact on the environment through our focused improvement efforts that minimize energy consumption, greenhouse gas emissions, waste generation, and water consumption at our Axis manufacturing facility.

The Axis plant's increased manufacturing capabilities allow for more complex manufacturing, while working to reduce operational costs. Its location lends geographic diversity by proximity to key raw material suppliers and customers in southeastern U.S. and western Europe. The Axis facility has the capability of producing, packaging, and shipping over 100 different products, which makes the facility an instrumental part of the company.

Here at the Axis facility, we pride ourselves on diversity and flexibility based on market demands while providing a family-like environment for every employee.
