EcoSouth Services of Mobile, LLC (the “Company” or “EcoSouth”) is the operator of the Axis Industrial Landfill. It is located on the east side of Highway 43 in Axis, AL. The site was originally permitted as a single-source industrial waste landfill for a manufacturer that closed its Mobile facility a number of years ago.

Subsequent to the closure of the site, ownership of the landfill reverted to the county of Mobile. EcoSouth Services of Mobile, LLC acquired the site from Mobile in 2011. The Company opened for business in 2013 and now serves many of our areas largest industrial operations with their in-plant services, waste hauling, transportation and disposal needs.

The Axis Industrial Landfill is the only privately-owned, RCRA-compliant waste disposal facility for commercial use in Mobile County. The 72-acre facility is lined with 2-foot thick, compacted clay and a leachate collection system complete with a 7-acre synthetically-lined cell which allows for a wider range of non-hazardous solid and liquid waste.

EcoSouth is active in the Mobile Chamber of Commerce, the LeMoyne Community Advisory Panel, Partners for Environmental Progress and Manufacture Alabama. The Company continues to support our local cities and Mobile County in annual clean-up campaigns by donating labor, equipment, and access to our disposal facility.
