

About SSAB Alabama

SSAB Americas is one of the largest North American producers of steel plate and coil, serving many industrial markets including energy, construction, agriculture and transportation. SSAB is committed to being North America's steel supplier of choice, with five state-of-the-art facilities strategically located in regions across the US and Canada, including a mill in Axis, Alabama, employing more than 600.

SSAB steel is found in the infrastructure that builds and moves the world—in heavy machinery, ships, wind towers, rail cars and more—playing a vital role in people's daily lives.

SSAB, a global market leader in steel production, based in Stockholm, Sweden, has its Americas headquarters in Mobile. The Axis facility operates under General Manager Andy Bramstedt, and is under the SSAB Special Steels division.

What we do in Axis

- Products made: High quality steel coil and plate in a wide range of sizes with exceptional flatness and superior surface quality, and also high-strength steel products under the Har-dox and Strenx brand.
- Other services: Coil slitting, blasting and painting, and heat treatments (normalized or quenched & tempered)

Fun facts

- The Mobile facility is one of Alabama's largest steel scrap recyclers, consuming nearly two million tons (4 BILLION POUNDS) of scrap metal per year.

SSAB Completes Expansion Project at Axis Mill

SSAB Alabama celebrated a huge milestone in May 2023 when the QL6 Blast and Paint Line held its official grand opening and ribbon cutting on site. General Manager **Andy Bramstedt** welcomed a group of local elected officials and Mobile Chamber executives to the event, and provided an overview of the project and its long-term benefit for SSAB and employees.
