PDRN 6% + H.A 3%

INTRODUCTION

The "PDRN CRYSTAL HA 3%" product can be used to address various skin-related issues, such as: 1. Signs of Aging: Treatment can help reduce the appearance of wrinkles, fine lines, and sagging, promoting firmer, more youthful-looking skin. 2. Hydration and dullness: Hyaluronic acid and active ingredients in the product provide intense hydration and help restore the skin's natural radiance.

3. Hyperpigmentation and Dark Spots:

The depigmenting components in the product, such as niacinamide and tranexamic acid, can help reduce the appearance of dark spots and promote a more even skin tone. 4. Lack of firmness and elasticity: The growth factors and PDRN in the product can stimulate the production of collagen and elastin, improving the firmness and elasticity of the skin. 5. Dull and tired skin: The active ingredients and nutrients present in the product can revitalize the skin, providing a fresher and more radiant appearance. 6. The product "PDRN CRYSTAL HA 3%" can also be optimal for treating dark circles. Thanks to its active ingredients, such as hyaluronic acid, growth factors and PDRN, it can help improve the appearance of dark circles, reducing dark pigmentation and providing hydration and nutrition to the delicate skin around the eyes. By using this product properly and following professional directions, you can contribute to a more rested and luminous appearance in the dark circles area.

Remember that it is important to consult with an aesthetic or dermatology professional to obtain a personalized recommendation on its specific use in the treatment of dark circles.

PDRN 6% + H.A 3%

It is important to note that each person and skin type is unique, so it dermatology professional to determine if the "PDRN CRYSTAL HA 3%" product is suitable to address a specific problem and receive a recommendation. about its use.

BENEFITS

1. Stimulation of cell regeneration: The PDRN (Polynucleotides) present in the product is known for its ability to promote cell regeneration, stimulating the production of collagen and elastin in the skin. This can result in a firmer, more rejuvenated appearance. 2. Nutrition and revitalization: The 24 amino acids and 18 vitamins present in the product provide essential nutrition to the skin, helping to improve its vitality and overall appearance. 3. Stimulation of growth factors: The growth factors present in the product can contribute to improve cell renewal and tissue regeneration, resulting in healthier and rejuvenated skin. 4. Depigmenting action: Niacinamide and tranexamic acid present in the product help reduce hyperpigmentation and dark spots on the skin, improving tone and luminosity. 5. Antioxidant Action: Glutathiones and other antioxidant active ingredients help protect skin against oxidative stress caused by free radicals, which can slow down the aging process and keep skin healthier. 6. Intense hydration: 3% hyaluronic acid in the product provides deep and long-lasting hydration, helping to improve the appearance of dehydrated skin and increasing its elasticity.

Keep in mind that these are just some of the benefits that can be obtained by using the product "PDRN CRYSTAL HA 3%". As this is a professional product, it is recommended to receive proper training and follow the manufacturer's instructions to obtain the best results and ensure safety in your application.

PDRN 6% + H.A 3%

INDICATIONS

The product "PDRN CRYSTAL HA 3%" is a professional treatment designed to offer a wide range of benefits for the skin. With a unique combination of active ingredients, this product is specially formulated for use in the salon.

PROTOCOL

Step 1: Skin Preparation • Cleanse and remove make-up from the face and neck with a mild cleanser suitable for the client's skin type.
• Performs a gentle exfoliation to remove dead cells and prepare the skin for better absorption of PDRN 6% + H.A 3%.

Step 2: Application of PDRN 6% + H.A 3% • Prepare the solution of PDRN 6% + H.A 3% - 2 ml per zone. (WE NEVER OPEN ampoules!) We take out the product with a syringe and store the ampoules in the cosmetic fridge for a maximum of 30 days. • Apply the solution to the client's face and neck using an appropriate technique, such as dermapen, microneedling, or any other recommended aesthetic appliance. • Be sure to follow the instructions for use of the device and adjust the parameters according to the client's needs and manufacturer's recommendations.

Step 3: Massage and Absorption • Perform a gentle upward massage on the face and neck to help better absorb the product.
• You can use specific massage techniques according to the client's needs, such as lymphatic drainage or deep tissue massage.

Step 4: Soothing and Moisturizing Mask • Apply a soothing and/or hydrating mask to the client's face and neck to provide a calming effect and boost skin hydration. • Let the mask act for the recommended time and take advantage of this moment to give a relaxing massage to the shoulders and arms.

PDRN 6% + H.A 3%

Step 5: Finishing and Post-Treatment Care • Gently remove the mask and apply a moisturizing serum and nourishing cream suitable for the client's skin type. • Provides the client with recommendations for home care, including products that contain ingredients similar to PDRN 6% + H.A 3% to maintain and prolong the results of the treatment.

Step 6: Follow-up and Recommendations

- Schedule follow-up sessions according to the individual needs of the client to evaluate the results and adapt the protocol.
