The United States Constitution

Article II, Section 1 of the U.S. Constitution imposes only three eligibility requirements on persons serving as president, based on the officeholder's age, time of residency in the U.S., and citizenship status:

U.S. Constitution – Presidential Candidate Eligibility

"No person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any person be eligible to that Office who shall not have attained to the Age of thirty-five Years, and been fourteen Years a Resident within the United States."

Executive Policy: U.S.-Ukraine Energy Reconstruction and Trade Partnership

Objective: To establish a U.S.-Ukraine energy partnership focused on rebuilding Ukraine's oil and gas infrastructure, ensuring energy independence for Ukraine, increasing global oil supply, and reducing U.S. gas prices. This initiative shall be implemented with full respect for Ukraine's sovereignty, ensuring that no private or government entity exploits or directs Ukraine's resources for personal or political gain.

Section 1: Establishment of the U.S.-Ukraine Energy Reconstruction Fund 1.1 The U.S. Department of Energy (DOE) and Department of Commerce shall establish the **U.S.-Ukraine Energy Reconstruction Fund** to provide financial support for rebuilding Ukraine's oil refineries, natural gas infrastructure, and energy export capacity. 1.2 The Fund will be supported through a combination of **U.S. government-backed loans, grants, and private-sector investments**, with strict safeguards to prevent undue influence over Ukraine's sovereignty. 1.3 The Fund shall be overseen by a **joint U.S.-Ukraine Energy Task Force**, ensuring transparency, accountability, and full control by Ukraine over its energy assets. 1.4 **Repayment Obligation:** Once Ukraine becomes fully self-sufficient and profitable in energy production, it shall begin repaying the U.S. government for all financial aid received under this policy. Repayments shall be structured in a way that does not burden Ukraine's economic growth and will be reinvested into global energy stability programs.

Section 2: Fast-Track Rebuilding of Ukraine's Oil & Gas Infrastructure 2.1 The U.S. will provide **technical assistance, engineering expertise, and financial backing** to restore and modernize key Ukrainian energy facilities, including:

- **Kremenchuk Oil Refinery** (Ukraine's largest refinery, to be fully restored and modernized).
- **Shebelinsky Gas Processing Plant** (to expand natural gas production and processing capabilities).
- **Construction of modular oil refineries** to diversify Ukraine's refining capacity. 2.2 U.S. energy companies may participate in investment opportunities but will have **no controlling stake or influence over Ukraine's energy policies**. 2.3 All infrastructure developed under

this policy shall be **fully owned and managed by Ukraine**, with no foreign ownership or long-term control agreements.

Section 3: Expanding Ukraine’s Natural Gas and Oil Export Capabilities 3.1 The U.S. will assist Ukraine in developing **new oil and gas pipelines** and **logistical trade routes** to ensure stable energy exports. 3.2 A **Ukraine-Poland-U.S. Energy Corridor** will be established to allow Ukrainian fuel exports to reach U.S. and European markets efficiently, with Ukraine maintaining full autonomy over its trade agreements. 3.3 Ukraine’s Black Sea ports will be developed to support the expansion of **liquefied natural gas (LNG) exports**.

Section 4: U.S. Fuel Price Stabilization Initiative 4.1 Ukraine will allocate a **percentage of its refined oil production** to the U.S. at negotiated rates, ensuring a **steady supply of non-OPEC oil** while maintaining full control over pricing and trade terms. 4.2 The U.S. government will implement **fuel tax reductions and incentives** funded by revenue from increased Ukrainian oil imports. 4.3 A **Strategic Energy Reserve Partnership** will be established, allowing the U.S. to store emergency energy supplies sourced from Ukraine under mutually agreed terms.

Section 5: Trade, Investment, and Regulatory Coordination 5.1 A **U.S.-Ukraine Energy Trade Agreement** will be signed to provide long-term stability for oil and gas exports, ensuring Ukraine’s complete sovereignty in all trade decisions. 5.2 Fast-track permitting and regulatory approvals will be implemented to encourage **U.S. energy companies** to invest in Ukraine under strict conditions that prevent foreign control. 5.3 The U.S. will assist Ukraine in aligning its **energy regulations and safety standards** with international norms to enhance global trade partnerships, with Ukraine maintaining the final authority over its policies.

Section 6: Accountability, Cybersecurity, and Protective Countermeasures 6.1 An **independent Ukrainian energy oversight committee** will be formed to monitor progress and prevent corruption in the fund’s allocation, ensuring all energy resources remain under Ukraine’s control. 6.2 Quarterly reports on project development and economic impact shall be submitted to the **Ukrainian government and made publicly available**. 6.3 Any violations of international environmental or human rights standards will result in funding reviews and potential policy adjustments, but no foreign entity shall have the power to dictate Ukraine’s energy governance. 6.4 **Repayment Terms:** Ukraine’s repayment obligations shall begin once it reaches a pre-determined level of profitability, and payments shall be structured over an extended period to ensure no economic hardship for Ukraine. Funds repaid will be allocated towards global energy stability initiatives and economic development programs. 6.5 **Cybersecurity & IT Protection:** Until Ukraine fully rebuilds its **IT infrastructure**, all Ukrainian energy operations, data, and trade communications will remain on a **secure intranet system** with no external access to prevent cyber

threats. The U.S. will provide technical expertise to assist in securing Ukraine's critical energy infrastructure against cyberattacks. **6.6 Countermeasures Against Russian Interference:**

- **Cyber Defense:** Strengthen Ukraine's **cybersecurity infrastructure** with AI-driven monitoring and **real-time threat detection**.
- **Military Protections:** Install **air defense systems** around key refineries, pipelines, and energy storage facilities to prevent missile or drone strikes.
- **Economic Safeguards:** Establish **long-term energy trade contracts** with allied nations to prevent Russia from manipulating global fuel prices to undercut Ukraine's exports.
- **Legislative Safeguards:** Implement strict **foreign investment laws** to ensure no Russian-affiliated entities gain influence over Ukraine's energy assets.
- **Disinformation Defense:** Launch **public transparency initiatives** to counter Russian propaganda and misinformation regarding Ukraine's energy independence.

Expected Benefits: ✓ **Lower U.S. Gas Prices:** Increased oil supply reduces dependence on OPEC and stabilizes fuel costs. ✓ **Energy Independence for Ukraine:** Strengthens Ukraine's economy and weakens Russia's influence. ✓ **Stronger U.S.-Ukraine Partnership:** Encourages long-term cooperation without compromising Ukraine's sovereignty. ✓ **Global Energy Stability:** Diversifies energy sources, reducing global reliance on politically unstable regions. ✓ **Responsible Financial Investment:** Ensures that U.S. taxpayer funds are repaid, reinvested, and used for further economic development initiatives. ✓ **Secure Energy Infrastructure:** Protects Ukraine's energy systems from cyber threats, military strikes, and economic warfare.

Implementation Timeline: 📅 **Phase 1 (0-6 Months):** Infrastructure assessment, fund establishment, trade agreements, intranet cybersecurity implementation. 📅 **Phase 2 (6-24 Months):** Refinery rebuilding, logistics expansion, trade network activation, strengthening IT security, implementing protective countermeasures. 📅 **Phase 3 (2-5 Years):** Full-scale oil exports, fuel price stabilization, long-term energy partnerships, repayment initiation.

Final Directive: This policy shall take immediate effect upon ratification by the U.S. Congress and approval by the Ukrainian government. The Secretary of Energy and Secretary of Commerce shall oversee its implementation and provide quarterly updates on its progress. **At no point shall any foreign government or private entity hold ownership, controlling interest, or direct influence over Ukraine's energy industry, ensuring Ukraine's full sovereignty and self-sufficiency.** Additionally, Ukraine shall begin structured repayment of funds to the U.S. government upon reaching energy profitability, reinforcing mutual economic stability and responsible financial investment. **All Ukrainian energy systems shall operate on an internal intranet until IT infrastructure is rebuilt to ensure cybersecurity and prevent external**
