HOW TO TAKE MEASUREMENTS (valid for all powerskin racing section)

A - Chest: Take the measurement over the fullest part of your bust.

B - Waist: Measure around the narrowest part of your waistline.

C - Hips: Measure around the fullest part of your hips.

D - Torso loop: In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point.

(**) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.

arena

A person wearing a bright green and black wetsuit is shown from the side, holding a matching green and black swim fin. They are wearing a black sports watch on their left wrist. The background is a rugged, rocky coastline with waves crashing against the shore under a clear sky. The overall tone is athletic and adventurous.

TECHNOLOGY

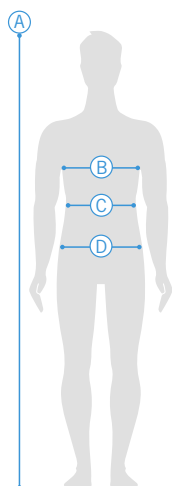

MAXLIFE 100% POLYESTER

MaxLife is an arena exclusive 100% PE fabric that guarantees maximum resistance to chlorinated water. This fabric is the result 21 months development and more than 200 lab trials. Max Life PBT construction - a specifically engineered PE yarn that provides very good elasticity - combines excellent fit with power retention performance. After more than 240 hrs of usage, MaxLife still keeps almost 95% of its original characteristics. Additional features are : quick drying and 50+ UV protection rate. All these features make MaxLife the most performing fabric for intensive swimming.
