

Product Features & Benefits Guide *19/20*

Goggles & equipment designed to get you
in the zone and keep you there...

vorgee.com

The story so far

Vorgee, an Australian owned and managed company, was established in 2005 to fill a gap in the aquatics market – the need for an all-encompassing aquatic company, one which offered products for those getting into a pool for the first time through to the competitive swimmer.

Made up of an experienced team, Vorgee set out to do just that – **create a product for everyone, regardless of whether they purchase for style, performance or price.**

The passion and desire of the Vorgee team to make high quality swimming products and swim gear accessible and easy to understand for all, has led to Vorgee becoming one of Australia’s leading and most preferred aquatic brands; whilst also making a splash in a number of international markets.

Vorgee is committed to producing quality, innovative and stylish products, and achieves this by -

Utilising only the highest quality materials

Researching the latest in product technologies and advancements

Applying and adhering to strict quality control measures to produce products which meet their expectations

Sourcing only the best, most respected manufacturers

Identifying consumer trends and preferences to guide product development

Injecting bright colours and latest fashion trends into their designs

Vorgee have a strong desire to give back to the community and thus are committed to supporting the swimming and wider community. Their community involvement focuses on health and safety, swimming development, leisure and competition. They also recognise the environment is an important community asset and understand the necessity of minimizing their impact on the environment to ensure its protection for present and future generations. As a result, Vorgee have created goggle cases, which are both reusable and recyclable (class 6) and continue to explore ways to lessen their footprint wherever possible.

The story began with a desire to bring that something special to the Australian swim market, and after nearly fifteen years Vorgee has grown to become a brand synonymous with swimming. Today, Vorgee are excited to share their products, passion, philosophy, culture and service with you.

All products ranged by Vorgee Pty Ltd adhere to applicable National and International Safety Standards.

Getting fit starts with the right fit...

Vorgee goggles are designed to feel 'invisible', so you can immerse yourself in your swim experience free from discomfort and distractions.

To help you find your 'invisible', we've created a goggle fit guide and have tagged each of our goggles with its respective fit (**look for the bold text!**)

How to find the right fit for you...

When trying on goggles, you should focus on how they fit around your eyes and across your nose – ensuring they sit comfortably and securely in both areas.

Gently press the goggles in place, against your eyes and face (without the strap in place). If there is a momentary suction, the goggles are a good fit for you.

Note – you may need to try on a few pairs of goggles, before finding your best fit.

SNUG FIT

Ideal fit for competitive swimmers or those who like their goggles to have a low profile and snug fit. The gasket sits and fits firmly inside the eye socket.

MID FIT

Ideal fit for fitness swimmers or those who like a firm, but comfortable fit. The cushioned gasket sits and fits securely inside the eye socket.

BROAD FIT

Ideal for fitness swimmers who like a wider lens and broader fit. The cushioned, universally shaped, gasket sits and fits securely outside the eye socket.

MASK FIT

Ideal for junior swimmers who like a mask like fit. The soft, flexible mask shaped gasket sits and fits securely on the brow line through to the tip of the cheek.

Competition

Immerse yourself
vorgee

A range of streamlined products designed to help you move through the water with minimal resistance and maximum speed.

Missile™ ECLIPSE
808002E

Designed for racing – combats glare and enhances underwater clarity.
