

NMFC CHANGES 2025: REVOLUTIONIZING FREIGHT CLASSIFICATION

WHAT'S HAPPENING?

The National Motor Freight Classification (NMFC) is undergoing a major overhaul in 2025 to simplify and modernize freight classification. This update will streamline shipping processes, improve accuracy, and reduce friction between shippers, carriers, and 3PLs.

KEY CHANGES:

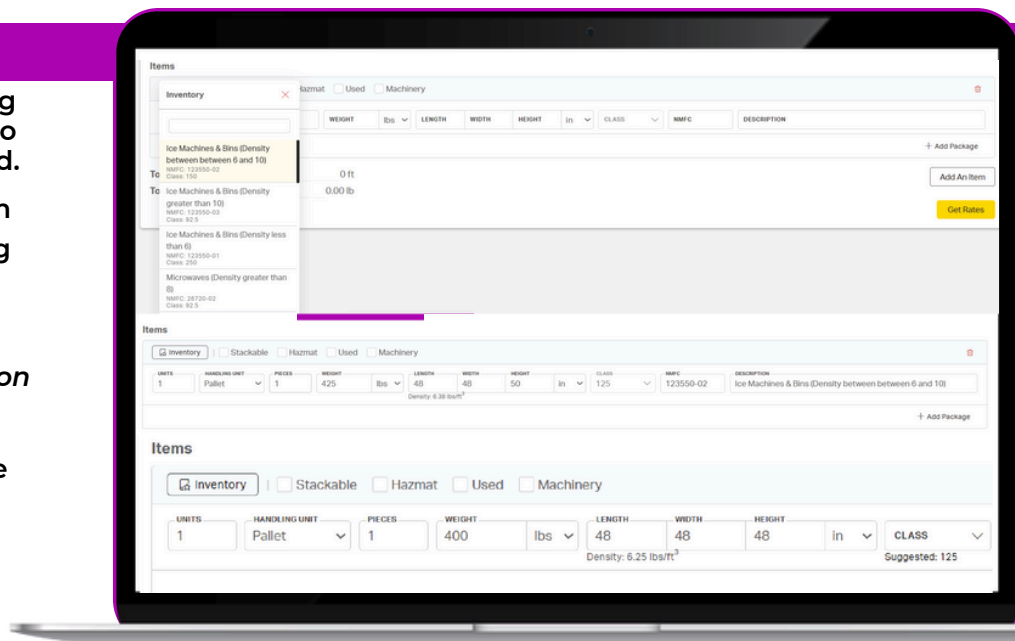

WHY IT MATTERS:

These changes will make shipping fairer, more efficient, and easier to understand for all parties involved.

The industry is shifting away from straight classification and moving toward density-based pricing.

If you've been shipping at the same class for years, this transition may impact you.

By standardizing processes, we're creating a more transparent and cost-effective shipping environment.

WHY WE'RE DIFFERENT: CHROMELOGIX'S CUTTING-EDGE SOLUTIONS

At ChromeLogix, we're not just adapting to these changes – we're leading the way with innovative tools to make your shipping experience seamless:

Precise Dimension Capture: Our system requires accurate dimensions and weight for every shipment, ensuring proper classification and pricing.

Smart Density Calculator: Our built-in calculator automatically matches shipment density to the correct class, simplifying the quoting process.

NMFC Code Integration: We can require NMFC codes on all shipments, reducing the risk of costly reclassifications.

Customized Inventory Management: Our inventory list feature allows you to pre-load your commonly shipped items, automatically populating dimensions, weight, NMFC, class, and descriptions for quick and accurate quoting.

Density-Based Carrier Pricing: We've partnered with select carriers to offer highly competitive, density-based pricing, ensuring you get the best rates in the market.

Prepare for the future of freight classification with ChromeLogix. We're here to guide you through these changes and optimize your shipping operations for 2025 and beyond!
