600 1197 MP	Replacement Poly Piece for Gag	\$30.25

Double Jeffrey Mouth Gag

Incisor work may be performed more easily by doubling the Polypropalene Jeffrey Gags. One gag is used for each arcade while they are held in place with a strap over the poll. By using two gags excessive unbalanced TMJ pressure is kept to a minimum. Horses are more receptive to incisor work given the even amount of pressue throughout the jaw and head. This set of double gags comes with an off cheek hook enabling the use of one at a time if needed.

--------------------	-----------------------------------------	--	--	----------

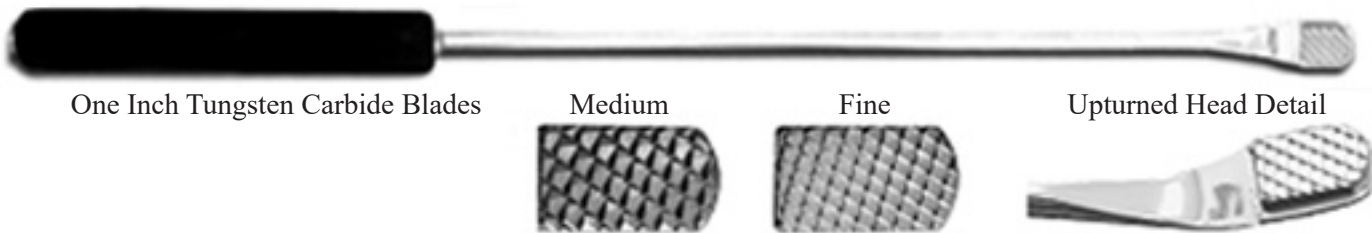

Low profile 7000 Series floats may be ordered with a pistol grip handle (right) or a Ian Wharton handle (left). Ad PG to your part number for Pistol Grip style handle or IW for Ian Wharton style handle. **Please specify head angle and one of two types of blades; fine or medium carbide.** All handles can be sealed with a plastic coating for an additional charge. The shorter lengths of the 7000 series floats are often ordered for use on small and miniature horses because of their narrow low profile head.

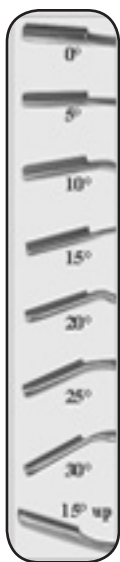

7000 Series Float and Blade Detail —

ONE INCH UPPER BACK 7000 SERIES SLIM-LINE PRO-LITE FLOAT

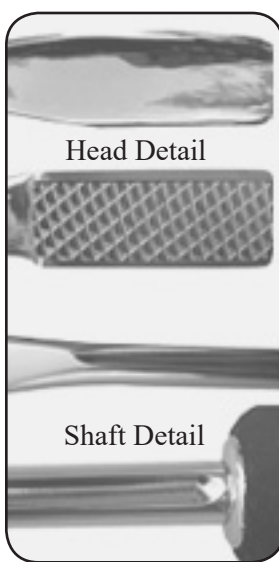

Order #	Description	Price
231 7000 18 01 15 UP	18" 15° Upper Back With Carbide Blade	\$217.00
231 7000 01 Fine	7000 Series 1" Fine Tungsten Carbide Replacement Blade	\$54.95

231 7000 01 Resharp	Resharpener 1" Blade	\$27.45
231 7000 Tape	Replacement Tape Per Foot	\$11.00

To place your order for the 7000 Series Slim-Line Pro-Lite Floats all of the following information is needed.

- Shaft Length
- Angle of Head
- Blade Type
Fine or Medium
- Handle Style
If not ordering straight

Floats are shipped with medium blade if not specified otherwise.

All 7000 Series Floats are available in pistol grip or Ian Wharton style handles in any of the lengths pictured at right.

Please add **PG** for Pistol Grip or **IW** for Ian Wharton style handles to your part number when ordering.

The milled groove in the shaft of the straight handled 7000 series floats aids in determining float head angle when placed within the mouth.

Plastic coating may be applied to foam handles at our factory. They cannot be shipped as replacement handles. They are easy to clean and better for cold weather. Factory Part #: DIP--\$14.50

Instructions for Changing 7000 Series Blades

Removal of Old Blade:

1. Heat back side of float head with hot water
2. Pry blade loose with a fine bladed screwdriver or knife
3. Remove left over tape from head channel
4. Clean with acetone; do not touch cleaned surfaces

Attaching New Blade:

1. Remove backing from tape on new head
2. Attach blade to float head
3. Protect cutting surface with cloth and apply even pressure
4. Trim excess tape

1" by 8" Diamond Incisor and Canine Tooth Files With 4" Blade Coated on Two Sides and Both Edges

Top gnathological practitioners report that these are the finest, fastest and longest lasting stainless steel diamond coated files they have ever used. Many reports state that horses don't seem to mind work performed with these floats as much as other types of instrumentation.

Floats are coated with fine quality diamonds on two sides and both edges. They are available in regular and split blue diamond.

Plain File: #260 356 8 Price: \$143.67
In Split Blue Diamond * 260 356 825 SBD \$177.00

Foam Handle: #260 356 8 Price: \$147.67
In Split Blue Diamond * 260 356 825 SBD \$181.00

S/S Bulb Handle: #260 356 8 Price: \$173.67
In Split Blue Diamond * 260 356 825 SBD \$207.00

8" Regular Straight Foam Grip, No Dip

Dipped Foam Handles

8" Regular Foam Grip Dipped in Blue
Dip Color Choices: Black, Red, Yellow or Blue

Available in Black, Red, Yellow or Blue Color Coded Dip, \$14.50 @ On New Floats
Color Coded Dip & New Handles on Used Floats \$19.00
Floats Refurbished or Rebuilt: Normally about 1/2 Price
Please ship floats to our factory with instructions.

Dipped handles are easier to clean, mildew resistant and better to work with in cold weather. They still have their original shape and feel but are longer lived and the color coding lets you find the one you need when working. All handles need to be dipped at the factory. Floats may be returned for new handles and dip at any time.

225 6000 17 00 14 IW	17" 14 Insert Straight Float With Ian Wharton Handle	\$349.95
----------------------	------------------------------------------------------	----------

Shaft Lengths Do Not Include 8" Handle Length

All Capps floats come with standard inserts unless others are specified.

You may custom order any float with a pistol grip, Ian Wharton handle or any angle head or shaft length. Custom orders are not normally in stock, taking slightly longer to build and deliver. There may be a slight additional charge depending on the complexity of the request.

All 6000 Series Capps Floats have long life secure three sided, carbide pinned inserts. Straight handled floats have milled shafts to aid in float placement. They include 8" long Pro-Lite handles for better grip and easier handling. The triangle heads allow easier oral access, greater comfort for the horse and less soft tissue damage. Foam handles may be plastic coated for easier cleaning and use in cold weather.

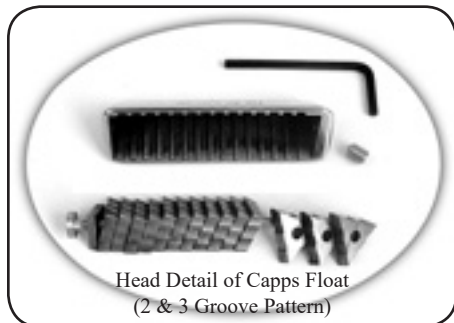

Titanium coated corrosion resistant replacement inserts are available for all Capps Floats.

Popular 17" Low Profile Float

Low Profile Straight Grip Float Part Number: 207 LP 17 \$227.00

Low Profile Pistol Grip Float Part Number: 207 LP 17 PG \$227.00

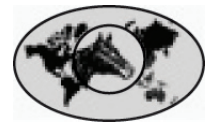

Practitioners Choice: *****

When you want a float to get the work done this is a wise choice. This instrument reduces the (bulk) overall size of the head about 40% over standard slide in blades making it easier to get around sore lacerated cheeks, back ramps and protuberant teeth. Some of the better practitioners report they do 80% of their work with this float and get along well with the horses.
