Gags & Gunther Speculum

Double Jeffrey Mouth Gag: Incisor work may be performed more easily by doubling the poly Jeffrey gags. One gag is used for each arcade while they are held in place with a strap over the poll. By using two gags excessive unbalanced pressure upon the TMJ is kept to a minimum. Horses are much more receptive to incisor work given the even pressure throughout the jaw and head. This set of double gags comes with an off cheek hook enabling the use of one gag at a time if needed.
