# Gag Speculums & Bits

**Double Jeffrey Mouth Gag:** Incisor work may be performed more easily by doubling the poly Jeffrey gags. One gag is used for each arcade while they are held in place with a strap over the poll. By using two gags excessive unbalanced pressure upon the TMJ is kept to a minimum. Horses are much more receptive to incisor work given the even pressure throughout the jaw and head. This set of double gags comes with an off cheek hook enabling the use of one gag at a time if needed.

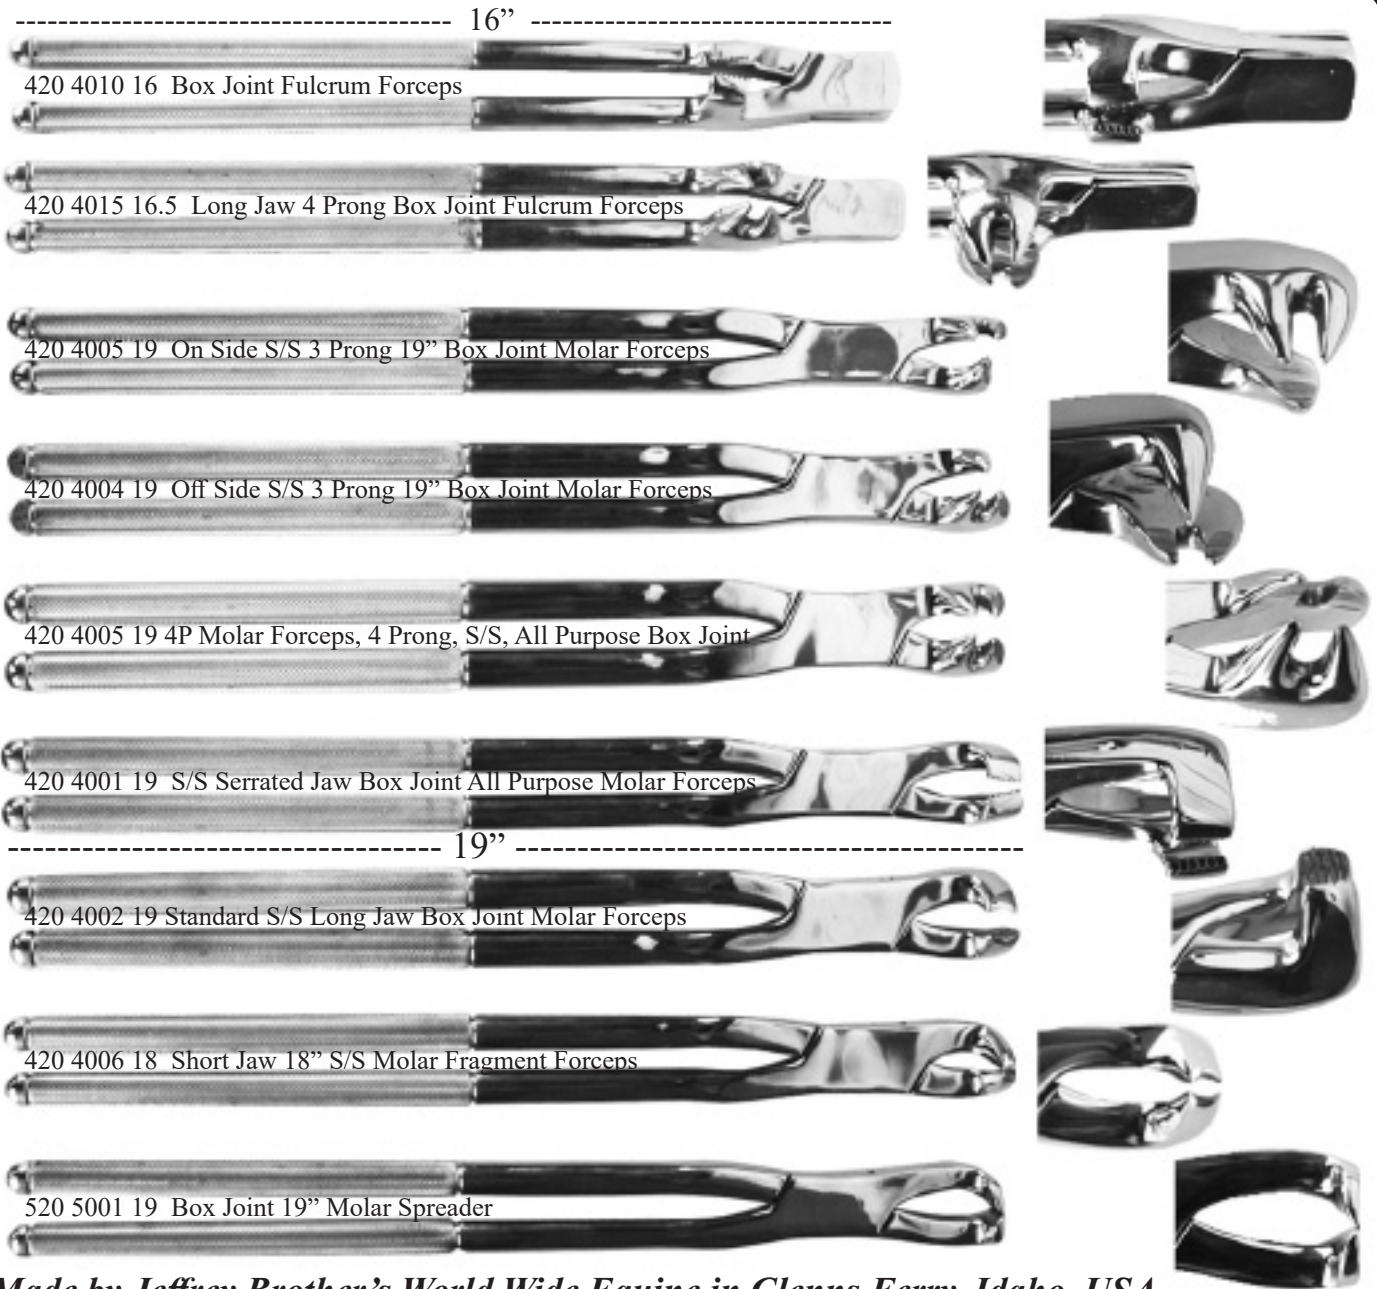

Order #	Full Size Gag Speculums	Price
600 2311	Full size stainless steel Jeffrey poly gag, poll strap and off cheek hook	\$141.50
600 2311 DBL	Double stainless steel Jeffrey poly mouth gag for full size horses; includes extra off cheek hook	\$251.50
600 2311 MP	Replacement polypropalene mouth piece for full size Jeffrey gag	\$30.25
<b>Miniature Gag Speculums</b>		
600 1197	Miniature stainless steel Jeffrey poly gag, poll strap and off cheek hook	\$141.50
600 1197 DBL	Double miniature stainless steel Jeffrey poly mouth gag; includes extra off cheek hook	\$251.50
600 1197 MP	Replacement polypropalene mouth piece for miniature Jeffrey gag	\$30.25

Hippus bits have been designed to fit comfortably and give optimal response to both horse and rider without constant pressure and pain. Hippus bits are uniquely designed with the horse's comfort and welfare at the forefront.

Order #	Therapeutic Hippus Bits	Price

# WWE Bulb Handled Instruments

## World Wide Equine Hardened Tool Grade Stainless Steel Bulb Handled Elevators, Curettes, Osteotomes & Picks

The solid stainless steel handles of these instruments have great weight and feel. They don't get lost in your hand like some lighter instruments. The cutting blades are made from tool grade stainless steel and hardened creating long lasting edges.

All are made in house at World Wide Equine, Inc., Idaho, USA.

# MMXV with Delrin Handle

**100% American Made by World Wide Equine of Glens Ferry, Idaho**

**MMXV DLH \*\*\* With 1 1/8" or 1 1/4" Diameter Delrin Handle**

*Stainless Steel Gear Head and Shaft Housing*

*1 1/8" or 1 1/4" Adjustable Delrin Handle & Allen Wrench*

*Titanium Drive Shaft*

**Each Unit Comes With**

- Grease Gun
- One Tube Grease
- Keyway or Square Drive Wrench
- Disk/Burr Wrench
- Allen Wrench

*Guarded units may be ordered for use with 1" or 1 1/4" disks*

The "MMXV DLH" Series Hand Pieces have a larger diameter chemical resistant plastic handle. It is fully adjustable for any position along the shaft housing. Guarded disk units can be ordered for 1" or 1 1/4" disks. All MMXV hand pieces fit Freedom and Dremel Flex Shaft Motors and can be ordered in keyway or square drive. Delrin handles and titanium drive shafts make the MMXV hand piece one of the lighter and stronger on the World market today. **The MMXV DLH series units do not include 1/4" by 28 threaded burrs or 1/8" collets. (For Burrs and Collets See Page 24) When ordering specify handle diameter, 1 1/8" or 1 1/4". Add water to MMXV DLH units for \$350.00**

## MMXV Hand Piece Testimonials

The MMXV is the first and last instrument I use while floating horses. The weight, balance and ergonomic design make it a pleasure to use. I'm very impressed with the stainless steel head. It won't dent, even when chewed on. I've floated over 1000 head with this smooth running instrument. I definitely give it a thumbs up. Jeff Micheel CEqD

I have used the MMXV on approximately 2800 horses and it is still running flawlessly. The light weight really makes a difference through a long day of horses. The hexagonal handle, I didn't think I would like, but to my surprise it is more comfortable and user friendly than the round handles of other hand pieces on the market. The gear set of this unit runs really smooth with no vibrations. I am very familiar with the inner mechanics of multiple other hand pieces and the MMXV is Superior. World Wide Equine eliminated the ball bearings that would wear out and have to be replaced yearly for most practitioners. They replaced most bearings with long lived, rifled, grease-able, non-rusting, sleeve bearings. The drive shaft is larger (5/16") light weight space age non-rusting titanium so warping or rusting would be a feat. All together this new unit is very light, smooth, comfortable and should last for thousands of horses. Tyler Dees, DVM CEqD

## How To Get the Most From Your MMXV Hand Piece

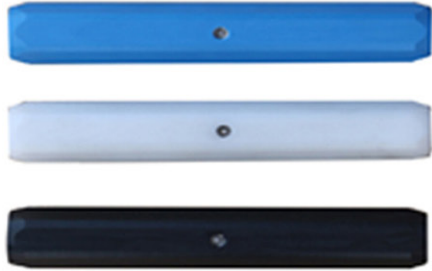

We like to run our MMXV hand pieces on Freedom's TX Series Motors. These heavy duty 1/3rd horse power motors run from 500 to 15,000 RPM. They are made in key-way and square drive. We use diamond burrs and disks, cleaning them frequently maximizing their cutting ability and reducing heat from friction. Clean sharp burrs are a must for proper dental maintenance. We have found that higher speeds are advantageous over lower speeds for maximum tooth removal, minimal heat build up and comfort for the horse. Most competitive products use lower speed drills and die grinders to run their hand pieces. I have found the lower speed units take much longer to get the job done and burrs and disks bounce around making horses and burrs harder to control. Dale Jeffrey, Principal, Equine Gnathological Training Institute, Inc.

TX Motor Description: Series TX motors are Freedom's most powerful flex shaft machines with 1/3HP. They have permanent magnet DC motors that feature the latest in flex shaft technology. These ball bearing models utilize advanced rare earth magnets (in place of the wound fields in our universal type Series SR motors) that deliver more torque at the low end and throughout the entire speed range of 500 to 15,000 RPM. No other flex shaft gives you greater control of the cutting tool, drill, or burr under any load.

710 CWA **Heavy Duty** Cut off wheel arbor for small Foredom hand piece; includes collet pin. Price: \$60.00

This is a heavy duty stainless steel arbor that we machine in house. They hold up very well replacing the lighter arbors on the market. To install remove the black collet collar, Place the brass pin inside the 1/8" collet, place the arbor over the collet and screw it down into the hand piece. Arbors come with an allen wrench for diamond cut off wheel installation.

1/8" x 1/4" x 28 Thread Three Piece Extension Collet Set

EXT COL SET: Three Piece Extension Collet Set Price: \$160.00

This useful set of 1/8" collets with 1/4" x 28 thread comes in three different lengths, 1/4", 1 1/8", 1 3/4"; this set is useful for relief cuts, working in alveolar sockets, removing plugs, carries, decay, sectioning teeth and other tough procedures. The collets accept any 1/8" mandrel/shank bit, disk or burr. They are made of stainless steel exclusively in our factory in Glens Ferry, Idaho, USA. Extension come with an allen wrench to lock mandrel in place.
