26" Stainless Steel Compound Molar Cutters

510 2261 26 00 OH *** "Open Head"

510 2261 26 30 OH *** "Thirty Degree Open Head"

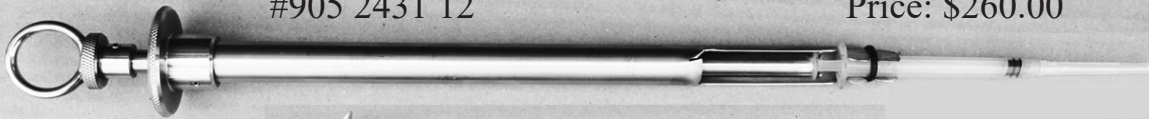

Compound cutters are designed for removal of the most protuberant cheek teeth. They are great for getting rid of a lot of tooth in a hurry. After the tooth has been cut it can be dressed with floats or burrs as needed. World Wide Equine makes the highest leverage compound cutter in the world today.

WWE Bulb Handled Instruments

World Wide Equine Hardened Tool Grade Stainless Steel Bulb Handled Elevators, Curettes, Osteotomes & Picks

The solid stainless steel handles of these instruments have great weight and feel. They don't get lost in your hand like some lighter instruments. The cutting blades are made from tool grade stainless steel and hardened creating long lasting edges.

All are made in house at World Wide Equine, Inc., Idaho, USA.

Double Jeffrey Mouth Gag

Incisor work may be performed more easily by doubling the Polypropalene Jeffrey Gags. One gag is used for each arcade while they are held in place with a strap over the poll. By using two gags excessive unbalanced TMJ pressure is kept to a minimum. Horses are more receptive to incisor work given the even amount of pressure throughout the jaw and head. This set of double gags comes with an off cheek hook enabling the use of one at a time if needed.

--------------------	---	----------	--	----------

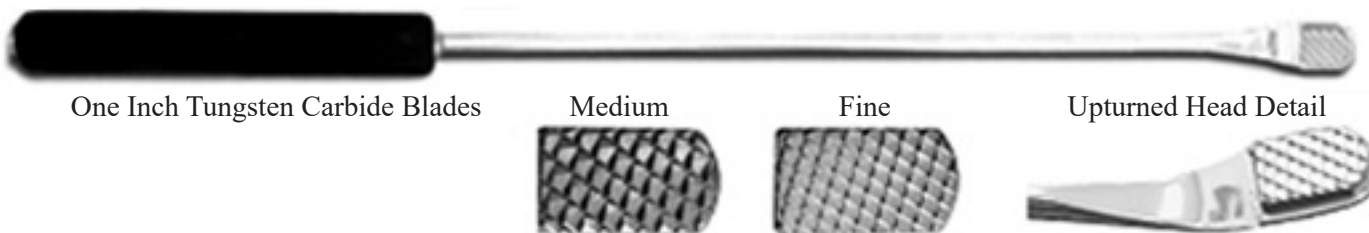

Low profile 7000 Series floats may be ordered with a pistol grip handle (right) or a Ian Wharton handle (left). Ad PG to your part number for Pistol Grip style handle or IW for Ian Wharton style handle. **Please specify head angle and one of two types of blades, regular or fast cut in fine or medium carbide.** All handles can be sealed with a plastic coating for an additional charge. The shorter lengths of the 7000 series floats are often ordered for use on small and miniature horses because of their narrow low profile head.

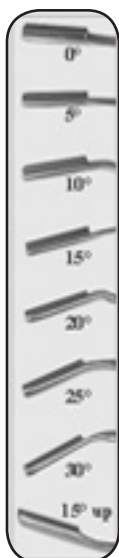

7000 Series Float and Blade Detail —

ONE INCH UPPER BACK 7000 SERIES SLIM-LINE PRO-LITE FLOAT

Order #	Description	Price
231 7000 18 01 15 UP	18" 15° Upper Back With Carbide Blade	\$217.00

231 7000 01 Resharp	Resharpener 1" Blade	\$27.45
231 7000 Tape	Replacement Tape Per Foot	\$11.00

To place your order for the 7000 Series Slim-Line Pro-Lite Floats all of the following information is needed.

- Shaft Length
- Angle of Head
- Blade Type
Fine or Medium
- Handle Style
If not ordering straight

Floats are shipped with medium blade if not specified otherwise.

All 7000 Series Floats are available in pistol grip or Ian Wharton style handles in any of the lengths pictured at right.

Please add **PG** for Pistol Grip or **IW** for Ian Wharton style handles to your part number when ordering.

The milled groove in the shaft of the straight handled 7000 series floats aids in determining float head angle when placed within the mouth.

Plastic coating may be applied to foam handles at our factory. They cannot be shipped as replacement handles. They are easy to clean and better for cold weather. Factory Part #: DIP--\$14.50

Instructions for Changing 7000 Series Blades

Removal of Old Blade:

1. Heat back side of float head with hot water
2. Pry blade loose with a fine bladed screwdriver or knife
3. Remove left over tape from head channel
4. Clean with acetone; do not touch cleaned surfaces

Attaching New Blade:

1. Remove backing from tape on new head
2. Attach blade to float head
3. Protect cutting surface with cloth and apply even pressure
4. Trim excess tape

1" by 8" Diamond Incisor and Canine Tooth Files With 4" Blade Coated on Two Sides and Both Edges

Top gnathological practitioners report that these are the finest, fastest and longest lasting stainless steel diamond coated files they have ever used. Many reports state that horses don't seem to mind work performed with these floats as much as other types of instrumentation.

Floats are coated with fine quality diamonds on two sides and both edges.

Plain File: #260 356 8 Price: \$143.67
In Split Blue Diamond * 260 356 825 SBD \$177.00

Foam Handle: #260 356 8 Price: \$147.67
In Split Blue Diamond * 260 356 825 SBD \$181.00

S/S Bulb Handle: #260 356 8 Price: \$173.67
In Split Blue Diamond * 260 356 825 SBD \$207.00

8" Regular Straight Foam Grip, No Dip

Dipped Foam Handles

Available in Black, Red, Yellow or Blue Color Coded Dip, \$14.50 @ On New Floats
Color Coded Dip & New Handles on Used Floats \$19.00
Floats Refurbished or Rebuilt: Normally about 1/2 Price
Please ship floats to our factory with instructions.

Dipped handles are easier to clean, mildew resistant and better to work with in cold weather. They still have their original shape and feel but are longer lived and the color coding lets you find the one you need when working. All handles need to be dipped at the factory. Floats may be returned for new handles and dip at any time.

Capps Floats

225 6000 17 00 14 IW	17" 14 Insert Straight Float With Ian Wharton Handle	\$349.95
----------------------	--	----------

Shaft Lengths Do Not Include 8" Handle Length

All Capps floats come with standard inserts unless others are specified.

You may custom order any float with a pistol grip, Ian Wharton handle or any angle head or shaft length. Custom orders are not normally in stock, taking slightly longer to build and deliver. There may be a slight additional charge depending on the complexity of the request.

All 6000 Series Capps Floats have long life secure three sided, carbide pinned inserts. Straight handled floats have milled shafts to aid in float placement. They include 8" long Pro-Lite handles for better grip and easier handling. The triangle heads allow easier oral access, greater comfort for the horse and less soft tissue damage. Foam handles may be plastic coated for easier cleaning and use in cold weather.

Titanium coated corrosion resistant replacement inserts are available for all Capps Floats.

 Low Profile Pistol Grip Float With Regular Cut Blade, Part Number: 207 LP 17 PG \$227.00
 Low Profile Straight Grip Float With Fast Cut Blade Part Number: 207 LP 17 FC \$254.00
 Low Profile Pistol Grip Float With Fast Cut Blade Part Number: 207 LP 17 PG FC \$254.00

Available in 7", 9", 13", 15", 17", 19" and Short 4" Incisor Lengths
 Option: Dipped Handle Colors of Red, Yellow, Blue and Black; Add \$14.50@

When you want a float to get the work done this is a wise choice. This instrument reduces the (bulk) overall size of the head about 40% over standard slide in blades making it easier to get around sore lacerated cheeks, back ramps and protuberant teeth. Some of the better practitioners report they do 80% of their work with this float and get along well with the horses.

Oral Health in Equidae

Fundamentals

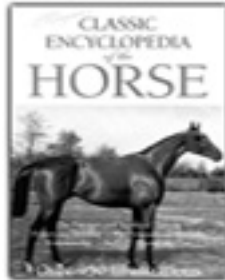

A Course Text Book Covering
Fundamental Equine Gnathology

By Dale Jeffrey

Dale's new 304 page book, "Oral Health in Equidae" has been in production for over five years. It includes over five hundred photos, charts and illustrations printed in full color covering the subject of fundamental equine gnathology. This book may be the most useful course text in the world today. It is available from World Wide Equine, Inc. for \$89.95, regular price, \$128.50. Discounts are available on larger quantities. See our Web Site at www.horsedentistry.com or Email wwequine@horsedentistry.com

MMXV and RA-250 Horse Power Conversion Maintenance Guide

Break In:

Clean grease zerk of any debris, using a wire brush or pick. Put one pump of grease in for every horse for the first 50 horses. Our MMXV's and RA-250 Horse Power Conversions have our best hardened steel gears. The gear lash is set very tight for long gear life. The gear heads run pretty warm in the beginning. We run the units at our factory wide open for 1/2 hour in break in oil before shipping. When working on horses don't work too long at a time on individual teeth to avoid instrument overheating and tooth damage. Keep your burrs clean of tooth debris and dip the end of the hand piece in water periodically to cool if needed.

Regular Maintenance:

Clean grease zerk of any debris, using a brush or pick. Put 5 pumps in every 5 or 6 horses. At the end of the day put 10 - 14 pumps in the instrument until grease comes out the relief hole. The small grease guns are low pressure; if the zerk is plugged grease can bypass within the grease gun making you think you are getting grease into the instrument when you are not. Make sure grease is coming out the relief hole by turning the small collar until you see the hole, then pump the grease through the unit until you see clean grease coming out the relief hole. After greasing turn the collar to cover the hole. After every fifty head or once a week lube the bottom end (the hole where you plug in the flex shaft cable) with a few drops of light oil such as sewing machine oil.

Cleaning:

Burr: Hold the burr at the surface of the water against a wire brush. Run the unit until the debris is cleaned from the diamond grit. Be sure to lube directly after to push water out of the gear head. Wipe your instrument with a damp cloth to remove excess water; make sure not to get debris/dirt into the bottom end of your hand piece or drop your cable onto the ground. If you do be sure and clean it thoroughly before plugging it into your hand piece.

Cable Length:

Make sure your cable extends 3/4" beyond the end of the cable housing. If it is too short it will not make a proper connection, if too long it will place excessive pressure on the titanium drive shaft, gears and flex shaft cable.

Notes:

If you run a Super Burr with a soft tissue guard spray WD-40 or equivalent on the guard after cleaning debris from the diamond in a bucket with a stainless steel wire brush, making sure the guard is free and turning easily on the end of the burr before storing.

It is up to you, the customer, to insure the grease zerk is cleaned before greasing the instrument. If there is debris left in the zerk it will become lodged and plug the zerk. If the zerk becomes plugged or damaged the instrument will not take grease and the zerk will need to be replaced. We will not warranty a damaged instrument due to the zerk being plugged. Please pay close attention to this. If you have any questions or need maintenance assistance please contact our staff.
