

**Company:** Restoration Fuels

**Position:** Densification Operator

**About the Position:**

This position will operate the product densification systems at our new plant in John Day, Oregon. Additionally, operators will coordinate product loadout and shipments with loader operators and ensure all product QC testing is completed prior to product shipping.

Restoration Fuels will begin training successful applicants in September.

**Minimum Requirements**

High school diploma or GED

Three to five years relevant work experience such as a lumber mill

Ability to work with a small team in a manufacturing setting

Strict adherence to safe workplace practices

Basic knowledge of quality control practices is highly desired

**Additional Details:**

Benefits include access to health insurance, a 401k retirement plan, paid time off, and relocation assistance.

Salary range is \$17 to \$24 per hour, depending on experience.

The plant will operate on a 24-hr/day, 7-day/week schedule. A rotating shift schedule will be developed to ensure proper staffing, which may be an 8, 10 or 12-hour rotating work schedule. Overtime payment will be based on this rotating schedule and in accordance with the Bureau of Labor and Industries (BOLI) requirements.

**To Apply**

Please send an email and resume to our Operations Manager, Joe Koerner, at [joe@restorationfuels.com](mailto:joe@restorationfuels.com) to begin the conversation.
