Job Title: Lead Operator

Job Description:

Requirements: Operational experience with continuous feed operations. SCADA or Distributive Control operating experience. Sawmill, lumber production or wood products experience.

Duties: Maintain desired throughput of wood chips through the dryer and torrefier. Maintain torrefied product within quality specifications.

Coordinate steam consumption with boiler operators. Watch SCADA system and data trends for anomalies or operational upsets. Communicate with densification operator to ensure proper inventory levels of torrefied (unpelleted material) is on hand. Communicate with loader operator to ensure adequate feed is available and federate is maintained. Assist Quality Control Technician with proper collection of required samples of feedstock and intermediate product testing. Lead efforts by all operators to ensure a safe and clean environment. Report unsafe conditions to Supervisor. Assist Chief Technical Officer with process modifications and changes to operating conditions. Assist plant manager and other staff with collection of data required.

Pay: \$17.47 per hour with \$0.35 shift differential for swing or night shift.

Hours: 40 to 44 hours per week.

Additional Information: The successful applicant will be responsible for the safe operation of the belt dryer for green chip infeed and the safe operation of the torrefier kiln system. This position acts as the lead operator during assigned shift of duty and is the primary contact for the operation. Responsible for communication with the appropriate supervisors and/ or managers during all upset or emergency conditions. Successful applicant will supply their own protective clothing including Leather boots (4.5" minimum top with non-slip tread), leather gloves, hearing and eye protection gear.
