## DAIRY FORK CONSTRUCTED WETLAND PROJECT- ALISO VIEJO, CALIFORNIA

### OVERVIEW:

The project is located at Aliso Viejo Parkway and Moulton Parkway and involves the construction of a wetland to reduce pollutant loads in urban runoff from the Dairy Fork sub-watershed, which is a tributary area of Aliso Viejo Creek Watershed. This project will enhance the protections of Aliso Creek, as well as the surrounding native species, through the re-vegetation and the removal of invasive non-native plants

### BENEFITS:

- Reduce pollutants from urban runoff. Enhance protection for Aliso Creek.

### FUNDING SOURCES:

- Environmental Cleanup Program aka Measure M
- 35% from local cities

-  - Habitat Restoration
-  - Bio-Filtration/Green Infrastructure
