LOGAN GARDENS GREEN ROOF – NEW YORK CITY, NEW YORK

OVERVIEW:

The Logan Gardens green roof is an extensive green roof that utilizes a pre-vegetated tray system.

BENEFITS:

- Reduce combined sewer overflows by reducing the amount and slowing the rate of stormwater that enters the sewer system.

FUNDING SOURCES:

- Grant funds (from the NYS DEC Hudson River Estuary Program, in partnership with New England Interstate Water Pollution Control Commission)
- Deutsche Bank
- NYC Soil & Water Conservation District

 - Bio-Filtration/Green Infrastructure
