PRIORITY SEDIMENT / POLLUTION REMOVAL PROJECT- CYPRESS, CALIFORNIA

OVERVIEW:

Install modular wetland units and a vegetated bioswales within the city's four top priority catchment areas. The proposed treatment area is approximately 6.8 acres and locations include: Grindlay Street/Vista Hermosa, Holder Street/Lakeshore Drive, Orange Avenue/Juanita Street and Lincoln Avenue between Valley View Street and Walker Street.

BENEFITS:

This project, combined with the City's water quality efforts, public education, and storm water program, will ultimately provide water resources benefits for everyone, while also reducing storm water runoff and pollution from transportation-related activities.

FUNDING SOURCES:

- Environmental Cleanup Program aka Measure M
- OCTA
- City of Cypress.

 - Bio-Filtration/Green Infrastructure
