SUN VALLEY WATERSHED MANAGEMENT PLAN- SUN VALLEY, CALIFORNIA

OVERVIEW:

The primary objective of the Sun Valley Watershed Management Plan (WMP) is to solve the chronic local flooding problem with a multipurpose solution, acknowledging that rainfall is a significant component of our water supply in this semi-arid region.

BENEFITS:

- flood control
- increasing conservation
- recreational opportunities
- wildlife habitat
- reducing stormwater pollution

FUNDING SOURCES:

- The project was funded by the Department of Water Resources (Local Groundwater Assistance) grant
- Proposition 12 (Murray-Hayden) grant received by TreePeople
- Los Angeles County Flood Control District

-  - Water Storage
-  - Habitat Restoration
-  - Flood Mitigation
-  - Bio-Filtration/Green Infrastructure
-  - New/Improved Drainage Infrastructure
