**Re: Dr. Thomas F. Stringer**

Without any reservations, I fully endorse Dr. Stringer as a candidate for the president of the AUA. As a fellow colleague, business and medical partner I have known Dr. Stringer for over 30 years. Through this time, he has evolved from a small community-based Urologist to an academician as Chairman of Urology at the University of Florida. Experiences in both arenas, allows him to understand the issues in medicine facing all Urologists, today. Personally, I have been involved with him in the development of various healthcare endeavors including the establishment of the largest Urology organization in Florida. Apart from showing great leadership in Urology at the state and national level, he has shown leadership in multiple local not-for-profit organizations. I believe he will be a great asset to the organization.
