5
Drugs
There are two categories of drugs that affect the reputation of Rugby League and performance in the game.

The categories are:
- Performance enhancing drugs – such as Anabolic Steroids
- Illicit or recreational drugs – such as Marijuana, all of which impair performance

The problem of performance enhancing drugs has been addressed by the game’s governing body and the Australian Sports Anti-Doping Authority (ASADA). Appropriate education programs, stringent testing and well publicised disciplinary policies are in place to provide players with knowledge, support, and deterrents.

The serious issue of performance impairing drugs, which are commonly available within the broader community, is the perception that these drugs are in use amongst rugby league players. As the majority of these drugs are illegal and have negative effects upon the
performance and health of players, as well as on the reputation on the game, the Club is prepared to take action to address the problem.

While the use of illicit drugs such as cocaine, ecstasy and marijuana is currently tested as part of the ASADA program, the club, consistent with most NRL clubs, is increasing its fight against these drugs by carrying out additional testing.

As per our Code of Conduct, illegal drugs, prohibited substances and performance enhancing drugs (including steroids) will not be tolerated by this Club.

All players must take personal responsibility for all substances consumed.

If the result of the drug tests conducted by either the NRL/ARL/NSWRL or F.I.R.L.A are positive for a player, the following sanctions can apply:

- First offence – a minimum suspension for 2 years
- Second offence – a life ban
