

Why Buy Werever?

WEATHERPROOF

Our cabinets can be installed directly outside, exposed to rain, snow and ice. They're just at home around salt water, chlorinated pool water, and humidity. And they're completely waterproof.

STAIN RESISTANT

They won't be harmed by mustard, ketchup, BBQ sauce or red wine, which seems to stain just about everything!

They can be cleaned with harsh chemicals without causing any damage to the cabinets.

FADE RESISTANT

The cabinet material contains a UV inhibitor. Your kitchen can be placed outside, exposed to direct sunlight, without fading.

100% AMERICAN MADE

We believe in "buy American." Everything in our cabinets is made in the USA, from the HDPE material we purchase, to our manufacturing equipment. We assemble our cabinets with pride – right here in the USA.

MANY COLORS, DOOR STYLES, AND FREE DESIGN

Our cabinets are customized to meet your needs. All backyards are not alike. Neither are all outdoor kitchens. Will you need storage? A grill? Drawers and shelves? We design your outdoor kitchen to suit your needs.

EARTH FRIENDLY

Werever™ cabinets are manufactured from high density polyethylene (HDPE), which is completely recyclable. We even collect all the scrap material from the manufacturing process and recycle it. No part of a Werever cabinet should ever wind up in a landfill.

LIFETIME WARRANTY

Our cabinets are built to last. We are so confident in their strength and durability that we warranty them for life. See our website for more details.
