

18,437 SERVED

During SFY 2020 we served 18,437 individuals -on target with goal. We were able to achieve great numbers despite school and court shutdowns due to COVID-19. How'd we do it? We got creative.

We had staff in 37 SCHOOLS

Educational Support Groups are prevention-oriented and focus on topics that impact non-academic barriers to school success. During this difficult time, when children are home and stress is running high, it's more important than ever to have these groups.

250 EDUCATIONAL SUPPORT GROUPS

PERCEPTION OF HARM

Objectives for Educational Support Groups included having 75% of group participants identify alcohol, tobacco, vaping, and other risky behaviors as harmful; 85% for Universal Education Groups, exceeding objectives in all areas, and achieved numbers greater than recorded in Butler County youth behavioral health surveys.

IN EDUCATIONAL SUPPORT GROUPS:

IN UNIVERSAL EDUCATION GROUPS:

COMPARE TO 2020 BUTLER COUNTY PRIDE SURVEYS:

INAUGURAL WALK

To remember those lost to suicide, the Butler County Suicide Prevention Coalition (formed by lead agency Envision Partnerships), organized the first annual Walk to Remember. 40 people came out to honor the lives of those lost to suicide at Voice of America Park. The 2019 event was made possible with the help of our partners at Primary Health Solutions, NAMI Butler County, and the Butler County Mental Health and Addiction Recovery Services Board.

REMEMBERING THOSE LOST TO SUICIDE

A WALK TO REMEMBER

TUESDAY, SEPTEMBER 10TH, 2019

WATCH THE 2020 WALK

This year's walk was a little different, with a virtual and in-person option. You can watch the virtual event now on our website at:

www.envisionpartnerships.com/walk2remember

FAMILY MEDIATION

Mediation is a non-judgmental, confidential process that provides participants with an opportunity to address conflicts and other issues they are experiencing. The mediator is a neutral, third party that assists participants with improving communication, restoring relationships, finding solutions, and creating a written agreement.

88%

NO RE-OFFENSE

*88% of parents reported their child had not re-offended.

96%

IMPROVED BEHAVIOR

96% of parents reported an improvement in behavior at home and/or school.

HEALTHY HAMILTON WEEK

Healthy Hamilton looked a little different this year, with a completely virtual agenda! Our focus for this year's event was the 8 Dimensions of Wellness.

TOBACCO POLICY COALITION

Last year the Butler County Tobacco Policy Coalition, coordinated by Envision Partnerships, played a role in the passing of Tobacco 21 in Ohio. This law raised the purchasing age of tobacco products, cigarettes, and alternative nicotine products such as e-cigarettes and vaping products from 18 to 21. It also made it illegal to give such products to others under age 21.

30-Day Use of Alcohol, Cigarettes, Marijuana, Prescription Drugs and Vaping

*2020 Butler County Pride Survey

In just two years, e-vapor became the most used substance among 7th-12th graders in Butler County - surpassing alcohol, cigarettes, marijuana, and prescription drugs. From 2018-2020, percentage of students who reported using e-vapor in the past 30 days went from 11.6% to 14.1%. The future focus for the Butler County Tobacco Policy Coalition is to reduce use.

SUCCESS STORY: Sign reads: "No smoking. That goes for everyone. Thanks!" This young family wanted everyone to know their home was tobacco-free and a healthy environment for all.

BABY & ME TOBACCO FREE

Baby & Me, Tobacco-Free is a smoking cessation program created to reduce the burden of tobacco use among women during the prenatal and postpartum period. According to a 2019 study from Public Health Nursing/ Volume 37, Issue 1, "infants of mothers enrolled in the program have a lower risk of birthweight, preterm birth and neonatal intensive care unit (NICU) admission... and an individual cost savings of \$6,040."

The program follows clinical guidelines for treating tobacco dependency. Our staff conduct counseling sessions each month to help pregnant women quit smoking and stay quit after delivery. A partner who lives with the pregnant mom, including family members, can participate in the program, too. This increases the likelihood of successful cessation by improving social supports and also contributes to lower second-hand smoke in the house.
